Advanced View Arduino Projects List

List of Projects using arduino with advance view:

1. **Serial Basic Hookup Guide**
   - **Introduction**: The Serial Basic is an easy to use USB to Serial adapter based on the CH340G IC from WCH. It works with 5V and 3.3V systems and should auto install on most operating systems without the need for additional drivers. It’s a great lower...... Listed under: Other Projects

2. **Arduino-Powered Water Bottle**
   - **Introduction**: Drinking enough water is very important for our health. Drinking more water can lead to clearer skin, better overall health, improved productivity and brain function, increased energy levels, and even weight loss. In our busy lives, it is really hard to remember to drink..... Listed under: Other Projects

3. **Complete Digital Clock including Alarm and Motion Sensor**
   - I have done several designs of digital clocks for Arduino using LEDs and LCD displays, but this one is more special because I added other features like alarm and motion sensor (PIR). Main features PIR (Presence Infrared Sensor) RTC (real-time clock) Alarm Temperature Humidity Water...... Listed under: Clock – Timer Projects

4. **Amazon Kitchen DRS**
   - **The Project**: This project is a combination of the many smart fridges and pantry’s of the past. The idea is to combine all of them while also introducing Amazon’s DRS system through Alexa and the Echo products as a bonus feature. The process will be...... Listed under: Other Projects

5. **Alarm Clock**
   - **Story**: After designing the “Clock Set Date Time” and hearing the suggestion of ArduPic, I thought it would be a good idea and also useful, add a “wake-up alarm.” A small change to the code and adding a few components: Here’s “the Alarm Clock”...... Listed under: Clock – Timer Projects

6. **Digital Dice using Arduino**
We all are familiar with dice and often played LUDO or SANP SIDI (Snake & Ladders) game by using dice. Dice is a square type solid box which contains 6 different numbers on all of its sides. We throw dice on a surface to get......

Listed under: Other Projects

7. Automatic Door Opener using Arduino

You must have seen automatic door openers in shopping malls and other commercial buildings. They open the door when someone comes near the entrance and close it after sometime. A number of technologies are available to make such kinds of systems like PIR sensors, Radar sensors, Laser...... Listed under: Other Projects

8. Computer Controlled Robot using Arduino

After designing this line follower robot using arduino uno, I have developed this computer controlled robot. It can be controlled via the computer and we can use specific keyboard keys to move it. It runs over serial communication which we have already discussed in our previous...... Listed under: Robotics – Automation Projects

9. DTMF Controlled Robot using Arduino

In present time almost all the people are familiar with robots. Robots play a very important role in human life. Robots are a machine which reduces the human efforts in heavy works in industries, building etc. and makes life easy. We are here with our next robot...... Listed under: Robotics – Automation Projects

10. DC Motor Control using Arduino

Here we are going to interface a DC motor to Arduino UNO and its speed is controlled. This is done by PWM (Pulse Width Modulation). This feature is enabled in UNO to get variable voltage over constant voltage. The method of PWM is explained here;...... Listed under: Motor Projects

11. Arduino Based LED Dimmer using PWM

This LED DIMMER is an Arduino Uno based PWM (Pulse Width Modulation) circuit developed to get variable voltage over constant voltage. The method of PWM is explained below. Before we get start building a 1 Watt LED Dimmer circuit, first consider a simple circuit as shown in figure below. Now...... Listed under: PWM Projects

12. How to Use Shift Register 74HC595 with Arduino Uno?

In ARDUINO we have 20 I/O pins, so we can program 20 pins of UNO to be used as either input or output. Although there are more pins on ATMega328P controller than on UNO, this is because while designing the board some pins are defaulted. Now...... Listed under: Memory – Storage Projects

13. Temperature Controlled Fan using Arduino

In this arduino based project, we are going to control DC fan speed according to the room temperature and show these parameter changes on a 16×2 LCD display. It is accomplished by the data communications between Arduino, LCD, DHT11 sensor Module and DC fan that is controlled by...... Listed under: Temperature Measurement Projects

14. Interfacing 16×2 LCD with Arduino
To establish a good communication between human world and machine world, display units play an important role. And so they are an important part of embedded systems. Display units – big or small, work on the same basic principle. Besides complex display units like graphic displays.

15. **7 Segment Display Interfacing with Arduino**

In this tutorial we are going to interface a seven segment display to ARDUINO UNO. The display counts from 0-9 and resets itself to zero. Before going further, let us first discuss about seven segment displays. A seven segment display got its name from the very.... Listed under: [LCD Projects](#)

16. **Accelerometer Based Hand Gesture Controlled Robot using Arduino**

Robots are playing an important role in automation across all the sectors like construction, military, medical, manufacturing, etc. After making some basic robots like line follower robot, computer controlled robot, etc, we have developed this accelerometer based gesture controlled robot by using arduino uno. In this project.... Listed under: [Robotics – Automation Projects](#)

17. **How to Use ADC in Arduino Uno?**

In this tutorial we are introducing concept of ADC (Analog to Digital Conversion) in ARDUINO UNO. Arduino board has six ADC channels, as show in figure below. Among those any one or all of them can be used as inputs for analog voltage. The Arduino Uno..... Listed under: [Other Projects](#)

18. **Humidity and Temperature Measurement using Arduino**

Humidity and temperature are common parameters to measure environmental conditions. In this Arduino based project we are going to measure ambient temperature and humidity and display it on a 16×2 LCD screen. A combined temperature and humidity sensor DHT11 is used with Arduino uno...... Listed under: [Temperature Measurement Projects](#)

19. **Color Detector using Arduino Uno**

In this project we are going to interface TCS3200 color sensor with Arduino UNO. TCS3200 is a color sensor which can detect any number of colors with right programming. TCS3200 contains RGB (Red Green Blue) arrays. As shown in figure on microscopic level one can see.... Listed under: [Other Projects](#)

20. **Automatic Room Light Controller with Bidirectional Visitor Counter**

Often we see visitor counters at stadium, mall, offices, class rooms etc. How they count the people and turn ON or OFF the light when nobody is inside? Today we are here with automatic room light controller project with bidirectional visitor counter by using Arduino Uno. It is very..... Listed under: [Home Automation Projects](#)

We all are quite familiar with voting machines, even we have covered few other electronic voting machine projects previously here and here using RFID and AVR microcontroller. In this project, we have used the arduino controller to create an electronic voting machine. Components Arduino Uno 16×2...... Listed under: [Other Projects](#)
22. Arduino Based Heartbeat Monitor

Heart rate, body temperature and blood pressure monitoring are very important parameters of human body. Doctors use various kind of medical apparatus like thermometer for checking fever or body temperature, BP monitor for blood pressure measurement and heart rate monitor for heart rate measurement. In...... Listed under: Medical – Health based Projects

23. Arduino Based LED Chaser using Rotary Encoder

In this project we are going to interface a ROTARY ENCODER with ARDUINO. ARDUINO UNO is an ATMEGA controller based development board designed for electronic engineers and hobbyists. In ARDUINO we have 20 I/O pins, so we can program 20 pins of UNO to be...... Listed under: LED Projects

24. Keypad Interfacing with Arduino Uno

In this tutorial we are going to interface a 4x4 (16 key) keypad with ARDUINO UNO. We all know keypad is one of the most important input devices used in electronics engineering. Keypad is the easiest and the cheapest way to give commands or instructions to...... Listed under: Other Projects

25. Servo Motor Control using MATLAB

In this tutorial you will learn to make direct connection between your Arduino and Matlab, so that you can program your Arduino directly through Matlab. It is very useful when you are working on complex robotics like Robotic Hand, Humanoid etc. as you can process your...... Listed under: PWM Projects

26. Magnetic Field Strength Measurement using Arduino

In this project we are using the concept of ADC (Analog to Digital Conversion) in ARDUINO UNO. We are going to use a Hall Effect sensor and Arduino uno to measure the field strength of a magnet. The sensor which we have used here is UGN3503U. This...... Listed under: Other Projects

27. RFID Interfacing with Arduino

In this tutorial we are going to design a system to read the ID of RFID cards. RFID stands for Radio Frequency Identification. Each card has a unique ID embedded in it. These systems have many applications, like in offices, shopping malls and in many other...... Listed under: Other Projects

28. Servo Motor Control using Arduino

In this tutorial we are going to control a servo motor by ARDUINO UNO. Servo Motors are used where there is a need for accurate shaft movement or position. These are not proposed for high speed applications. These are proposed for low speed, medium torque...... Listed under: Motor Projects

29. Automatic Water Level Indicator and Controller using Arduino

In this Arduino based automatic water level indicator and controller project we are going to measure the water level by using ultrasonic sensors. Basic principal of ultrasonic distance measurement is based on ECHO. When sound waves are transmitted in environment then they return back to the origin as...... Listed under: Other Projects
30. Working of Force Sensor with Arduino

In this project we will be developing a fun circuit using Force sensor and Arduino Uno. This circuit generates sound linearly related to force applied on the sensor. For that we are going to interface FORCE sensor with Arduino Uno. In UNO, we are going use...... Listed under: Sensor – Transducer – Detector Projects

31. 8×8 LED Matrix using Arduino

In this project we are going to design an 8×8 LED matrix display, for that we are going to interface an 8×8 LED matrix module with Arduino Uno. An 8×8 LED matrix contains 64 LEDs (Light Emitting Diodes) which are arranged in the form of a matrix, hence...... Listed under: LED Projects

32. RGB LED with Arduino

In this project we are going to interface 5 RGB (Red Green Blue) LEDs to Arduino Uno. These LEDs are connected in parallel for reducing PIN usage of Uno. The RGB LED will have four pins as shown in figure. PIN1: Color 1 negative terminal...... Listed under: LED Projects

33. Servo Motor Control by Flex Sensor

In this tutorial we are going to develop a circuit using FLEX sensor, Arduino Uno and a Servo motor. This project is a servo control system where the servo shaft position is determined by the flex or bent or deviation of the FLEX sensor. Lets first...... Listed under: Motor Projects, Sensor – Transducer – Detector Projects

34. Variable Power Supply By Arduino Uno

In this tutorial we will develop a 5V variable voltage source from Arduino Uno. For that we are going use ADC (Analog to Digital Conversion) and PWM (Pulse Width Modulation) feature. Some digital electronic modules like accelerometer work on voltage 3.3V and some work on...... Listed under: Other Projects

35. PC Controlled Home Automation using Arduino

This project explains designing a home automation system which is controlled by a computer to switch On and switch Off various electrical and electronics devices. For demonstration we have used 3 zero watt bulbs which indicates LIGHT, FAN and TV. It uses Arduino Uno board as a...... Listed under: Home Automation Projects

36. Arduino Based Tone Generator

In this project we will develop a tone generator using Arduino Uno. We will have buttons interfaced with the UNO and each one of them generates different intensity of tone. The frequency of tone generated by the UNO is same at every internal. It's the intensity of the...... Listed under: Other Projects

37. Snake Game on 8×8 Matrix using Arduino

Snake Game has been very popular since the beginning of the Mobile phones. Initially it was come in Black and white cell phones, and soon became very famous. Then with the advancement of the Cellphones, this game has also changed a lot, and now many...... Listed under: Game – Entertainment Projects
38. Digital Code Lock using Arduino

Security is a major concern in our day to day life, and digital locks have became an important part of these security systems. One such digital code lock is imitated in this project using arduino board and a matrix keypad. Components Arduino Keypad Module Buzzer...... Listed under: Other Projects

39. GSM Based Home Automation using Arduino

Mobile phone is a revolutionary invention of the century. It was primarily designed for making and receiving calls & text messages, but it has become the whole world after the Smart phone comes into the picture. In this project we are building a home automation...... Listed under: Home Automation Projects

40. Prepaid Energy Meter using GSM and Arduino

Prepaid Electricity Energy Meter is a good concept in which you can recharge its balance, like we do in our mobile phones. In this project we are building a automated system by using Arduino and GSM module. You can recharge the electricity balance through this...... Listed under: Metering – Instrument Projects

41. Clap Switch using Arduino

In this project we are going to make Clapper circuit using the concept of ADC (Analog to Digital Conversion) in ARDUINO UNO. We are going to use a MIC and Uno to sense the sound and trigger a response. This Clap ON Clap OFF switch basically turns...... Listed under: Other Projects

42. IR Remote Controlled Home Automation using Arduino

Previously we have covered many types of Home automations using different technologies like DTMF Based Home Automation, PC Controlled Home Automation using Arduino, Bluetooth Controlled Home Automation. In this project, we are using IR based wireless communication for controlling home appliances. In this project, Arduino...... Listed under: Home Automation Projects

43. Bluetooth Controlled Toy Car using Arduino

After developing few popular robotic projects like line follower robot, edge avoiding robot, DTMF robot, gesture controlled robot, etc. in this project we are going to develop a bluetooth controlled robo car. Here we used a Bluetooth module to control the car, and it is also...... Listed under: Car Projects

44. Servo Position Control with Weight (Force Sensor)

In this tutorial we will develop a circuit using Force sensor, Arduino Uno and a servo motor. It will be a servo control system where the servo shaft position is determined by the weight present on the force sensor. Before going any further let's talk...... Listed under: Sensor – Transducer – Detector Projects

45. How to establish UART communication between ATmega8 and Arduino Uno?

Here we are going to establish a communication between an ATmega8 microcontroller and Arduino Uno. The communication established here is UART (Universal Asynchronous Receiver Transmitter) type. It's serial communication. By this serial communication data can be shared between two controllers, which is a required in various embedded system...... Listed under: Arduino Programmer Projects
46. WiFi Controlled Robot using Arduino

There are many types of Robots, from the simple ones like a Toy car to the advanced ones like industrial Robots. We have already covered many types of Robots using different technologies, have a look at them: Line Follower Robot using 8051 Microcontroller Line Follower...... Listed under: Robotics – Automation Projects

47. Arduino Solar Day Night Controller

Introduction This is an Arduino controlled light sensing switching unit. Its main use is to control solar lights to turn on when it is dark outside, but it can work in many more applications. This guide will walk you through every aspect of the building...... Listed under: Solar energy projects

48. Capacitance Meter using Arduino

When we come across circuit boards which are previously designed or we take out one from old TV or computer, in attempt to repair it. And sometimes we need to know the capacitance of particular capacitor in the board to eliminate the fault. Then we...... Listed under: Metering – Instrument Projects

49. GUI Based Home Automation System using Arduino and MATLAB

We all are familiar with the word ‘Automation’, where the human interaction is minimal and things can be controlled automatically or remotely. Home automation is very popular and demanding concept in the field of Electronics, and we are also making our best efforts to make...... Listed under: Home Automation Projects

50. Arduino GPS Clock

There are many GPS satellites around the Earth which are used to provide the exact location of any place. Along with the location coordinates (Latitude and Longitude), it also provide other data like time, date, altitude, direction tracking angle etc. We have already learned to...... Listed under: Clock – Timer Projects, GPS Based Projects

51. How to Use GPS with Arduino

GPS is a very useful device which is used in many electronics projects and applications like vehicle tracking system, GPS Clock, Accident Detection Alert System, traffic navigation and surveillance system etc. But question is how to use the GPS and read the data from GPS? We can...... Listed under: Other Projects

52. Arduino Propeller LED Display

You have seen Propellers in Aircrafts or in marine ships, if not in real then in movies for sure. In this session we are going to design a Propeller Display with Arduino, LEDs and a DC motor. In this Propeller Display, text will appear to...... Listed under: LED Projects

53. DIY LED VU Meter as Arduino Shield

VU Meter or Volume Meter is very popular and fun project in Electronics. We can consider the Volume Meter as an Equalizer, which is present in the Music systems. In which we can see the dancing of LEDs according to the music, if music is loud then equalizer...... Listed under: How To – DIY – Projects, LED Projects
54. **Call and Message using Arduino and GSM Module**

Sometimes people find it difficult to use the GSM Module for its basic functions like calling, texting etc., specifically with the Microcontrollers. So here we are going to build a Simple Mobile Phone using Arduino, in which GSM Module is used to Make the Call,...... Listed under: **Phone Projects**

55. **DIY Smart Vacuum Cleaning Robot using Arduino**

Hi guys, are you a newbie to the world of Robotics or Electronic? OR Are you looking for a simple yet powerful project to make your friends and teachers impressed? Then this is the place. In this project we will use the power of Embedded...... Listed under: **How To – DIY – Projects**

56. **Track A Vehicle on Google Maps using Arduino, ESP8266 & GPS**

Vehicle Tracking System becomes very important now days, especially in case of stolen vehicles. If you have GPS system installed in your vehicle, you can track you Vehicle Location, and its helps police to track the Stolen Vehicles. Previously we have built similar project in...... Listed under: **Other Projects**

57. **Make Your Own Homemade Arduino Board with ATmega328 Chip**

Arduino is an open-source development platform for engineers and hobbyists to develop electronics projects in an easy way. It consists of both a physical programmable development board (based on AVR series of microcontrollers) and a piece of software or IDE which runs on your computer and used to write and upload...... Listed under: **Home Automation Projects**

58. **Frequency Counter using Arduino**

Almost every electronic hobbyist must have faced a scenario where he or she must measure the frequency of signal generated by a clock or a counter or a timer. We can use oscilloscope to do the job, but not all of us can afford an...... Listed under: **Metering – Instrument Projects**

59. **Arduino Solar Tracker using LDR and Servo Motor**

In this article we are going to make a Solar Panel Tracker using Arduino, in which we will use two LDRs (Light dependent resistor) to sense the light and a servo motor to automatically rotate the solar panel in the direction of the sun light...... Listed under: **Solar energy projects**

60. **Smoke Detector using MQ2 Gas Sensor and Arduino**

Smoke Detectors are very useful in detecting smoke or fire in buildings, and so are the important safety parameters. In this DIY session, we are going to build a Smoke Detector Circuit which not only sense the smoke in the air but also reads and displays the level...... Listed under: **Sensor – Transducer – Detector Projects**

61. **Heart Beat Monitoring over Internet using Arduino and ThingSpeak**

In this project we are going to make a Heart Beat Detection and Monitoring System using Arduino that will detect the heart beat using the Pulse Sensor and will show the readings in BPM (Beats Per Minute) on the LCD connected to it. It will...... Listed under: **Medical – Health based Projects**
62. Using the Android Platform to control Robots

The popularity of android devices is attributed to their powerful capabilities which include internet connectivity, open architecture, and several other kinds of built-in sensors. Students and other software developers are increasingly using the android platform since it utilizes Java programming language which can easily be...... Listed under: Phone Projects, Robotics – Automation Projects

63. Arduino based Automatic Plant Irrigation System with Message Alert

Whenever we go out of town for few days, we always used to worry about our plants as they need water on regular basis. So here we are making Automatic Plant Irrigation System using Arduino, which automatically provides water to your plants and keep you updated...... Listed under: Home Automation Projects

64. IOT based Air Pollution Monitoring System using Arduino

In this project we are going to make an IOT Based Air Pollution Monitoring System in which we will monitor the Air Quality over a webserver using internet and will trigger a alarm when the air quality goes down beyond a certain level, means when...... Listed under: Sensor – Transducer – Detector Projects

65. Scrolling Text Display on 8×8 LED Matrix using Arduino

In this tutorial we are going to design an 8×8 LED Matrix Scrolling Display using Arduino Uno, which will show scrolling alphabets. 8×8 LED Matrix contains 64 LEDs (Light Emitting Diodes) which are arranged in the form of a matrix, hence the name is LED...... Listed under: LED Projects

66. IOT Based Dumpster Monitoring using Arduino & ESP8266

In this DIY, we are going to make an IOT based dumpster/garbage Monitoring System which will tell us that whether the trash can is empty or full through the webserver and you can know the status of your ‘Trash Can’ or ‘Dumpsters’ from anywhere in the...... Listed under: Other Projects

67. The Big Easy Stepper Motor Driver

Stepper (or step) motors are really cool. They are perfect for automation or any time you need a motor to turn to a specific point, at a specific speed, in a specific direction. And, unlike typical motors, steppers are able to do all of this, ...... Listed under: Motor Projects

68. Sensing Humidity With The SHT15

The SHT15 is a digital humidity sensor that outputs a fully calibrated humidity reading. And... because what we are measuring is actually relative humidity, and relative humidity being relative to temperature, the SHT15 has a builtin digital thermometer. This makes things much easier to work...... Listed under: Sensor – Transducer – Detector Projects

69. MQ-3 Alcohol Sensor, Breakout Board + Arduino

Lot has happened since our last article was published and to celebrate the continuance of bildr we'll be playing with the MQ-3 Alcohol Gas Sensor. Coupled with the SparkFun Gas Sensor Breakout Board, connecting the MQ-3 to your Arduino is a breeze. The MQ-3 is...... Listed under: Sensor – Transducer – Detector Projects
70. Arduino + MLX90614 IR Thermometer

Being able to sense temperature is cool... But being able to read the temperature of an object without even touching it is simply awesome. The MLX90614 is a sensor that can do just that. By reading the infrared light coming off an object, this guy...... Listed under: Temperature Measurement Projects

71. DIY 3X3X3 LED Cube with Arduino

In this project we are going to design a 3x3x3 LED CUBE and connect it to Arduino UNO to get different patterns. For a beginner we will start with a simple pattern. A typical 3*3*3 LED cube connected to UNO is shown in the image above, ...... Listed under: How To – DIY – Projects

72. Art-duino

We built a mini-crawler robot that draws a path behind it to make interesting designs. We chose this design for a variety of reasons. First and foremost, we experimented with attaching our other materials to the motors, and most of them were too heavy for...... Listed under: Other Projects

73. Mobile Phone Controlled Robot Car using G-Sensor and Arduino

In this article, we are going to Control the Robot Car through the G sensor of our mobile phone and you will be able to move the Robot just by tilting the Phone. We will also use Arduino and RemoteXY app for this G-Sensor Controlled...... Listed under: Car Projects

74. Interfacing MQ2 to Arduino- Gas Sensor for Smoke-Butane-CH4 and LPG

In this article, we are going to learn how to interface MQ2 Gas Sensor with Arduino. MQ2 is basically a general purpose gas sensor (similar to MQ5) which can sense a broad range of gases like LPG, Butane, Methane(CH4), Hydrogen and in addition to these...... Listed under: Sensor – Transducer – Detector Projects

75. Interfacing PIR Sensor to Arduino – Connect Motion Sensor/Detector to Arduino

In this article, we are going to learn how to interface/connect PIR Sensor or Passive Infrared Sensor to Arduino. We have written a tutorial on how to interface PIR sensor to 8051 previously in CircuitsToday! So a PIR sensor which is also known as Pyroelectric...... Listed under: Sensor – Transducer – Detector Projects

76. Arduino and 7 Segment Display – Interfacing Tutorial

In this article, we are publishing a tutorial on how to interface seven segment LED display to Arduino. Seven segment displays are used in many embedded system and industrial applications where the range of outputs to be shown is known beforehand. Basic 1 digit seven segment...... Listed under: LED Projects

77. LM35 and Arduino – Temperature Measurement and Display on LCD

In this article, we are presenting a tutorial on how to interface LM35 and Arduino along with its program. Once we successfully interface arduino and lm35, we will go on to build a temperature display using arduino and a 16×2 LCD module which constantly monitors......
78. **Interfacing 8×8 LED Matrix with Arduino**

LED matrix displays can be used to display almost anything. Most modern LED sign boards use various types of matrix boards with controllers. In this tutorial we are going to interface a single color 8×8 LED matrix with Arduino and display a few characters in...... Listed under: **LED Projects**

79. **How to Make an LED Scrollbar**

In this tutorial, we are going to build an LED Scroll Bar as shown in the image given below. The project is designed to flash Ten LED strips (by giving different lighting patterns for each strip) with the help of a control board. We...... Listed under: **LED Projects**

80. **Interfacing MQ5 LPG Sensor to Arduino**

In this guide, we learn how to interface MQ5 Gas sensor (which is a generic Gas Sensor more suited to detect and determine LPG concentrations) with Arduino. In this tutorial, we are using the MQ5 Gas sensor module (which is widely available in market)...... Listed under: **Sensor – Transducer – Detector Projects**

81. **Tachometer using Arduino**

Tachometer is a device used for measuring the number of revolutions of an object in a given interval of time. Usually it is expressed in revolutions per minute or RPM. Earlier tachometers purely mechanical where the revolution is transferred to the tachometer through mechanical coupling...... Listed under: **Other Projects**

82. **Programming an ATtiny w/ Arduino 1.6 (or 1.0)**

This tutorial shows you how to program an ATtiny45, ATtiny85, ATtiny44 or ATtiny84 microcontroller using the Arduino software. These are small, cheap ($2-3) microcontrollers that are convenient for running simple programs. The ATtiny45 and ATtiny85 have eight legs and are almost identical, except that the...... Listed under: **Other Projects**

83. **Temperature logger using Arduino**

Simple temperature logger using Arduino (°C & °F). This project is about a simple USB temperature logging system using arduino uno and the serial monitor function in the arduino IDE. The system monitors the temperature every 2 seconds and shows it on the arduino serial monitor...... Listed under: **Temperature Measurement Projects**

84. **Open Source EEG/ECG/EMG**

Introduction Electrodes on the skin can be used to measure muscle (electromyography, EMG) brain (electroencephalography, EEG) and heart (electrocardiogram, ECG/EKG) activity. These electrophysiological measures are popular for clinical, research and hobbyist applications (such as brain computer interfaces). Most commercial systems are “medical grade” – these...... Listed under: **Medical – Health based Projects**

85. **Gas Leakage Detector using Arduino and GSM Module with SMS Alert and Sound Alarm**
We have published lots of interesting arduino projects like GSM based Fire Alarm System, Line Following Robot, RFID Based Access Control System and many other useful projects. This time, we are publishing a highly useful home application – Gas Leakage Detector using Arduino and..... Listed under: Sensor – Transducer – Detector Projects

86. Arduino and Python

Talking to Arduino over a serial interface is pretty trivial in Python. On Unix-like systems you can read and write to the serial device as if it were a file, but there is also a wrapper library called pySerial that works well across all operating..... Listed under: Other Projects

87. Calibration

This example demonstrates one technique for calibrating sensor input. The board takes sensor readings for five seconds during the startup, and tracks the highest and lowest values it gets. These sensor readings during the first five seconds of the sketch execution define the minimum and...... Listed under: Sensor – Transducer – Detector Projects

88. Arduino Resistance Data Logger

I was working on a project were I needed a cheap and efficient way to log the changing resistance of a sensor while simultaneously logging the temperature. This project is similar in many respects to the other data loggers on my site. Three prototypes have...... Listed under: Memory – Storage Projects

89. DS1631 – Arduino Code and Temperature Validation

Basic information The DS1631 is a low cost, I2C interface digital thermometer popular in the maker community. Capable of providing 12-bit temperature readings over a -55°C to +125°C range. I have need for a digital thermometer in many of my projects and thought it would...... Listed under: Temperature Measurement Projects

90. Live Action MATLAB – Arduino data logger

Background I was in need of an affordable data logger for a project. I have access to MATLAB on all of my machines so it was an easy choice to build an Arduino based data logger that would easily interface with MATLAB R2014a. MATLAB is...... Listed under: Memory – Storage Projects

91. Dented Joystick

Goals: The project goals are: Adjustable number of detents Adjustable force threshold Software controlled damping Implementation: A brief overview: The team's design utilizes several components: Arduino Leonardo, Fingelli L16-50-35-12-P actuators (2x) FSRs (4x) TI L293D H bridge MSU Eagle custom PCB print .... Listed under: Medical – Health based Projects

92. Staircase Meets Piano

In November 2014, we displayed our first completed project as a club, the Staircase Piano. The idea for the project was given to us by Professor Barry Brown before the club was even formed. Throughout the semester we worked towards putting the piano together for...... Listed under: Arduino Programmer Projects
93. **LTD SMRT Project (Safe Monitored Rider Transit)**

The proposed new LTD public transportation system uses people counters on the bus system to get an accurate measure of rider tendencies across different routes at specific times. Each bus will be equipped with two sensors which will generate numeric data no larger than 4...... Listed under: Development Board – Kits Projects

94. **NodeMcu arduino interfacing project**

A guide to getting started with the ESP8266 with the Arduino IDE. This assumes that you have a NodeMCU type board with the Silicon Labs CP2102 USB to UART Bridge. These boards are convenient because they can be connected directly to your computer for programming...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

95. **Using an Arduino as a Latching Relay**

I wrote this one hot week in July 2010. I've been leaving my front door ajar, to get some air through the house. Probably not a very good idea. So I thought I'd hook up an Arduino to ensure that no one takes advantage of...... Listed under: LED Projects

96. **Arduino-based Graphical Heart Rate Monitor**

Introduction: Like many out there, I enjoy a good exercise session, whether it be indoors or outdoors. As part of that I purchased a Polar branded heart rate monitor, which came with a “Wearlink” chest strap and RS300Xsd receiver watch. The watch is able to...... Listed under: Medical – Health based Projects

97. **High-Power Control: Arduino + TIP120 Transistor**

Up until now, we have talked about working with a lot of low-power devices. Sensors, LEDs, ICs, and the like are all capable of being powered directly from your Arduino, but as many awesome 5 and 3.3v components as there are, eventually you will find...... Listed under: Sensor – Transducer – Detector Projects

98. **SunAir Solar Power Controller for Raspberry Pi and Arduino**

Ever wanted to build your own Solar Powered Raspberry Pi or Arduino system? SunAir and SunAirPlus are 3rd Generation Solar Charging and Sun Tracking Boards designed by Dr. John C. Shovic at SwitchDoc Labs. You can use this board to power your projects and add...... Listed under: Solar energy projects

99. **Using Arduino and Pd for musical live performance**

Connecting an Arduino microcontroller to Pd is no big problem: You can just put Firmata on your Arduino and use the Pduino library for communication on the Pd side. But sometimes Firmata is not the answer to every problem: You may want to turn on...... Listed under: Sound – Audio Projects

100. **Lab 8: Shift Register and Binary**

Topics: First Build The Circuit The Code Hardware Theory Overview-“Rollover Rollover” What is a Shift Register How the Arduino Controls the Shift Register Software Theory The shiftOut Function Binary Numbers Other Functions in the Code Exercise References 1.
101. **Knock Detector**

Introduction For the third assignment, we decided to make a ‘knock-detector’ that is capable of informing the user/owner of specific events. We designed our system such that it can detect both casual knocks and knock patterns. Casual knocks could be used to inform the owner/user..... Listed under: **Sensor – Transducer – Detector Projects**

102. **Arduino Yun SBC adds Wifi and Linux to Leonardo features**

[Updated Sep 30] — Arduino announced the first open source Arduino hacker board with built-in WiFi, and also the first to run Linux. The $69 Arduino Yun integrates the functions of an Arduino Leonardo, featuring an Atmel ATmega32U4 microcontroller and 14 GPIO pins, with an..... Listed under: **Wifi – WLAN Projects**

103. **Internet Datalogging With Arduino and XBee WiFi**

Introduction Are you looking to get your data gathering project hooked into the "Internet-of-Things"? Then check out data.sparkfun.com! It makes posting data to the web as easy as constructing a URL and POSTing it to a server. I wanted to create a quick project to..... Listed under: **Wifi – WLAN Projects**

104. **Tutorial 18: Two Wire Arduino Knight Rider**

This tutorial shows how to interface eight LEDs to an Arduino using only two Arduino pins. This is made possible by using a PCF8574 I/O expander IC. A “Knight Rider” display is shown on the LEDs. Prerequisites Complete tutorial 4 – Arduino Knight Rider. Be..... Listed under: **Interfacing(USB – RS232 – I2c -ISP) Projects**

105. **Weather Monitor**

This Instructable shows you how to build a micro-controller based weather monitoring device. Built on the Arduino Uno board it can easily be extended and modified should you have additional sensors at hand. Main requirements: – Measure temperature (accuracy +/- 0,5 degree Kelvin) – Measure...... Listed under: **Home Automation Projects, Metering – Instrument Projects, Sensor – Transducer – Detector Projects, Temperature Measurement Projects**

106. **Tutorial 15: Arduino Serial Thermometer**

The Arduino reads temperature from a MCP9700 temperature sensor IC and displays the temperature in the Arduino IDE serial monitor window. Also see the Arduino LCD thermometer tutorial (tutorial 14). Prerequisites Complete Tutorial 9: Using the Arduino Serial Port before attempting this tutorial. Components Besides...... Listed under: **Sensor – Transducer – Detector Projects**

107. **Speech Controlled Quadropod**

This is my first post on Instructables and I am super excited to share my knowledge! My original robot post is here: Spryo SpoonTail which is just my robot showing some tricks but with a tethered control. In this Instructable I am going to show...... Listed under: **Bluetooth Projects, Robotics – Automation Projects**
108. **DIY Low Cost Arduino Mobile Development Platform**

I have wanted to build my own robot for awhile now. But after many tried and failed attempts, I was losing hope that may ever happen. I discovered that there wasn't a small, robust, super easy to add-on to, robot that was within my budget to...... Listed under: Development Board – Kits Projects, How To – DIY – Projects, Phone Projects

109. **APR9600 Voice Recording and Playback System with JRC286D Chip ICStation Mega 2560 Compatible Arduino**

ICStation team introduce you this APR9600 voice recording and playback system used in elevator based on the ICStation Mega2560 compatible with Arduino. It uses DC5V voltage to work. When you press the different keys, the loudspeaker will sound that which floor you arrive. This design...... Listed under: Sound – Audio Projects

110. **Making the TFF: a dress that gets excited when tweeted**

The idea of this dress comes from a series of tweets with online friends @shineslike and @arduinogirl. @shineslike and I had taken a half day Arduino workshop given by @arduinogirl at the MCN 2011 conference. I was immediately inspired creatively by the sensory and interactive opportunities...... Listed under: Game – Entertainment Projects, Home Automation Projects, Internet – Ethernet – LAN Project Ideas, Sound – Audio Projects

111. **Ultrasonic Dimmer**

I have been working on this project for a while and whilst it is still under development I decided to write a short guide after several requests to do so. The dimmer uses an interrupt driven XL-Maxsonar EZ1 ultrasound range finder to measure the distance...... Listed under: Sensor – Transducer – Detector Projects

112. **Control Two LEDS with an Arduino and bitVoicer**

So what I want to do here is do several things with two LEDs with speech recognition I'm using bitvoicer you can get it here Step 1: Part List So I'm doing this with as little parts as I can, here's the list: Green LED...... Listed under: LED Projects

113. **How-to Guide**

In this section we will explain exactly how you can create your own Amblone setup, consisting of 3 RGB LED strips and an Arduino Mega. What do I need? To create the Amblone setup described in this guide, you will need the following: Amblone software...... Listed under: LED Projects

114. **Talking Pumpkin**

So my boss came to me one last week and said he wanted to scare the trick-or-treaters who came to his home, and the kids who would come to work during a special Halloween Walk the community does. Thus was born the talking pumpkin. In...... Listed under: Game – Entertainment Projects, Home Automation Projects, PWM Projects, Sensor – Transducer – Detector Projects, Sound – Audio Projects

115. **Basics of Turning your Remote Controll Vehicle into an Autonomous System (Drone) Using an Arduino**

I began this project with the objective of cheaply turning my RC helicopter into something of a UAV or at least to fit some sensors to reduce collisions and other “mis-haps.” Now unfortunately at the beginning of the project i miscalculated my little helicopter's lift......
Hello Everyone. This is my very first Instructable so please go easy on me. This was more or less a test project to see if my new arduino board worked. Any friendly advice will be greatly appreciated so my future posts can be even better.

Welcome to my FIRST instructable, i will show you how to connect a 16×2 lcd display to an arduino, follow these simple step by step instructions and you will have it done in no time. Tools Needed : Soldering Iron Wire Strippers Pliers...... Listed under: LCD Projects, Projects

Hey, I am a big fan of Instructables. I have consistently used it for the past 3 years and now its time for me to write one myself. Here we go. This instructable is for those who want to make some inanimate object tweet automatically. Like say for...... Listed under: Wireless Projects

This instructable describes how a simple but powerful webserver used for controlling of home appliances can be done. The hart of the circuit is the ATmega328 microcontroller. I have chose this because I wanted to use all available Arduino libraries compatible with them. The Ethernet...... Listed under: Home Automation Projects

You've bought your first Arduino or you're planning to get this great little device? Obi Wan would say: “That's good. You have taken your first step into a larger world.” Same thing for me! Congratulations! You'll see, as soon as you master the basics, you'll...... Listed under: Internet – Ethernet – LAN Projects

News: In this latest months I've made some important xes and improvements to the code and to the webserver of the project. See datura_mega_v19.ino for the latest code. The most functional project over internet – Use it as a complete irrigation system for your garden,...... Listed under: Home Automation Projects

This example shows you how to read an analog input on Pin 0, convert the values from analogRead() into voltage, and print it out to the serial monitor. Circuit: image developed using Fritzing. For more circuit examples, see the Fritzing project page Connect the three wires from...... Listed under: Metering – Instrument Projects, PWM Projects

123. Firefighting Robot
For my project I created a robot with an attached water cannon. My mentor and I built it in a budget of around $300 (not including the necessary equipment), and it functions quite well. For the motors we used drill motors, powered by the 18...... Listed under: Robotics – Automation Projects

124. An animation inside a water drop by Physalia

2000 pictures compose this piece- that is, 2000 perfect different water drops into which we mapped an animation. Droplets that behave and look strangely similar at the stage of less entropy, and become more disorderly as they splash. The final result of the piece you...... Listed under: Video – Camera – Imaging Projects

125. Arduino Alphabet

This project is very interesting because it shows the sequence of all letters of our English alphabet. That is, the project generates capital letters from the A to the Z based on Arduino code and showed by an alphanumeric display. I'm using a common cathode...... Listed under: How To – DIY – Projects, LCD Projects

126. Arduino based Tic Tac Toe with TV Remote

This was my first time attending the Internet of Things Pune Group. It was such a fun learning experience! At today's meetup, Dhiraj and Nishant started out by introducing the InduinoX and Arduino Uno boards along with the Processing IDE that is used to write...... Listed under: Wireless Projects

127. RaspiDuinoRover – (Yet another) iPhone driven moving Raspberry Pi and Arduino rover

Architecture RaspiDuinoRover is made of three main parts: A Raspberry Pi which receives commands from a remote device through a TCP connection, and sends these commands to an Arduino Uno through an I2C connection. The same TCP channel is used to send back the remote...... Listed under: Wireless Projects

128. Hear your plant make music! – Ethernet version

This walk-through will show you how to build a sensor to monitor your plant's environment and use Stats in Sound's ERC-20 app to turn this data into music, allowing you to listen to your plant's reaction to it's environment. For more information on this project,...... Listed under: Internet – Ethernet – LAN Projects, Sound – Audio Projects

129. Autonomous drone that you already have in your pocket!

In this tutorial i want to learn you something, maybe change your mind. And make autonomous drones available for everyone. Simple question is: What do you need to make your drone autonomous?. Answer: – GPS – Accelerometer – Gyroscope – Telemetry wireless system – ..... Listed under: Phone Projects

130. TiltKey- Write by Tilting

The TiltKey is a keyboard input device based on tilting. Based on the angle that it is tilted at, and the direction it is tilted in, you can write every letter of the alphabet, every number, and every symbol found on a standard US keyboard...... Listed under: Sensor – Transducer – Detector Projects

131. Gesture controlled robot using Arduino
This gesture controlled robot uses Arduino, ADXL335 accelerometer and RF transmitter-receiver pair. We will divide the entire robot into 3 parts the transmitter, the receiver and the robot. The different gestures that have been mapped to the direction of the bot are: Hand parallel to the ground-stationary.  

Listed under: Robotics – Automation Projects

132. Fading an LED off and on using Arduino  

Demonstrates the use of the analogWrite() function in fading an LED off and on. AnalogWrite uses pulse width modulation (PWM), turning a digital pin on and off very quickly, to create a fading effect. Circuit Connect the anode (the longer, positive leg) of your LED to digital output pin 9 on your.  

Listed under: LED Projects, Projects

133. Computer controlled RC car with two Arduinos  

Required Parts: This project requires two Arduino boards which can be bought from http://www.adafruit.com/category/17 This project uses two Arduino Uno compatible boards. An L293D or other Dual H-Bridge Motor Driver chip will be needed to drive the motors of the RC car. This can be.  

Listed under: Game – Entertainment Projects

134. RC MOOD LYTE  

RC MOOD LYTE is a commercial quality flameless light engine for heavy, everyday use in the home, restaurant, catering and hospitality industry, a great improvement over the traditional wax candles in terms of safety and reliability features. LED Candles have No wax, No smoke.  

Listed under: LED Projects

135. Arduino Lilypad powered shoes for the visually impaired  

Anirudh Sharma, an IT Engineer from Rajasthan Technical University has developed a system that offers non-obtrusive navigation for the visually impaired. Calling it Le Chal (Hindi for ‘Take me there’), Sharma conceptualized and demonstrated the system at MIT (Massachusetts Institute of Technology) Media Lab.

136. Using an Arduino Uno R3 as a Game Controller  

Naturally, the Uno does not natively support keyboard strokes, unlike it’s Leonardo brother. Most of Google will tell you you need to do some firmware workarounds and ATMEGA reprogramming just to get it working and the entire ordeal is a mess. If you’re like me,  

Listed under: Game – Entertainment Projects

137. Hard Disk Clock (HDD Clock with Arduino Uno)  

This is a fun project that can be done easily and also cheaply. In this instructable we will explain step by step how to make this beautiful POV clock. Used material: Arduino Uno, RTC modul, ULN 2003, IR diode and IR transistor (used like a.  

Listed under: Clock – Timer Projects

138. Home Automation Using Arduino & Autohotkey  

It’s been awhile since I last posted something here. Was kinda busy with my university exams & all! Idea for this project was in my mind for very long & I don’t think anyone would’ve done this project with Autohotkey! Anyway, this is a necessity.  

Listed under: Home Automation Projects
Greetings! I'm Russell Petersen. I'm an engineer, inventor, designer, fabricator, and dreamer. I’m a junior Electrical Engineer by trade, located and working in the San Francisco Bay Area. I love playing with Solid State Lighting, and came up with this idea one night. Simply stated,...... Listed under: LED Projects

FTDI Vinco USB Host/Device Development Platform – also for Android & Arduino

FTDI has announced its commitment to supporting the Android Open Accessories initiative, thus allowing engineers to realize exciting new system designs that are compatible with tablets and smartphones utilising the highly popular Android operating system. “FTDI is very excited about the new Android Open Accessories...... Listed under: Phone Projects

Microcontrolled Farm Equipment

Modified BaleScoop(for picking hay bales out of the field) from manual levers to arduino controlled functions. This eliminates the need for 3 sets of hydraulic hoses to only one set and operator can focus more on where they are going rather then controlling the implement. This is set...... Listed under: Other Projects

Turn your Arduino into a Magnetic Card Reader

Everyone has used a magnetic card reader, I believe. I mean, who carries cash these days? They’re not difficult to get your hands on, either, and during a trip to my favorite local electronics shop, I found a bin full of these guys. So....of course,...... Listed under: Memory – Storage Projects, Projects

Arduino PID Motor Controller

INTRODUCTION : The development of high performance motor drives is very important in industrial as well as other purpose applications. Generally all high performance motor drives use quadrature encoders and PID control because of its simplicity and precise control. The quadrature encoder acts as a...... Listed under: Motor Projects

ZIF socket Arduino-compatible board

In this tutorial we make an Arduino-compatible board that holds the microcontroller in a ZIF socket. Updated 18/03/2013 Today we are going to make a different type of Arduino-compatible board, one that has a ZIF (“zero insertion force”) socket. Our reason for making this is...... Listed under: Development Board – Kits Projects, Projects

Bootload an ATmega Microcontroller & Build Your Own Arduino – 2

Since you lacked the USB interface in your own Arduino board, it becomes necessary to use a homemade/ready-made USB to Serial Converter Module as an efficient and economical solution. Inexpensive and easy-to-use USB to Serial Converter modules are now widely available, such as one shown...... Listed under: Interfacing(USB – RS232 – I2c -ISP), Projects

Simple Remote Data Plotting using Android / Arduino / pfodApp

Simple Remote Data Plotting using Android / Arduino / pfodApp This Instructable shows you how to plot Arduino sensor data on your Android mobile and capture it for later downloading to your computer. These instructions are also available at www.pfod.com.au No Android programming is required...... Listed under: Arduino Android, Arduino Programmer Projects, Phone Projects
How To Make a Simple Variable Frequency Generator Using Arduino

A frequency generator is a very handy device in electronic design, development, testing and trouble shooting. It is such a kind of device which can generate the required frequencies which can be then applied directly to the target device for testing it. There are frequency...... Fun Hackable Speaker Timer

This is a fun speaker timer I made for some upcoming conferences. It uses a 4-digit charlieplexed LED (pseudo 7-segment) display and is driven by a AVR ATmega328 or an Arduino. It allows a default time to be set, can be paused, and will put...... Listed under: Clock – Timer Projects

How to Build a Vibration Detector Circuit

In this project, we will go over how to build a vibration detector circuit. This is a circuit which can detect and measure flex, touch, vibration, and shock. The sensor we will use to detect these movements is a piezo vibration sensor from Measurement Specialists (MEAS). The...... Listed under: Sensor – Transducer – Detector Projects

Control an iPod with the Arduino

This tutorial will describe a way of controlling an iPod remote, and thus, an easy way of getting some music and sound out of your Arduino project. The remote we used was an unofficial remote I found on the worldwide auction site for around 10...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Phone Projects, Projects

DIY: Arduino Based Ohmmeter

This is a project based on Arduino board which can measure the unknown resistance values and perform diode test and continuity testing. When we connect the unknown resistor on the breadboard circuit, the 16×2 LCD displays the resistor value and when we connect a diode...... Listed under: LED Projects

Arduino Powered Four Letter Word Generator

Build an Arduino-powered version of the “Four Letter Word Generator” (FLW). This version generates “words” on the fly – it does not use a list. The “original” version from the 1970’s used B7971 nixie alphanumeric tubes. These tubes are getting hard to find and they’re...... Listed under: Game – Entertainment Projects, LED Projects, Projects

HSM-20G Interface with Arduino Uno

The HSM-20G is an analog humidity and temperature sensor that outputs analog voltage respects to relative humidity and temperature. However from this sensor relative humidity is found along with temperature. Relative humidity is the percentage of
moistures of airs for a particular temperature [1]. Feature…… Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

154. Real-time room temperature on your Website using Arduino

This is how to push high resolution real-time data from Arduino-based temperature sensor to your web page without any server-side coding. Arduino is a great device for collecting, storing and transferring data from various sensors but there are times you need to make your data…… Listed under: Home Automation Projects, Internet – Ethernet – LAN Projects, Projects, Sensor – Transducer – Detector Projects, Temperature Measurement Projects

155. How To Make a PC Control Robot

Do you ever tried to control your robot using your PC or laptop? Controlling a robot using PC or laptop is often being a fun for the student or hobbyist. Thus during this article you will be tend to learn how to control your robot…… Listed under: Robotics – Automation Projects

156. PSoC 4 Pioneer Kit Community Project#042 – Hangman Game

Hello! It has been our Friday tradition for the past few weeks to end with a game. This week we have the Hangman game. In this game the user will be using two Pmod boards, an LCD and Button board to display outputs and generate...... Listed under: Game – Entertainment Projects

157. Build a big crane game using Arduino

How to build a whole room crane game. Based on the arcade style ‘Crane Game’ or ‘Claw Machine’. This is a continuation of a previus instructable titled CRANE GAME in which we built a 2-axis crane game in a door frame. We have now added a third axis and...... 192. **RS-232**

In this tutorial you will learn how to communicate with a computer using a MAX3323 single channel RS-232 driver/receiver and a software serial connection on the Arduino. A general purpose software serial tutorial can be found here. Materials needed: Computer with a terminal program installed...... Listed under: **Development Board – Kits Projects**

193. **Arduino (optic fibre)**

I just brought a new lamp and after a week, I'm tired of looking at it randomly change colours between red, blue, green. What can you expect from a cheap lamp brought at $5. Looking at the lamp I realized that I could make...... Listed under: **Home Automation Projects, LED Projects**

194. **Arduino 2.4 GHz Spectrum Analyser**

This article describes a simple spectrum analyser for the 2.4 to 2.5 GHz Wi-Fi band. It's based on the Cypress CYWM6935 Wireless Radio Module. Although the manufacturer doesn't recommend it for new commercial projects, it is still widely available from eBay suppliers and Farnell here...... Listed under: **LCD Projects**

195. **Arduino Laser Show (adapted from NothingLabs' Instructable)**

This project uses an Arduino, a pair of speakers, and a laser pointer to create a laser projector able to trace out designs in a dark room. To power it, I've cannibalized a PC ATX power supply capable of delivering plenty of current for the...... Listed under: **Game – Entertainment Projects, LED Projects**

196. **Daox's diy arduino thermal differential controller**

We have a great thread that contains lots of info on thermal differential controllers here. However, I wanted to start a thread dedicated to my own development of a thermal differential controller that I'll be using for my attic heat reclamation project. Tonight I setup...... Listed under: **Sensor – Transducer – Detector Projects**

197. **A Simple Bat Detector based shield for the Arduino Uno**

I've built a number of projects that have interfaced the output of the Simple Bat Detector with a microprocessor. The most recent was the BatLogger II. But I hadn't come up with an easy way for others to experiment with this idea ... until now...... Listed under: **Interfacing(USB – RS232 – I2c –ISP) Projects**

198. **How to make (and connect) a soft potentiometer**
This instructable will tell you how to make and connect a soft potentiometer to a microcontroller, in particular we will connect it to a Lilypad Arduino. In our case soft potentiometer means a potentiometer made of a textile conductive ribbon. What you need: 1. soft..... Listed under: Metering – Instrument Projects

199. **Arduino UNO Tutorial 8 – NightLight**

In this Arduino UNO tutorial, we are going to use a Light Dependent Resistor (LDR) to create a simple childrens bedroom nightlight which turns on automatically when it gets dark and turns off when it gets light. An LDR's resistance changes depending upon the amount..... Listed under: Sensor – Transducer – Detector Projects

200. **1 LED Game with Arduino Uno and an RGB LED**

Sometimes I just have those days where I really want to make something neat with the Arduino I have lying around, but I know I don't have the patience for a more involved project that'll take more than a day or so. This is for...... Listed under: LED Projects

201. **LED aquarium lighting with an Arduino based PWM timer**

I bought a small aquarium (54l) as an impulse buy and I needed some lights for it, so naturally I wanted to use LEDs. I also needed a timer for the lights. I also wanted the lights to fade in and out when they were...... Listed under: LED Projects

202. **Ground Tracking LED Longboard Mod**

This mod uses a custom designed encoder on one of the wheels to track where the longboard is on the ground and light up the LEDs so that the light pattern remains stationary on the ground as the board moves over it. To make doing...... Listed under: LED Projects, Sensor – Transducer – Detector Projects

203. **Arduino Clock using Standard Clock Display**

This is a relatively simple clock to build, in terms of the hardware required and in terms of hooking up all the wires. The complexity lies in the software, which I've conveniently included as part of this instructable. This instructable illustrates a few things...... Listed under: Clock – Timer Projects, Projects

204. **Getting Things to Talk: Arduino + LCDs**

I spent the better part of the day on Saturday doing some more basic research into connecting an Arduino and LCD for this ongoing project. For the most part, it's pretty basic and following the wiring diagrams and tutorials online is fine. I ran into...... Listed under: LCD Projects

205. **Arduino ISP – LOG**

Arduino ISP – LOG So this Lazy Old Geek (LOG) has had a lot of trouble getting Arduino bootload on Atmega chips. I couldn't get either of these to work with Arduino UNO Rev3. http://arduino.cc/en/Tutorial/ArduinoISP http://letsmakerobots.com/node/35649 So I developed a couple that worked for me:...... Listed under: Arduino Programmer Projects

206. **Home Automation with Android and Arduino Yún**
The Arduino Yún is a WLAN capable development board featuring an ATmega microcontroller, as well as a separate chip running a small Linux distribution, making it a perfect candidate for home automation projects like in the picture below! This basic tutorial will show you how...... Listed under: Home Automation Projects

207. Make an Atom Synchronised Clock from a 1950's Slave Dial using Arduino

One day while exploring the bric-a-brac at the markets, I stumbled across an old, Bakelite slave dial from the 1950's. Slave Dials are clock movements without the actual time keeping circuit. All they contain is the mechanism to drive the hour and minute hands, which...... Listed under: Clock – Timer Projects, Projects

208. Make Electronic Dice using Arduino

In this project we make electronic dice. Updated 18/03/2013 In this article you can learn how to make an electronic die (die is the singular of dice), using an ATmega328 with Arduino bootloader and a few inexpensive components. The reason for doing this is to introduce another...... Listed under: Other Projects, Projects

209. Knob

Control the position of a RC (hobby) servo motor with your Arduino and a potentiometer. This example makes use of the Arduino servo library. Hardware Required Arduino Board (1) Servo Motor (1) Potentiometer hook-up wire Circuit Servo motors have three wires: power, ground, and signal...... Listed under: Motor Projects

210. Prototyping shield for Arduino Mega

This is a down and dirty prototyping shield that will work for Arduino Mega's and there pin compatible clones. This is the first time i have made this board, but i have other projects i think this would be handy for. [box color=#985D00 bg=#FFF8CB font=verdana]..... Listed under: Development Board – Kits Projects

211. LED Sun rise/set Arduino Proj

I've been slowly working on this project for the past month or so. I finally have some time to share and post-up what I'm working on. I know there are commercial products available, but then what's the fun in that! What I want is a...... Listed under: LED Projects

212. Orange mePod

Firstly, why would I make a music player when one can be purchased for so little and Apple iPods are so great? Well, I'll tell you. After several cheap MP3 clones have died due to their Lipo batteries and my cracked, inoperable screen on my...... Listed under: Sound – Audio Projects

213. Remotely Controlled VGA Camera – Overview

The idea behind this project was very straightforward: design an inexpensive remotely controlled system capable of taking still pictures and uploading them to a remote file storage with a camera to be activated by either remote commands or sensor events. And after numerous brain storms...... Listed under: Wireless Projects

To all other teens (I'm 16) who have begun to pick up an interest in robotics and electronics the following project will give you a great user-system to get started with. This is not for complete beginners, but after only 6 months of teaching myself...... Listed under: Projects, Robotics – Automation Projects

---

215. **DIY Thermal Differential Controller – Part 4: Building Your Own**

In our last episode, I explained how I redesigned the controller from what I first thought I was going to do. Now, I am going to explain how to make your own thermal differential controller based on mine. As it is, this setup will only...... Listed under: How To – DIY – Projects

---

216. **CustomKeys using an Arduino**

CustomKeys is a customizable, Arduino-based, polyphonic synthesizer. The CustomKeys keyboard uses capacitive touch sensing – each key is made of a conductive material which, when touched, signals the synthesizer to emit a tone from the speaker. The CustomKeys library allows the user to choose an...... Listed under: Projects, Sound – Audio Projects

---

217. **Nerd++: Controlling Dioder RGB LED Strips with Arduino, Pt. 1 – Getting Started**

A few weeks ago, it came to my attention that IKEA do a set of colour-changeable LED strips. I've been looking for a decent way of providing some lighting behind my computer to reduce eye-strain for a long time, and these seemed perfect: I was...... Listed under: LED Projects

---

218. **DIY- G-force measurement system**

So this time around, it's another fun and functional microcontroller based DIY, a g-force measurement system with data logging to SD card. HARDWARE USED: 1) Arduino UNO w/ATmega328P 2) 3-axis accelerometer breakout 3) SD card 4) SD card breakout w/level shifting circuit 5) LED HOW...... Listed under: Game – Entertainment Projects, How To – DIY – Projects

---

219. **Autonomous Robot Part 3: Ghosty**

Introduction Ghosty is an autonomous little robot who is adventurous and loves to explore his surroundings. However, unlike a normal ghost, he doesn't like to scare people. Instead they actually scare him! In our most current version of Ghosty, his vision line is based on...... Listed under: Motor Projects

---

220. **Animatronic Stargate helmet using Arduino**

I love the movie Stargate and when I first saw it I immediately knew I wanted to make one of the super cool Horus guard helmets. I had sketched multiple designs over the years and figured out several different methods for building it but rejected...... Listed under: Game – Entertainment Projects, Home Automation Projects, Projects

---

221. **Arduino BiCMOS Curve Tracer**
Draw curve traces for both Bipolar and CMOS transistors using this hardware and free online software. Step 1:
UpLoad and Plot Curve for NPN, PNP, NMOS, and PMOS The data for the transistor curves gets uploaded into any
computer and can be plotted using SciLab.****

222. **Arduino Laser Security Shield**

*** I AM THIRTEEN. I REALLY ENJOY PUTTING TOGETHER THESE INSTRUCTABLES. PLEASE SHOW SUPPORT BY VOTING
FOR ME IN THE LASER CUTTER CONTEST – http://www.instructables.com/contest/epilog3/**** I started thinking about
this project a couple of months ago now. A laser tripwire that can log when the...... Listed under: Projects, Security –
Safety Projects

223. **Arduino-based AVR High Voltage Programmer**

Update 01/02/09: A PCB version of this circuit is in the design stages – some preliminary information is here. Update
03/11/09: Kits based on this design are now for sale! Update 12/14/10: The original AVR HV Rescue Shield kit has been
replaced by the new...... Listed under: Arduino Programmer Projects

224. **SP0256-AL2 Speech With Arduino**

Here’s the Arduino version of a project to use the General Instruments (GI) SP0256-AL2 vintage speech synthesis chip
to say “hello world”. I’d previously shown how to do this with a Basic Stamp 2. Here’s what it sounds like saying, “hello
world” 20101215_164333.mp3 How it...... Listed under: Development Board – Kits Projects

225. **Robot shield for Arduino. Part 1 – Hardware and Schematic**

The idea behind this post is to bring together some robot designs and trasform them in a new device with new
hardware and standard software (arduino of course) and so easier to use. These robots have three things in common:
a mechanical structure, the hardware...... Listed under: Robotics – Automation Projects

226. **Si4707 Hookup Guide**

Introduction Weather-band radio is an awesome public service provided in the US, Canada, and Bermuda. With
hundreds of transmitting stations dotting the country, weather radio acts as the “voice of NOAA” (National Oceanic
and Atmospheric Administration). In addition to spouting out weather forecasts, weather radio...... Listed under:
Development Board – Kits Projects

227. **Arduino UNO Tutorial 6 – Rotary Encoder**

We have written a tutorial for Rotary Encoders using a Microchip microcontroller but now would be a good time to
make an Arduino UNO version. With a rotary encoder we have two square wave outputs (A and B) which are 90
degrees out of phase...... Listed under: Other Projects

228. **Arduino LEDs**

Description In this tutorial you will set up and turn on a single LED. Note that this code can actually be executed with
just the Arduino and no other components as in Figure 5. If you notice, next to pin 13 is a tiny LED...... Listed under:
LED Projects
229. **Arduino Leonardo AVR Development Board**

Arduino Leonardo AVR Development Board is a microcontroller board based on the Atmel ATmega32u4. It offers 20 digital IOs (of which 7 can be used as PWM outputs and 12 as analog inputs), a 16MHz crystal oscillator, a micro USB connection, a power jack, an... Listed under: Development Board – Kits Projects

230. **Android Phone Controlled Robot using Arduino**

The Android phone that stays in your hand most of the time is useful in many other applications apart from Whatsapp, Facebook; appliances; monitor your health parameters. How it would be if it can control a Robot, which can assist in your daily work. With...... Listed under: Phone Projects, Robotics – Automation Projects

231. **Sending MIDI Messages**

Introduction If you completed any of the buzzer projects, you will know by now that there is much fun to be had in making the Arduino create noises. The only issue you might have had is with the quality of the sound. Since MIDI is...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

232. **Servo powered peristaltic pump controlled by Arduino**

This instructable shows you how to make a pump using a servo motor and an Arduino Uno to transfer small amounts of liquids. The pump is a peristaltic pump which consists mainly of a motor, flexible tubing and a circular pump casing. Two rollers attached...... Listed under: Motor Projects

233. **DIY Microscope**

This Project Is A Part Of The Afrimakers Event http://www.afrimakers.org/ Introduction We used a simple cheap webcam to make a microscope. In short, a small hack to the optics of a standard webcam with an adjustable focus-lens, allows to create video data, with a magnification...... Listed under: Video – Camera – Imaging Projects

234. **Temperature Sensor 2 0**

Overview This board allows you to use a thermistor to measure the temperature of something. It is designed to be used to measure things in the range of 100°C – 300°C, but with the proper calibration and resistors, it can be adapted to any temperature...... Listed under: Temperature Measurement Projects

235. **PhysComp: Mid-term Project – Instagram TUI – prototyping the interactive elements using Arduino**

The physical interface will consist of a 3×3 grid of push buttons that will correspond to a 3×3 grid of images in the Processing program. Instead of a creating a 2D array of variables to correspond to the buttons' postions in the grid, each location...... Listed under: Other Projects

236. **Perfboard Hackduino ($8 Arduino-compatible circuit)**

Never again will you have to dismantle a finished project just to reuse an Arduino board! This tutorial will go through the steps involved in fabricating your own Arduino-compatible circuit using just ~$8 of parts (this includes the ATmega chip!). This is perfect for installing...... Listed under: Development Board – Kits Projects
In this post I will describe the hardware and the software part of a project involving the use of BLDC (Brushless DC) motor salvaged from a broken XBox 360. This is a second installment in the series of posts related to Arduino and brushless DC...... Listed under: Motor Projects

A digital to analogue converter takes a series of digital inputs (a string of 1s and 0s, in our case there will be 8 of them like 10011001) and converts it into an analogue output. You see DACs in every digital audio device (MP3 players,...... Listed under: Sound – Audio Projects

Why make your own Arduino control system? After completing my homemade telescope mount it was powered by a Meade DS motor kit. This system was extremely slow, underpowered and unreliable. It was also impossible for me to change the programming or maintain the system. I...... Listed under: How To – DIY – Projects

The aim of our project is to be able to control a electrical switching process using a remote.The idea is to come up with an alternative to the conventional electric switch boards, using a wireless control mechanism, in an economic way.In other words, an...... Listed under: Wireless Projects

We are not the first to make an Motor Shield for Arduino. But could be that we are the first that make a Motor Shield with a minimum of flexibility. We are studing a WiFi robot with camera controlled by Arduino. The robot will be...... Listed under: Motor Projects

By this mobile controlled automation using Arduino you can perform switching operation of any load or device which is connected with the circuit. Before some days i posted about DTMF tone in mobile communication. Here i am using DTMF tone in this project. Visit following...... Listed under: Phone Projects

Introduction This page describes how to reflow solder surface mount printed circuits using a cheap toaster oven. It owes a great deal to Nophead's Cooking with Hydraraptor blog post. The picture shows Sally Bowyer (Director, RepRapPro Ltd) preparing components for soldering in the oven. For...... Listed under: Sensor – Transducer – Detector Projects

In this post we show you how to make a small and useful Arduino DMX512 controller, which can use by example to handle a smoke machine with DMX, or as test equipment, etc... We can use Arduino Mega, Arduino UNO, and other with small changes...... Listed
245. Control a Furby with Arduino (or other microcontroller)

The Million Dollar Furby: We can rebuild him. We have the technology. Continued from the previous Instructable where we excised Furby's primitive brain, it's now time to replace it with something greater. This Instructable will detail how to install a new microcontroller in place...... Listed under: Robotics – Automation Projects

246. Arduino Tri-colour LED Flasher Circuit

This simple tri-colour LED flasher circuit is great for beginners. The three pin tri-colour LED is controller by an Arduino Uno and changed between three colours. This video shows the Arduino running a sketch that controls the tri-colour LED. Circuit Diagram for the Arduino Tri-colour...... Listed under: LED Projects

247. Tutorial 19: Arduino Dice

In this tutorial you will build a dice that is shaken by holding the button in and thrown by releasing the button. The shake, throw and number thrown are animated and displayed on a seven segment display. A 74HC595 IC is used to interface the...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

248. Blink

This example shows the simplest thing you can do with an Arduino to see physical output: it blinks an LED. Hardware Required Arduino Board LED Resistor, anything between 220 ohm to 1K ohm Circuit To build the circuit, connect one end of the resistor to...... Listed under: LED Projects

249. Tutorial 4: Arduino Knight Rider

In this tutorial, eight LEDs are interfaced to the Arduino Uno board. This is not complicated – it is just like interfacing a single LED to the Arduino as done in tutorial 3, but eight times over. A program is then loaded to the Arduino...... Listed under: LED Projects

250. Tutorial 16: Arduino Clock

In this tutorial, the Arduino displays the time and date on a LCD (optional) and in the Arduino IDE serial monitor window. A PCF8563 real time clock (RTC) IC is used to generate the time and date. The time and date can be set using...... Listed under: Clock – Timer Projects

251. The Arduino Microprocessor Miniterm Project Pages: keattsds

Navigation LCD_driver.c LCD_driver.h LCD_driver.h.out ball12d.php bojia.c bojia.c.out chenb.php doyler.php ellwangerk.php foo.txt frickd.php gamblec.php hurleyg.php keattsds.php littletonj.php panuskip.php parsonstc.php schrodere.php Here is keattsds Bluetooth SNES Controller Supplies I used the following supplies for my mini-term
252. Magic Light (Capacitance Sensor, First Arduino Project)

This was my very first Arduino project. It’s great for beginners. Fade the color or the lights by moving your hands near it. It fades from a pretty purple blue to a fiery red-orange. Its was SUPER easy to build, not too hard to write...... Listed under: Sensor – Transducer – Detector Projects

253. Temperature Sensing using DS18B20 Digital Sensors

Note: When referring to Arduino below, this works in the same way on the emonTx which is arduino-based. The DS18B20 is a small thermometer with a built-in 12-bit ADC; it can be easily connected to Arduino digital input. The sensor communicates over a one-wire...... Listed under: Sensor – Transducer – Detector Projects

254. Arduino Tiny Relay Shield Project

In this Arduino project, you will build a small relay shield from stripboard. The shield can have one or two relays fitted to it. Connect the Arduino and relay shield to your PC via a USB cable. Download the PC software and use it to...... Listed under: Interfacing(USB – RS232 – I2c – ISP) Projects

255. Arduino Platform – Interrupts Introduction

Introduction This is my second article relating to the Arduino Microprocessor Platform. The first one was a simple implementation of the SIMON game using the Arduino. The article can be found here. For an introduction to the Arduino Hardware, see jeffb42’s excellent articles, as there...... Listed under: Development Board – Kits Projects

256. Open Source Home Automation Project using Arduino UNO + Ethernet Shield

This is Open Source Home Automation Project based on Arduino Uno and Arduino Wiznet based Ethernet shield. How Does it Work The main brain for this project is Arduino UNO Board along with Arduino Ethernet Shield to give it a wireless connectivity. Arduino runs a code...... Listed under: Home Automation Projects

257. Arduino Buzzer Circuit

This article and circuit diagram show how to connect a buzzer to an Arduino when the buzzer operates at a different voltage to the Arduino. The buzzer may operate at 9V, 12V or some other voltage. Arduinos such as the Arduino Uno operate from 5V...... Listed under: Arduino Programmer Projects

258. Thermal Camera: Arduino UNO + MLX90614 IR Thermometer

I did the following steps: 1) Hardware: Connect the MLX90614 (refer to the datasheet) as follows: Pin 1 on MLX (SCL) connect to ANALOG pin 5 on Arduino Pin 2 on MLX (SDA) connect to ANALOG pin 4 on Arduino Pin 3 on MLX (VDD)...... Listed under: Video – Camera – Imaging Projects
259. Arduino MicroBot Project

Steps On the breadboard, build two bi-directional motor control circuits (also known as “H-bridge”) circuits. These circuits will control the two DC motors that drive the wheels. Each circuit will have two wires from the Arduino (one for forward, one for backward) to control the...... Listed under: Robotics – Automation Projects

260. Blinkenlights

Topics: Overview Hardware A Basic Schematic Diagram Resistors Reading Resistor Values Putting it Together Trying it out! More on Resistors and LEDs Software Comments Variables Procedures References Project 1. Overview As mentioned earlier, Arduino consists of two major parts: the hardware (the Arduino board) and the...... Listed under: LED Projects

261. GPS and GSM based Vehicle Tracking System Using Arduino

This circuit is designed for tracking the location of vehicles. Most of tracking systems are made by using GPS. This is very simple and cheap. Tracking systems are mostly used by fleet operators for tracking a vehicle location, routing and others. This is a very good...... Listed under: GPS Based Projects

262. Real Time GPS Tracker with Integrated Google Maps

This project describes how you can build a mobile real time GPS tracker with integrated Google Maps. I began this project mainly to see if I can integrate all the different pieces of hardware and software to make a workable solution, and it took some...... Listed under: GPS Based Projects

263. ArduDroid: A Simple 2-Way Bluetooth-based Android Controller for Arduino

UPDATES October 30, 2013 – 7PM (GMT+2) The new official name for this app is ArduDroid and it can be installed from Google Play. I changed the name to avoid a naming conflict with another app. September 15, 2013: I Have won a Nexus...... Listed under: Bluetooth Projects

264. Build An Audible Memory Chest [Instructables How-To]

If you’re a fan of the Harry Potter series then we also bet you were pretty taken with Hogwarts headmaster Dumbledore’s pensive—the magical object that could not only store memories, but actually let people fall into and reexperience the events. This week’s Instructables How-To from...... Listed under: LED Projects

265. General Purpose Input Output Arduino Shield

This example shows technique for calibrating sensor input and shows the sensor outputs by controlling LEDs and SSD, also shows how to monitor the state of a switch. Hardware Required 8 LEDs 2 push button switches 2 sliding switches 4-SSD with MAX7221/7219 LM35 Speaker Circuit...... Listed under: LED Projects
266. **Stage 4: Complete Beginner’s Guide For Arduino Hardware Platform For DIY**

Contents
1. Background
2. Setting up Arduino Development Environment
3. Arduino Power Management
   3.1 Powering Up Arduino Board
   3.2 Output Power of Arduino
3. Indicators And Switches
   4.1 LED
     4.1.1 Working With Onboard LED
     4.1.2 Connecting and Controlling External LED
   4.2 Buzzer
   4.3 Switches

Listed under: How To – DIY – Projects

267. **Arduino project: USB foot-operated mouse switch**

This foot pedal plugs into the Arduino case which plugs into your PC via microUSB cable. Arduino microcontrollers can easily be used to power fun projects like robots and even sending tweets to Twitter but they’re versatile enough to turn up in the strangest of..... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

268. **Stream support for the Arduino MQTT library**

MQTT is a lightweight messaging protocol for the Internet of Things. This post details the use of Stream support for large payload storage in the Arduino MQTT library. MQTT is a lightweight protocol, but that doesn't mean that the payloads have to be small. The...... Listed under: Other Projects

269. **Technical Details of Logging Seawater Temperature**

Block Diagram
This diagram shows the basic components required for collecting temperature readings from seawater and transmitting the data to a base station where it can be collated into a database for analysis. To the left is a schematic of 10 temperature sensors, spaced 1...... Listed under: Temperature Measurement Projects

270. **Modifying an Arduino Mega and chipKIT Max32 for 5V Operation**

Max's Arduino Mega and chipKIT Max32 both require 9V external supplies, but he really wishes to power them from a single 5V supply. Well, nothing is simple, is it? I ran into a minor “gotcha” with regard to my Bodacious Acoustic Diagnostic Astoundingly Superior Spectromatic...... Listed under: Development Board – Kits Projects

271. **Arduino Projects: Wireless Arduino**

Long-time readers will know I'm not one to promote trendy marketing phrases and certainly ‘Internet of Things' or ‘IoT’ is right up there with the best (worst) of them. But the concept behind the phrase is worth understanding as it drives the next generation of...... Listed under: Wireless Projects

272. **Making a RFID Card Reader with Arduino Yún**

Surya Mattu is a creative technologist who loves to make things. He's based in NYC and working at ITP, a two-year graduate program exploring the imaginative use of communications technologies. Today he's sharing with us how feasible it could be to build an RFID-controlled entry...... Listed under: RFID – NFC projects

273. **Arduino Project 6: Web-controlled music player**

Our NetPlay project is built on a standard breadboard. In our previous Arduino masterclass we briefly introduced the Ethernet Shield an Arduino expansion board that adds Ethernet connectivity plus microSD card storage. We used that storage as the basis of a simple one-button digital audio...... Listed under: Other Projects
274. Simulating and controlling GE Color Effects Lights with Arduino

Overview This project builds a Christmas lights controller for the GE Color Effects lights allowing programmed control of up to 8 sets of Christmas lights. Furthermore, it provides a function specific language for programming patterns for these lights and an emulation environment for testing the...... Listed under: LED Projects

275. Arduino Project 8: Stompy the robot (part 1)

Our first Arduino robot called Rolly in our February issue proved to be a popular project. Powered by an Arduino Uno board it was easy to put together and cost very little. In this project we upped the ante again with our first walking robot...... Listed under: Robotics – Automation Projects

276. Tutorial: Arduino Motor/Stepper/Servo Shield – Part 1, Servos

This post starts a small (or larger?) series of tutorials using the Arduino Motor/Stepper/Servo Shield with the FRDM-KL25Z board. That motor shield is probably one of the most versatile on the market, and features 2 servo and 4 motor connectors for DC or stepper motors...... Listed under: Motor Projects

277. Communication between a USB/serial device and an AVR (atmega/Ardunio) microcontroller

I have a device which provides a USB port. If I attach it to a Windows PC it is recognized as a “CP2103 USB to UART Bridge Controller”. According to the device documentation, it should communicate in serial format at 38400bps. I have to talk to...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

278. Store Arduino data to Firebase database [Howto]

The last few weeks I was playing with Firebase mostly because I wanted to get familiar with this technology. So at some point I thought that it will be a great idea to connect Arduino with Firebase. Imagine that you have a simple temperature sensor...... Listed under: Temperature Measurement Projects

279. New Arduino Project: Spectrum Analyzer?

I've been reading a lot about receivers, and it sounds like one important thing is filtering. It makes sense too - simple receivers can suffer from front end overload due to a strong signal. And when on the ham bands, you never know where that...... Listed under: Development Board – Kits Projects

280. Arduino Projects: Digital Audio Recorder

Being able to capture sound, store it and play it over and over again never fails to leave me in awe of its pioneers, from Thomas Edison to Alan Blumlein, the British electrical engineer who, in 1931, invented ‘binaural recording’ – what we now call...... Listed under: Sound – Audio Projects

281. Indoor Weather Station using Arduino

Introduction In my first article using the Arduino 2009 board, I described a simple temperature sensor interfaced using Visual Basic. I have developed the board and Visual Basic code to give a fairly usable indoor weather station. Overall Operation The Arduino 2009 acts as a...... Listed under: Sensor – Transducer – Detector Projects
282. **Arduino Weatherstation**

At University, Alexander Zenger and I decided to realise a weatherstation with an Arduino Microcontroller. We wanted to measure temperature, pressure and humidity. It should also be possible to get every 5 min a value update on an external server. Our basic idea was to develop...... Listed under: Temperature Measurement Projects

283. **Arduino and Android Projects for the Evil Genius**

Since this book was written, Arduino 1.0 was released and Google has changed the Open Accessory standard a lot. At the start of December 2011 Arduino 1.0 was released. This changed a few things, requiring all third-party libraries to be updated. This hasn't happened yet...... Listed under: Phone Projects

284. **1B – Arduino Project – Perry the Predator Pillow**

The Team Kaitlin Schaer as scribe; Bryan Gardiner as tutor; Ruben Markowitz as designer; Anna Failla as integrator Introduction In a time where the logistics of sleep can be all too much to handle, there is a solution! There is a smarter pillow, a pillow that...... Listed under: Home Automation Projects

285. **Add a TFT Display to your Arduino projects (1.8 TFT SPI 128×160)**

In all my arduino projects I was using cheap 1602 LCDs mostly because... they are cheap but also of the libraries flexibility. Recently I found a nice TFT 1.8 inch 128×160 in a very competitive price and I thought to give it a go. Just...... Listed under: LCD Projects

286. **The E-Taster Assistance System with Lab-on-Spoon and Lab-on Fork as 'Electronic Tongues'**

Subject: Daily life activities of food preparation can be challenging for consumers due to restricted skills and experience, loss of perceptive abilities (accident/aging) or due to product fraud and contaminations, commonly summarized under the term of food adulteration, which are exceeding human perceptive abilities in...... Listed under: Wireless Projects

287. **Interfacing an Arduino with LCDs**

Introduction This is the second article in a three part series I am writing on the Arduino hardware platform. This article focuses on wiring an Arduino to a character LCD and a graphic LCD, and includes static and animated demos to show off the capabilities...... Listed under: Interfacing(USB – RS232 – I2c – ISP) Projects, LCD Projects

288. **Midi VU meter, LM3914, Arduino, PWM**

Hello everybody, I've been working on a midi controller for some time now, Midi OUT hasn't been a problem, but for Midi IN I had to take some more time. I've used this circuit for midi input but I've used a 4n25: original thread @...... Listed under: Metering – Instrument Projects

289. **Arduino Event-Driven Universal AV Remote**
TL;DR – I wanted all of my AV components to turn on and change inputs as soon as I started Airplaying music to my Apple TV from my iPhone, so I popped open the Apple TV, wired up a photocell sensor to an Arduino Uno,...... Listed under: Wireless Projects

290. Android Arduino Communication through Modbus and Rs485

In this post I'd like to describe you a project I'm working on that consists of connecting an Android development board to one (or more) Arduino slave(s) using modbus protocol and rs485. Even though the idea of this project could be applied in many fields,...... Listed under: Development Board – Kits Projects

291. Safe and simple AC PWM Dimmer for arduino / Raspberry pi

Dimmer With MOSFET This circuit shows that dimmers intended for use at mains voltage do not always have to contain a triac. Here, a MOSFET (BUZ41A, 500 V/4.5A) in a diode bridge is used to control the voltage across an incandescent bulb with pulse-width modulation...... Listed under: PWM Projects

292. Arduino Distance Detector with a Buzzer and LED's

This is a simple guide on how to make a distance detector using an Arduino, a HC-SRO4 Ultrasonic Sensor, a Buzzer, and some LED's. The ultimate goal of this tutorial is to use the buzzer and LED's to display how far the object is from...... Listed under: LED Projects

293. Displaying Arduino data

Arduino temperature display I've had an Arduino-based weather station since June 2009, but one problem with it has been that there hasn't been any easy way to display the data in real time without going to the database (or the raw import files) to see...... Listed under: LCD Projects

294. Arduino – Cannot get ECG readings from heart, but I do when I poke at the leads

down vote favorite I have a minor issue with my ECG. When I poke at the leads, I get a reading. But when I hold the leads or place it near my heart, I don't get anything. I'm pretty sure this is hardware related, but...... Listed under: Medical – Health based Projects

1. Overview The Wixel shield seamlessly enables a wireless link (with a typical range of ~50 feet) to replace your Arduino's USB interface, which means you can use the standard Arduino computer software to: wirelessly program the Arduino (this feature is not available with the Arduino...... Listed under: Wireless Projects

296. Stepper Motor Control System Based On Arduino With ULN2003 Chip

Project Summary: This project uses ULN2003 chip to drive. The working voltage is DC5V. It is widely used on ATM machine, inkjet printer,cutting plotter, fax machine,spraying equipment, medical instruments and equipments, PC peripheral, and USB Mass Storage ,precise instrument,industrial control system,office automation,robot areas,etc. Bill of...... Listed under: Motor Projects

297. How to make a Arduino LED Scroll Bar
Today I want to make a LED Scroll Bar as the above picture showed. Ten LED strips can flash in different effects by using a control board. Required Components LED strip, Arduino Nano, Dupont line and a control board. So, how to make a LED...... Listed under: LED Projects

298. Traffic light and pedestrian crossing implemented with an Arduino

This video shows the Traffic light and pedestrian crossing I've implemented with an Arduino. It's a reproduction of the crossing near my home, timings taken from a video of it. Incidentally, I produced the diagrams for this using a product called Fritzing. It's a nifty piece of...... Listed under: Development Board – Kits Projects

299. Rain Alarm Project

Water is basic need in every one's life. Saving and proper usage of water is very important. Here is an easy project which will give the alarm when there is rain, so that we can make some actions and save the rain water. As a...... Listed under: Home Automation Projects

300. RC Quadrotor Helicopter

This project is a RC quadrotor helicopter (quadrocopter, quadcopter, quadricopter, etc). It's a RC helicopter that uses 4 rotors. You need some pre-requisite skills: How to use Arduino, enough to get started Soldering, wiring, basic electronic skills Basic hand tool operation A quadrotor helicopter flies...... Listed under: How To – DIY – Projects

301. A Voice Shield for Arduino – Give Voice to your Ideas!

The objective of this project is to build an Arduino voice shield to empower thousands of voice related applications! All this mostly thanks to an integrated ISD1790PY chip. This particular voice/TTS feature can be useful to integrate voice messages in alarm systems, to implement generic...... Listed under: Home Automation Projects

302. [FTC] Open Feathercoin ATM

Open Feathercoin ATM is an open-source automated teller machine for education and experimentation. Based on John Mayo Smith's OpenBitcoinATM which can be seen in action here A “voucher” is printed containing a private key QR Code that has been pre-loaded with the correct value of...... Listed under: Other Projects

303. Scooterputer

I spend a fair amount of time zipping around town on my scooter, and thought it would be cool to add a voltage monitor to warn when the battery might need recharging. Waiting until the electric starter no longer works is somehow lacking. So after...... Listed under: LED Projects

304. Arduino Tutorial – Chapter 2.3: Schematic and Breadboard Diagrams

Schematic Diagram You may remember, if you studied electronics as part of your science course at school, that there is a specific way of drawing circuit diagrams. Each component has a particular symbol (which may vary slightly depending where in the world you live) that...... Listed under: Development Board – Kits Projects, LED Projects

305. The LCDuino-1 I/O processor
News – April 25, 2010: All future announcements and updates for the LCDuino-1 and related app modules (δ1 relay-based attenuator, δ2 relay-based input/output selector, and others) have moved to the new AMB DIY audio forum. We have an entire forum category dedicated to the LCDuino...... Listed under: LCD Projects

306. Web Server with Two Temperature Gauges

This project consists of two temperatures that are measured by the Arduino using two MCP9700 temperature sensors. An Arduino Uno and Ethernet shield are set up as a web server that hosts a web page to display the two temperatures on two gauges. The web...... Listed under: Temperature Measurement Projects

307. How to Text Yourself when your DSC PC1550 Home Security System Alarms

I have a home security system that was installed when my home was built in the early 1990's. It is, or was until I modified it, a wired perimeter system with a single wired motion detector. The system is a DSC PC1550 and originally was...... Listed under: Security – Safety Projects

308. A lightning flash counter

Many years ago, I think it was in 1997, I stepped into an interesting circuit on a book about high voltage [1]. It was the diagram of a simple “lightning flash counter” intended to help in designing lightning protections on power lines. The description was...... Listed under: Other Projects

309. Using an Arduino as a garage car parking sensor

"M-my lord, it-it's impossible to locate the ship. It's out of our range." – Nute Gunray We recently moved into a new house and as always the first problem to address was finding the optimal place to park cars in the garage. Ideally, we wanted...... Listed under: Sensor – Transducer – Detector Projects

310. Gesture control car(robot) with Arduino and Android(bluetooth)

Hi folks, Here's an interesting project for all you creative minds out there. We are going to build an android phone controlled RC car. Nothing could be more fascinating than remote controlled cars. This one uses Bluetooth for communication and accelerometer of the mobile device...... Listed under: Bluetooth Projects, Robotics – Automation Projects

311. GSM Home Security Alarm System with Arduino

This project deals with the design & development of a theft control system for home, which is being used to prevent/control any theft attempt. The developed system makes use of an embedded system (comprises an open hardware microcontroller and a gsm modem) based on Global...... Listed under: Home Automation Projects, Security – Safety Projects

312. Arduino RFID Reader RC522 + Access Control System

I just received my RC522 RFID reader and made this simple Arduino access control system that uses the reader, a buzzer for the alarm and a relay shield for the security system. The relay can be used to open a door lock and if you...... Listed under: RFID – NFC projects
313. **Fun With The Arduino Esplora: A Digital Picture Frame**

With this article I kick off my series on the Arduino Esplora board. Today's project is a nice (and cheap!) little digital picture frame that uses the Esplora's TFT Screen add-on. Materials Needed In this section you will find the materials that you need to...... Listed under: **LED Projects**

314. **Rotary Encoder & Arduino**

I am not sure, but it was in year 1999, a non-stop (360 degree rotation) potentiometer found in a stereo music system confused me a lot. At that time, I failed to keyed out the strange potentiometer manufactured by ALPS. Later, I learned that it's...... Listed under: **Other Projects**

315. **Arduino based Bi-color LED Matrix Flappy Bird Game**

We have built quite a few projects using the Bi-color (Red and Green) LED Matrix Driver Module kits from jolliFactory and have published them as instructables here. Each of these modules uses two MAX7219 Display Driver ICs to drive a Bi-color LED Matrix. These ICs...... Listed under: **LED Projects**

316. **Arduino based Electronic Queuing System**

This is a Queuing System project requested by a clinic assistant which allows the doctor enter number from a keyboard and display it on a 32×16 LED panel. This project uses two Arduino, the first Arduino functioned as a SENDER which included a PS2 keyboard...... Listed under: **LED Projects**

317. **Digital Arduino Voltmeter with Temperature**

Step 1: The case I dug out an appropriate case from the dumpster, milled out a rectangular hole for the lcd, and drilled holes to mount the LCD and the Arduino. I used brass standoffs and fiber washers to prevent shorts. Then I gave the...... Listed under: **Metering – Instrument Projects**

318. **Learning Sequential Logic Design for a Digital Clock**

This instructable is for two purposes 1) to understand and learn the fundamentals of sequential logic 2) use that knowledge to create a digital clock. Digital clocks have been built by countless electronics hobbyists over the world. So why have I chosen to implement that?...... Listed under: **Clock – Timer Projects**

319. **Homebrew Arduino Pulse Monitor (Visualize Your Heartbeat)**

Movies look cool with those EKG (electrocardiogram), the one that beeps and detects heart activities. A few months ago, we had to shoot a hospital scene for our school project. We needed an EKG instrument. To keep the movie authentic, we didn't want to fake...... Listed under: **Medical – Health based Projects**

320. **How to Build a (Piezo) Knock Sensor Circuit**
In this article, we go over how to build a piezo knock sensor circuit. A knock sensor is a sensor which produces a voltage in response to some type of physical stress such as a knock or vibration. This is why it's called a knock...... Listed under: LED Projects, Sensor – Transducer – Detector Projects

321. Simulating Logic Gates

Introduction This project is a simple way of using the Arduino to simulate the behaviour of logic gates. Logic gates are explained on this page. The project does not actually carry out the function of the logic gate, just turns a light on or off...... Listed under: LED Projects

322. Tri-State Logic

Introduction So far we have sent one of two values to any Arduino output pin, either HIGH or LOW. This project shows how we can exploit a third state of the Arduino pins to reduce the number of pins needed to control LEDs. In the...... Listed under: LED Projects

323. Coin slot detector

when your coin slot is exposed, this wearable hip-pack vibrates that area to make you aware of it. you decide to cover up, or let it all hang out. the coin slot detector is a simple way to tackle the complicated modern problem low-rise jeans...... Listed under: Sensor – Transducer – Detector Projects

324. Polargraph Drawing Machine

This machine, a variation on the hanging-pen plotter is a conspicuous and wilfully naive attempt to break out of the pristine, pixel perfect, colour-corrected space that exists inside our computers. It's a drawing machine, that takes a pen (a human tool) and uses it to...... Listed under: Robotics – Automation Projects

325. Turn your Arduino into a Magnetic Card Reader!

Everyone has used a magnetic card reader, I believe. I mean, who carries cash these days? They're not difficult to get your hands on, either, and during a trip to my favorite local electronics shop, I found a bin full of these guys. So....of course,...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

326. Arduino Sous-Vide Cooker

Sous-vide cooking allows you to precisely control the temperature of cooked food (how “doneness” is measured) by immersing it in a carefully controlled water bath. It's possible, but seriously difficult, to do this just with a thermometer and a pot on the stove... but if...... Listed under: Temperature Measurement Projects

327. Basic Projects using chipKIT Uno32

Happy Tuesday, everyone! I tend to get excited about products that enable beginners to be really creative, and today's product highlight is one I think is worth getting excited about! [video width="380" height="285" id="_63Mq6QMxxM&" type="youtube"] A few things that I really like about the shield:...... Listed under: How To – DIY – Projects

328. Arduino Laser Tag – Duino Tag
Duino tagger- General introduction Duino tag is a laser tag system based around the arduino. Finally a laser tag system that can be tweaked modded and hacked until you have the perfect laser tag system for office ordnance, woodland wars and suburban skirmishes. Laser tag...... Listed under: Game – Entertainment Projects

329. **Wii Nunchuck Adapter**

This tutorial is for all those people who have an arduino and want to use there Wii nunchuck as an input device, but dont really feel like cutting open the cord and ruining the nunchuck FOREVER!!!!!!!well youve come to the right place!

Step 1: Supplies...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

330. **Flamethrowing Jack-O’-Lantern**

A flamethrowing jack-o'-lantern keeps the trick-or-treaters a safe distance from your house and is a fine addition to any anti-Halloween arsenal. At the first sign of any sugar-obsessed imp, simply press the trigger button and wirelessly shoot a one-second burst of flames out of the...... Listed under: Other Projects

331. **Make a swimming Roobo-Snake**

Sneel is the name of my snake / eel swimming robot. This is documentation of hardware, software and mechanical design of Sneel_003. urethane flex tubing, microcontrollers, Zigbee wireless radio, hose clamps, wires, servo motors, titanium servo brackets, silicon, marine grease, epoxy, pond pump Sneel is...... Listed under: Robotics – Automation Projects

332. **The EyeWriter 2.0**

The EyeWriter is a low-cost eye-tracking apparatus + custom software that allows graffiti writers and artists with paralysis resulting from Amyotrophic Lateral Sclerosis to draw using only their eyes. The original design, as shown here, featured a pair of glasses as the basis for the...... Listed under: Development Board – Kits Projects

333. **N: how to make a multi-layered acrylic and LED sculpture with variable lighting levels**

Here you can find out how to make you very own n as made for the exhibition www.laplandscape.co.uk curated by art/design group Lapland.More images can be seen at flickr This exhibition runs from Wednesday 26 November – Friday 12 December 2008 inclusive, and had a...... Listed under: LED Projects

334. **Arduino-Controlled Robotic Drum**

For years I have been telling anyone who listens that I was going to build a robotic drum. Most people kind of shrugged indifferently. Even as I built it, most people kind of glanced over at it and conveyed doubtfulness. It seemed like no one...... Listed under: Robotics – Automation Projects

335. **SITWAY**

You are never to old to learn and try new things. I think one of the best days in my life was the day I discovered the Instructables web site. It opened up a whole new world to me. This is my third instructable ...... Listed under: Robotics – Automation Projects
336. **Arduino R/C Lawnmower (painted)**

What this is: This instructable will show you how to make your Arduino into an R/C interface that you can use for just about anything requiring remote control. I will also show you how I built an R/C lawnmower using my Arduino, a cheap R/C transmitter and...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

337. **Power Laces- the Auto lacing shoe**

Also, check out Power Laces: Version 2.0 Why wait until 2015? Inspired by 'Back to The Future II', this project is less 'Practical' than 'Proof of Concept', but hopefully it'll tide you over until Nike comes out with something more polished. This was also the...... Listed under: Other Projects

338. **Sigh Collector**

Sigh v. i. [imp. & p. p. (Sighed); p. pr. & vb. n. {Sighing}.] 1. To inhale a larger quantity of air than usual, and immediately expel it; to make a deep single audible respiration, especially as the result or involuntary expression of fatigue, exhaustion,...... Listed under: Other Projects, Phone Projects

Introduction: The Home Automation Framework project is a web application that can remotely control the electronic devices in one's home using a web interface on a smartphone, tablet or desktop computer. The project facilitates ease of access and remote control of electronic devices for those...... Listed under: Home Automation Projects

340. **LED Cube 8x8x8**

Create your own 8x8x8 LED Cube 3-dimensional display! We believe this Instructable is the most comprehensive step-by-step guide to build an 8x8x8 LED Cube ever published on the intertubes. It will teach you everything from theory of operation, how to build the cube, to the...... Listed under: LED Projects

341. **Cloud Sensor Base-Station**

What I want to do I want to create a platform with the capacity to control a large number of sensors and actuators necessary for the hydronponics system outlined in this wiki, and to serve as the central gateway to a cloud-enabled dashboard. The basis...... Listed under: Sensor – Transducer – Detector Projects

342. **Drawing on a 7×5 LED matrix with Arduino in C**

In my component drawers I have a LTP-7357AG, which is a matrix of 35 green LEDs conveniently packaged in a 12-pin display. I wanted to play with it so I began to hook it with my Arduino Uno. This post is part of a series about programming Arduino...... Listed under: LED Projects

343. **DIY wattmeter with an Arduino**

DIY wattmeter with an Arduino It is difficult or sometimes even impossible to measure power and energy with ordinary multimeters. To carry out such a measurement reliable and accurate, a special wattmeter is required. Because these meters are very expensive, a
cheaper solution is presented...... Listed under: How To – DIY – Projects, Metering – Instrument Projects

344. The Viciously Simple Clap-ON Clap-OFF Circuit For Arduino

Hi Everyone! I've had a few people ask about creating a simple clap-on/clap-off circuit using Arduino. Well those who are interested are now in luck. The software in this instructable is simple and well commented. The schematic is simple, and the components are easy and...... Listed under: LED Projects

345. Arduino car LCD display

Here is a project I made a couple of years ago for my father's car. The original dashboard's info-panel which displayed current time, date and temperature was working only partly – and that only after a good cleaning and connector fastening. In other words –...... Listed under: Car Projects, LCD Projects

346. Automatic Home surveillance system using arduino(simple and cheap)

The goal of my project is to achieve Automatic home surveillance system without any manual interference. In general other surveillance system it is necessary to power ON TV and camera receiver every time. And also it needs to any user input to view who is...... Listed under: Home Automation Projects

347. GESTURE VOCALIZER FOR DUMB PEOPLE INTERACTIn ION

To establish a communication or interaction with Deaf and Mute people is of utter importance nowadays. These people interact through hand gestures or signs. Gestures are basically the physical action form performed by a person to convey some meaningful information. Gestures are a powerful means...... Listed under: Other Projects

348. Solar Panel Battery Charge Controller Using Arduino

This is an updated version of Solar Panel Charge Controller Using Arduino. Solar Panel Battery Charge Controller Using Arduino Pictures of Power box and Arduino solar charge regulator: Charge Regulator with Power Box Connections to Regulator Inside the Box The output voltage of the ACS712...... Listed under: Solar energy projects

349. LED firefly Jars

There's a nice charm to fireflies in a jar—except for, you know, all the dead bugs afterwards. I decided to make a bunch of fake fireflies in real jars for decoration at an outdoor event. The fireflies are yellow LEDs controlled by a small ATtiny45...... Listed under: LED Projects

350. Accelerometer Controlled Robot

Most of industrial robots are still programmed using the typical teaching process, through the use of the robot teach pendant. In this paper is proposed an accelerometer-based system to control an industrial robot using two low-cost and small 3-axis wireless accelerometers. These accelerometers are attached...... Listed under: Robotics – Automation Projects

351. Bluetooth Controlled Robot
In this proposed system we going to construct a basic DC motored robot which we are going to control with android app easily available on google play store named bluecontrol. With Basic mobility of robot like forward, Reverse, left, right we try to implement four...... Listed under: Bluetooth Projects, Robotics – Automation Projects

352. Arduino Project: Intervalometer for Fuji cameras

This post is about an arduino-based intervalometer I built for my camera, a Fuji S9600 dSLR. I decided to go for a very simple interface: a rotary switch in the middle of a plastic box which would allow me to select 12 pre-defined intervals. I...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Video – Camera – Imaging Projects

353. Automatic Garden Watering Device – Arduino

As part of the Content Creation course for my MLIS degree (Our class blog: http://scumakers.wordpress.com/ ), I needed to come up with a final project and wanted to learn to use an Arduino. In the end I came up with this device to automatically sense...... Listed under: Home Automation Projects

354. Arduino Hygrometer

I am building an automated irrigation system for my vegetable patch. This will be a system that monitors the soil moisture level and then turns on a pump to send water to my garden according to the detected moisture level. The water is coming from...... Listed under: LED Projects

355. Make a Web Connected Robot (for about $500) (using an Arduino and Netbook)

This Instructable will show you how to build your own Web Connected Robot (using an Arduino micro-controller and Asus eee pc). Why would you want a Web Connected Robot? To play with of course. Drive your robot from across the room or across the country,...... Listed under: Robotics – Automation Projects

356. Arduino Motor Party

In this instructable I will show you how to throw an Arduino motor party. I will also be giving away an Arduino Mega, Arduino Uno, and an Arduino Pro Mini. (Details at the end) Step 1: Assembly + Code You'll need a handful of motors...... Listed under: Motor Projects

357. Send SMS from Arduino over the Internet using ENC28J60 and Thingspeak

This Instructable explains how to send an SMS from an Arduino using the Internet. There are many ways to approach this and I will explain one of the different methods used to accomplish this task. Some major points needed for my project: I have a...... Listed under: Interfacing(USB – RS232 – I2c -ISP).Projects

358. Washer Dryer Laundry Alarm using Arudino & SMS Text Messaging Alerts

Have you ever wished there was a better way to be notified when your laundry was done? Have you ever forgotten a load in the washer because you couldn't hear the buzzer and your clothes became smelly and moldy from sitting there for too long?...... Listed under: Home Automation Projects, Wireless Projects

359. Converting infrared to RF signals with Arduino
In this project we will show you how to switch on and off the power sockets box with an IR remote. Not only the power sockets box, but other RF receivers can be switched on and off with the same IR remote as well. We...... Listed under: Wireless Projects

360. How to Make a Wireless Path Tracking System Using Mouse, XBee and Arduino

The applications of microcontroller are not limited to control simple electrical or electronic device but they are widely used in robotics and automotive industries nowadays. From simple rear view mirror control to complex engine control functions are done by the microcontroller. The microcontroller can even...... Listed under: Wireless Projects

361. How to Transmit Mouse Data Using Xbee with Arduino

The PS2 mouse is an input device which can communicate with a host device using the PS2 protocol. It can be connected to a host device using the 6 pin mini DIN connector. The mouse will continuously give output which can be decoded to get...... Listed under: Development Board – Kits Projects

362. How To Save a Text In The EEPROM of The Arduino

A microcontroller might need to store its data like sensor value, or a particular count or image data for a long period of time. The most common type of memory used with the microcontroller based systems is EEPROM. The EEPROM stands for Electrically Erasable Programmable...... Listed under: LED Projects

363. Drawing an Arduino Circuit Diagram

I've had an Arduino Duemilanove now for a couple of weeks. If you're not familiar with the Arduino, it is “an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software”. It has a small microcontroller, a USB port to connect to your computer...... Listed under: Interfacing(USB – RS232 – I2c –ISP) Projects

364. Generate Random Number using Arduino

A random number generation is very important in computing devices which helps them to do task in random manner. The applications of random number generation can be found in shuffling the audio files in an audio player, in almost all kind of digital games, generating...... Listed under: Development Board – Kits Projects

365. Augment a Moog Etherwave Theremin

I'm going to go through my process of hacking a Moog Etherwave Theremin. I created a new acrylic top, partially sanded to be translucent in certain areas, and created my own circuit around an ATMega168 Arduino Bootloaded microcontroller which is stealing a control voltage from...... Listed under: LED Projects

(and partner-in-crime, Abbie). Now, I'm off to the next stage of my life, so I decided to build this friendship photoset for Kevin and Briton to remember our golden era. We called ourselves: “The Suite Bros”. This project is actually an extension of the “Voice...... Listed under: LED Projects

367. Arduino Garage Controller
Although there are many garage door projects on Instructables using Arduinos, I needed/wanted something different. Last year, we had a warm summer and when I would come home after work, I would leave the garage door open about 1 foot so it could cool off...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

368. Arduino based Drone Quadricopter

[gallery ids="19920,19921,19922,19924,19925,19926,19927"] arduino based Drone Quadricopter It's a tiny quadrotor helicopter! Update Feb 25 2012: Warning, I may have discovered a bug inside the CadSoft EAGLE 6.1.0 software that may make the PCB look slightly different. My design files are meant for 5.11 so use...... Listed under: Drone

369. Project: Cleaner robot using Magician Chassis, Arduino, distance sensor and hand sweeper

This is a cleaner robot so you can give to your mommy or just use to clean your bedroom =P. Material List: 1x Arduino UNO R3 1x Magician Chassis 1x Shield Motor Driver (Shield 4Power) 1x Distance Sensor 1x Servomotor 1x Hand Sweeper 1x Battery 1...... Listed under: Robotics – Automation Projects

370. Arduino-Based Shadow Alarm

Shadow alarms are usually used for protection against theft. A shadow alarm is a device that sounds an alarm when a shadow falls on it. Described here is a simple circuit of an arduino based shadow alarm. This compact shadow alarm unit is capable of sensing a...... Listed under: Security – Safety Projects

371. Arduino Bicycle Alarm and Lights

This alarm is a good way to alert you if somebody messes with your bike. I had a bicycle stolen a while back and decided there had to be a better way to keep my bike secure. When I searched for bicycle alarms, all I...... Listed under: Security – Safety Projects

372. How to Use IR Remotes with Arduino (Current and Updated)

I'm tired of these complicated tutorials on how to use certain things. I like simple, easy to understand, step by step instructions. My biggest problem was with IR and POV*. I've finally mastered how to control my project with any TV remote in a few...... Listed under: Wireless Projects

373. ARDUINO Burglar Alarm Using Infrared Emitter-Detector pair

In this tutorial i will show you , how to make a simple Inexpensive Intrusion Detection(Burglar alarm) using an Arduino Uno board . This project uses the Infrared Emitter-Detector pair to detect intrusion and triggers an alarm as soon as the object crosses the infrared...... Listed under: Wireless Projects

374. Arduino for Photographers: Building a Universal Intervalometer

Practicing the art of time-lapse photography without an intervalometer is doable, but not particularly efficient. And while any decent photo equipment store will be happy to sell you one, you can go the DIY way and build your own intervalometer based on the excellent Arduino platform. Theoretically, building...... Listed under: LED Projects
375. **Connecting the ADXL337 to the Arduino**

Today I’ll write about the ADXL337 accelerometer. The ADXL337 measures the acceleration of the x, y and z axis. This means it measures the force acting on any of the axes at a specific moment in time. Because it’s an analog device the measurement intervals are as short.... Listed under: Other Projects

376. **Arduino Accelerometer mma7361**

Hey guys, I am a teaching assistant for an introduction to engineering class for biomedical engineering majors at Vanderbilt University this semester. I created this video to explain analog-to-digital conversion to them because time ran out during class and I did not get to this.... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Sensor – Transducer – Detector Projects

377. **Arduino Automatic Watering System**

INTRODUCTION & OBJECTIVES: I is a simple system, using Arduino to automate the irrigation and watering of small potted plants or crops. This system does the control of soil moisture, doing indications via LEDs and in case of dry soil emitting a alarm beep. In...... Listed under: Featured, Home Automation Projects

378. **Arduino Compatible apc220 Wireless rf Module with Graphics LCD**

16 node mesh, up to 1000m between nodes, sample two analog voltages per node, link any node to any other node, display data on any node with either graphics or text display, turn on relays based on data at any node, fault tolerant with data...... Listed under: RFID – NFC projects, Wireless Projects

379. **Arduino DS1307 Clock**

1) Introduction and Images Hello friends, today I am going to build a Digital Clock using Arduino UNO and famous DS1307 Real Time Clock IC. Before we begin, here are some images of the completed project. You can find the YouTube video at the bottom...... Listed under: Clock – Timer Projects, LCD Projects

380. **MCP41100 an Arduino Controlled Potentiometer**

We know the analog potentiometer, is a three-terminal resistor with a sliding contact that forms an adjustable voltage divider. MCP41100 an Arduino Controlled Potentiometer: 1)volume controls on audio equipment. 2) Control the amplifier Gain and offset. 3) Transducer “displacement transducers”...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Sensor – Transducer – Detector Projects

381. **Arduino Bipolar Stepper Motor**

It is a well known fact that Stepper motors are awesome! The only downside is that they can be a bit trickier to get going than servos and plain old DC motors. If you are interested in the inner mechanics and theory of stepper motors, check this...... Listed under: Motor Projects

382. **How To Generate Square Wave Using Arduino**

Any AVR microcontroller based board which follows the standard Arduino schematic and is flashed with the Arduino bootloader can be called an Arduino board. The Arduino is refered to as open source hardware and the Arduino IDE is also open source and anybody can contribute...... Listed under: Development Board – Kits Projects

One of the directors has asked me to create a special backdrop for our college musical. This particular backdrop has a particular design (see below) that includes LED strip lighting to give the feel of a 1920s casino sign – similar to what is seen. Listed under: LED Projects

384. Build Arduino Based Home Security System Using PIR Motion Sensor

PIR sensors are widely applied in wireless residential security systems, home alarms systems and many more security circuits as motion detector sensors. A typical PIR sensor detects the infrared red (IR) waves from human body and so it is also known as ‘human sensor’. It. Listed under: Home Automation Projects, Security – Safety Projects

385. Temperature Sensing with Arduino

As part of the CanSat Primary Mission, we need to measure temperature. For this our starter kit has given us an Arduino Uno R3 micro-controller, as well as some resistors and an NTCE101E3 NTC Thermistor. The thermistor is a special kind of resistor that changes. Listed under: Sensor – Transducer – Detector Projects, Temperature Measurement Projects

386. Arduino Basics #5 – Add SD storage to Arduino

Arduino Uno’s microcontroller board is great, but the one thing it's not overly generous with is storage. Having 32KB of program flash storage, 2KB of RAM and 1KB of programmable EEPROM space at your disposal is fine for many Arduino projects, but it's not enough. Listed under: Arduino Programmer Projects

387. GSM Based Wireless Notice Board

ABSTRACT: There are several places which require vital notice to be displayed like colleges, railway stations, share-market, restaurants, hospitals etc. Looking into the present trend of information transfer, it is seen that vital notice take time to be displayed on the displaying boards. This latency. Listed under: Wireless Projects

388. How to Make Phonecall From GSM Module Using Arduino

One can use a cell phone with any cellular networks around the globe if the proper SIM card is inserted in it. This is possible because there is some device inside the cell phone which follows a global standard enabling them to connect with different. Listed under: Phone Projects

389. Sinewave Inverter Circuit Using Arduino

The post explains how to build a simple sinewave inverter circuit using PWM feed from an Arduino Uno board, the article also discusses a sinewave 3 phase inverter using the same input from an Arduino. The idea was requested by Mr. Raju Visshwanath Technical Specifications. Listed under: PWM Projects
Here is a useful circuit for Arduino lovers and experimenters. It is a simple digital voltmeter, which can safely measure input dc voltages in 0 to 30V range. The Arduino board can be powered from a standard 9V battery pack, as usual. As you may...... Listed under: Metering – Instrument Projects

Get your Arduino moving! This shield makes it easy to control two high-power DC motors with your Arduino or Arduino-compatible board. Its dual robust VNH5019 motor drivers operate from 5.5 to 24 V and can deliver a continuous 12 A (30 A peak) per motor, or a continuous...... Listed under: Motor Projects

Last week, we learnt about the basic structure of an Arduino program and took a closer look at the ‘blink’ example. Hopefully you took the opportunity to experiment with code, adjusting the timings. This time, we'll be writing something from scratch. In fact, let's make...... Listed under: LED Projects

In this tutorial, a temperature sensor (MCP9700 linear active thermistor IC) and LCD are connected to the Arduino. The Arduino reads the temperature from the MCP9700 on analog pin A0 and displays the temperature on the LCD. This video shows the circuit operating. When touched...... Listed under: LCD Projects

So far in this series we've had a diverse look at how Arduino can interact with a range of real-world devices from servo motors to ultrasonic range finders TVs to humidity sensors. Now we'll see if we could get the Arduino to make a few...... Listed under: Sound – Audio Projects

Arduino Project – The distance calculator I have been playing with Arduino (micro-controller) for about 2 years now and I am becoming more and more passionate about circuits. For those who are not aware of Arduino, check out my article “Arduino – A Guide for...... Listed under: Calculator Projects

You'll need these: HC-SR04 – Get this ultrasonic sensor from eBay.com.au for $2. SG90 Servo Motor – We've seen this servo selling for around $4 on ebay. Motor drive shield – You can get this expansion board for $5 online. If you're new to APC...... Listed under: Robotics – Automation Projects

If you ever wanted to integrate touch sensitivity into your project, this board could just do the trick. It's a capacitive touch sensor. These sensors are used in our everyday consumer electronics like notebook trackpads, video game consoles, touchscreens...just to name a few. They work...... Listed under: Sensor – Transducer – Detector Projects
398. **PID Thermostat**

PID Thermostat This is a PID thermostat for the arduino. It supports independent tuning parameters for multiple hardware 'profiles', and includes an autotune mode to estimate the PID parameters for a given setpoint. Installation Hardware DS18-series (I'm using the DS18B20) temperature sensor Solid-state relay rated...... Listed under: Sensor – Transducer – Detector Projects

399. **Wireless Arduino Oscilloscope**

In this guide I will explain how to use a Windows 8.1 phone, Arduino Uno board, and HC-05 Bluetooth module to build a wireless oscilloscope. The phone application has the critical functions of an oscilloscope, although the bandwidth is a measly 300 Hz. Still, if...... Listed under: Wireless Projects

400. **Simple Arduino Wireless Mesh**

Build a low cost simple wireless mesh using arduinos and long range APC220 radio modules. Wireless mesh networks can handle individual nodes not working and are tolerant to environments such as forests and hills where data may not be able to go directly from one...... Listed under: Wireless Projects

401. **Arduino 3.3V**

This Lazy Old Geek (L.O.G.) loves Arduinos. I have noticed that a lot of sensors, like GPS, LCDs, magnetometers are 3.3Vdc sensors. But the standard Arduinos, Uno, RBBB are 5Vdc modules. So I decided I'm going to make more of my Arduino projects with 3.3Vdc...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

402. **Arduino Fridge Magnet**

Do you have a habit of leaving notes on the fridge, now take it digital and add an Arduino to it. In this instructable I'm going to show you how to do just that. All you need is an Arduino, an LCD screen and a...... Listed under: LCD Projects

403. **Ultrasonic Range detector using Arduino and the SR04 Ultrasonic sensor**

his is a preliminary instructable that will take you through the steps I took to get the SR04 ULTRASONIC SENSOR connected and working to the Arduino. It will then be incorporated to my mini environment monitor. Eventually, if it all fits, it will end up...... Listed under: Sensor – Transducer – Detector Projects

404. **Kid-friendly PuppyDuino 0.31**

OK, this is not a fully autonomous “get you a beer, open it for you and then tweet about it” robodog (yet 😊 but if you’re itching to get past the blinky lights on a breadboard stage with your Arduino and you’re ten or know...... Listed under: LED Projects

405. **The Arduino Mothbot**

The purpose of this project is to design and build a simple light-following robot using an Arduino Duemilanove microcontroller board. I really wanted to share a robot project that was cheap, simple to build, and had a complete set of instructions for all of the...... Listed...
406. David Bynoe works in progress

For an upcoming project I needed a pneumatic ram with a closed loop control system so I could position it accurately. Didn't have the budget for an off the shelf solution, so I bodged one together with an arduino, a couple air solenoid valves, and...... Listed under: Other Projects

407. How to Build an H-bridge Circuit with an Arduino Microcontroller

An h-bridge is a chip that allows DC motors to be run versatile, with bidirectional capability. With an H-bridge, motors can go forward or backward, left or right, up or down, etc, depending on the use of the motor(s) in the circuit. Without a microcontroller,...... Listed under: Motor Projects

408. Arduino passive IR trigger for Canon EOS

The other day I wanted to experiment with external triggers for my Canon EOS 550D camera. I stumbled upon a nice open source project called Arduino Camera Control from Oleg Mazurov, the creator of the USB Host Shield library for Arduino. The Arduino Camera Control...... Listed under: Interfacing(USB – RS232 – I2c –ISP) Projects

409. ARDUINO RF power & SWR meter

This sketch will readout RF power and SWR from any SWR bridge (for example ‘monimatch’ type). As this ‘monimatch’ type of bridge is frequency dependant, the meter must be calibrated for every band. Because my primary interest was for VHF/UHF/SHF, I have foreseen positions for...... Listed under: Metering – Instrument Projects

410. Internet connection indicator box with restart button

THE SETUP For an interface I thought 3 LEDs would be simple enough: Blue for everything is ne (as blue LEDs are cooler than green ones); red for something is wrong; and yellow for the modem and router are being restarted. I added a button...... Listed under: Internet – Ethernet – LAN Projects

411. Arduino Security Alarm with Reed Switch

How does the security alarm circuit works? When power is turned on, the circuit goes into standby mode, and this condition is indicated by “SECURITY ALARM” in the LCD screen. Note that here a N/O reedswitch + bar magnet combination is used to detect any mishaps,...... Listed under: Security – Safety Projects

412. Line Follower Robot using Arduino

A line follower robot using 8051 microcontroller is already published here and this time the same thing is done using arduino. This line follower robot is basically designed to follow a black line on a white surface. Any way the same project can be used...... Listed under: Robotics – Automation Projects

413. HOW TO MAKE CUSTOM GEAR FOR LINEAR MOTION
In the manufacturing industry, a wide variety of devices used at home or in the garden has been experiencing challenges in automating linear displacement of any of the items used. For instance, an automatic opening of gates, automatic unlocking and changing positions of...... Listed under: Metering – Instrument Projects

414. Arduino Platform – SIMON Game Implementation

Introduction Having been a CodeProject member for several years, and not having got round to ever publishing an article, left me feeling a bit disappointed in myself. I have thought many a time on what kind of article I can produce. Then after coming across...... Listed under: Game – Entertainment Projects

415. Arduino Based Security System using GSM & PIR Sensor

In present time Home/Office and many other place security is most important. In our absence these places are not secure. For make these palaces secure many peoples keep guards and many people prefer electronic security systems. In present time many types of security systems are...... Listed under: Security – Safety Projects

416. Interface single and Dual IR Infrared sensor with Arduino and LCD

Interface single and Dual IR Infrared sensor with Arduino and LCD Introduction- Multiple Sensor Interface to Arduino In this another tutorial on sensors for beginners, we are going to interface single and multiple Infrared IR sensors with Arduino Uno development board, working simultaneously and have the...... Listed under: Interfacing(USB – RS232 – I2c –ISP) Projects, Sensor – Transducer – Detector Projects

417. Getting Started with Arduino – LED Blinking

Arduino Uno is the best development board for beginners in the field of embedded systems. We can program Arduino board with less technical knowledge and programming skills. This tutorial is intended to beginners in the field of Arduino. Hope you already have an Arduino board. Then...... Listed under: LED Projects

418. 26-Way MIDI DRUMS

his design is a 26-way MIDI/USB drum pad system with the velocity byte fixed for 10 input drum switches and a 16-way velocity sensitive circuit, providing a full (0-127) velocity range using piezo sensors. The drums are pre-selected to the MIDI outputs 35-50 for the...... Listed under: Other Projects

419. LPD8806 SD/LCD Digital Light Wand! (Last Update – 20 September 2014)

I have gathered the information from the HL1606 Digital Light Wand Blog and brought it all over to this new page so that there would be a page dedicated to the LPD8806 Digital Light Wand created by IS0-MICK. Mick took my original design and turned...... Listed under: LCD Projects

420. Interfacing LCD with Arduino Uno

16×2 character LCD display is a very basic LCD module which is commonly used in electronic projects. 16×2 means it can display 2 rows of 16 characters (columns). Its other variants such as 16×1, 16×4 etc are also available. These LCDs are usually made using...... Listed under: LCD Projects

421. Analog to Digital Conversion in ARDUINO
Analog to digital conversion module of ARDUINO UNO has 6 input ports. The number of the port varies with your ARDUINO model but the coding remains the same. The analog reading in the analog inputs are converted into corresponding 10bit(0-1023). ARDUINO developers have made such an option that you...... Listed under: Other Projects

422. How to Convert an Arduino into an AVR Flash Programmer

In case you don't have an AVR programmer but you do have an arduino, the arduino can be converted into an AVR flash programmer, meaning it can program bare AVR microcontroller chips. Say if you have an AVR chip and you want to program the...... Listed under: Arduino Programmer Projects, How To – DIY – Projects

423. How to Build an Infrared Distance Sensor Circuit

An infrared (IR) distance sensor is a sensor that can measure distance from a solid or physical object. An infrared distance sensor does this through light waves. It sends out infrared light and waits to receive it back at the receiver end. If it receives...... Listed under: How To – DIY – Projects

424. How to Build an HC-SR04 Distance Sensor Circuit

An ultrasonic distance sensor is a sensor that can measure distance from a solid or physical object. An ultrasonic range finder does this through sound waves. It sends out high-frequency sound waves and then waits to listen back for these sound waves. If it has...... Listed under: Sensor – Transducer – Detector Projects

425. How to Build a Servo Motor Circuit (with Arduino)

In this project, we will go over how to build a servo motor circuit using an arduino. This is a circuit which can control and rotate a servo motor to rotate a certain amount of degrees. Specifically, in our circuit, we will make it so...... Listed under: Motor Projects

426. How to Build an Ohmmeter Using an Arduino

In this project, we will show how you can build an ohmmeter using an arduino. An ohmmeter is a device that can measure resistance. Most of the times now, ohmmeters aren't standalone devices but appear as one of type of measuring device amongst many in...... Listed under: Metering – Instrument Projects

427. MQ-7 Carbon Monoxide Sensor Circuit Built with an Arduino

In this project, we will go over how to build a carbon monoxide sensor circuit with an arduino. The carbon monoxide sensor we will use is the MQ-7 sensor. This is a sensor that is sensitive to effects of CO. Carbon monoxide (CO) is a...... Listed under: Sensor – Transducer – Detector Projects

428. MQ-3 Alcohol Sensor Circuit Built with an Arduino

In this project, we will go over how to build an alcohol sensor with an arduino. The alcohol sensor we will use is the MQ-3 sensor. This is a sensor that is not only sensitive to alcohol, particularly ethanol, which is the type of alcohol...... Listed under: Sensor – Transducer – Detector Projects
429. **MQ-2 Smoke Sensor Circuit Built with an Arduino**

In this project, we will go over how to build a smoke sensor circuit with an arduino board. The smoke sensor we will use is the MQ-2. This is a sensor that is not only sensitive to smoke, but also to flammable gas. The MQ-2...... Listed under: *Sensor – Transducer – Detector Projects*

430. **How to Build a Liquid Level Gauge Circuit with an Arduino**

In this project, we will build a liquid level gauge circuit with an arduino. This is a circuit in which a liquid level can be monitored through a gauge. We read the liquid level from the gauge (low, medium, or high), just as you see...... Listed under: *How To – DIY – Projects, Metering – Instrument Projects*

431. **Arduino Light Meter Circuit**

In this project, we will go over how to connect an analog volt panel meter to an arduino so that it can measure and give us a readout of light striking the circuit. In this way, the circuit will function as a light meter. When...... Listed under: *Metering – Instrument Projects*

432. **How to Build a Soil Moisture Sensor Circuit with an Arduino**

In this project, we are going to build a soil moisture sensor with an Arduino microcontroller. A soil moisture sensor, also called a hygrometer, measures the amount of moisture, or water, in the soil. Therefore, we can tell whether the soil has enough moisture or...... Listed under: *How To – DIY – Projects, Sensor – Transducer – Detector Projects*

433. **How to Build a Night Light Circuit Using an Arduino**

In this project, we will go over how to build a night light circuit using an arduino. A night light circuit is a circuit which will turn on when nighttime comes, which is when it gets dark and the place could use some illumination. It...... Listed under: *How To – DIY – Projects, LED Projects*

434. **How to Build a Heat Detector Circuit Using an Arduino**

In this project, we will go over how to build a heat detector circuit using an Arduino. A heat detector circuit is a circuit, of course, which can detect the presence or absence of heat. This could be useful for a wide range of circuits...... Listed under: *Sensor – Transducer – Detector Projects*

435. **How to Build a Color Sensor Circuit**

In this project, we are going to build a color sensor circuit with an Arduino microcontroller. A color sensor is a device that can detect and differentiate between certain primary colors. This sensor can detect and differentiate between the colors white, blue, green, and red...... Listed under: *How To – DIY – Projects, Sensor – Transducer – Detector Projects*

436. **Visual / Aural Guitar Tuner "The Tune Trainer" using arduino**

Build a strobe tuner with an integrated tone generator to teach tuning by ear. -=Background=- I have always dabbled in instruments. Over the course of my life, I've attempted (with varying success) Piano, Guitar, Banjo, Penny Whistle, Ocarina, Panpipes, Great Highland
437. **How to Build a Light Detector Circuit Using an Arduino**

In this project, we will go over how to build a light detector circuit using an arduino. A light detector circuit is a circuit which can detect the presence or absence of light, depending on how we write our code to respond to the varying.

Listed under: **How To – DIY – Projects**

438. **Arduino-Based Optical Tachometer using arduino**

Over ten years ago, I put up a web page with detailed instructions on building a simple electric motor based on one from the Beakman's World TV show. I called it the "Beakman's Electric Motor" page and over the years it has had hundreds of.

Listed under: **Metering – Instrument Projects**

439. **How to Build an Infrared Proximity Switch Circuit Using an Arduino**

In this project, we will build an infrared proximity switch circuit using an arduino. This is a circuit in which a switch activates when the infrared sensor detects an object in its proximity. The infrared proximity switch sensor is a reflection-type photoelectric sensor which sends.

Listed under: **How To – DIY – Projects**

440. **Ultrasonic Batgoggles**

Wish you were bat? Want to Experience Echolocation? Want to try to “see” with your ears? For my first Instructable, I will show you how to build your own ultrasonic batgoggles using an Arduino microcontroller clone, Devantech ultrasonic sensor and welding goggles for around $60.

Listed under: **Game – Entertainment Projects**

441. **How to Build a Simple Force Sensing Resistor (FSR) Circuit**

In this article, we will go over how to connect a force sensing resistor, or force sensitive resistor, (FSR) to a circuit to build many different types of useful circuits with them. Force sensing resistors are variable resistors which change resistance according to the pressure.

Listed under: **How To – DIY – Projects**

442. **How to Install the Arduino to the Lithium Backpack using arduino**

The Arduino is an open source hardware input and output circuit and the Lithium Backpack is a Ardino accessory that will power the Arduino when it is away from a computer or a wall power. These products are sold at Liquidware for under $34 each.

Listed under: **Interfacing(USB – RS232 – I2c -ISP) Projects**

443. **How to Connect a Microphone to an Arduino**

In this project, we will go over how to connect a microphone to an arduino so that the arduino can detect whether there is sound in the environment or not. This circuit is only capable of detecting whether there is sound in the environment or.

Listed under: **How To – DIY – Projects**

444. **Spectrographic Auroral Indicator – A Northern Lights Warning Device using arduino**
3/16/2011 EDIT: The Wing Kp Predicted Geomagnetic Activity Index model is now deployed and operational. Costello is now considered non-operational and will be discontinued on 23 Mar 2011. Comments and questions are welcomed at SWPC.CustomerSupport@noaa.gov The Wing Kp Predicted Geomagnetic Activity Index model is known...... Listed under: Security – Safety Projects

445. How to Integrate a Temperature Sensor Circuit to an LCD

In this project, we will go over how we can build a temperature sensor circuit and integrate it to an LCD so that we can get a readout of the temperature on the LCD. In previous projects with temperature sensor circuits, we built the circuit...... Listed under: LCD Projects, Sensor – Transducer – Detector Projects

446. How to Build a LM335 Temperature Sensor Circuit

In this project, we will demonstrate how to build temperature sensor circuit using a LM335 sensor. As a temperature sensor, the circuit will read the temperature of the surrounding environment and relay this temperature to us back in degrees Kelvin. The difference between an LM335...... Listed under: Sensor – Transducer – Detector Projects

447. How to Build a TMP36 Temperature Sensor Circuit

In this project, we will demonstrate how to build temperature sensor circuit using a TMP36 sensor. As a temperature sensor, the circuit will read the temperature of the surrounding environment and relay the temperature to us back in degrees fahrenheit. The IC we will use...... Listed under: Sensor – Transducer – Detector Projects

448. Hard Drive Persistence of Vision (HDPOV) using arduino

The platter of a hard drive spins well over sixty times a second. If a narrow slot was cut into the platter to allow LEDs to shine through, we can achieve flicker fusion and trick the eye into seeing a stable image. This phenomenon is...... Listed under: Memory – Storage Projects

449. How to Drive a 7 Segment LED Display with an Arduino

In this project, we will show how to drive a single 7 segment LED display with an arduino microcontroller. A 7 Segment LED Display is an electronic device housing 8 individual LEDs. Using this device, we can display all numerals and many alphabetical characters and many more...... Listed under: LED Projects
450. Low Cost Water Flow Sensor and Ambient Display using arduino

Water is a precious resource. Millions of people do not have access to clean drinking water, and as many as 4000 children die from water contaminated illnesses every day. Yet, we continue to be wasteful with our resources. The overarching goal of this project is...... Listed under: Home Automation Projects

451. How to Build an RGB Full Color LED Module Circuit

In this project, we are going to build an RGB Full Color LED module circuit. A full color LED module is a circuit in which an LED can be lit to any color. This is why it is called a full color LED module. By...... Listed under: LED Projects

452. Control Your Robot Using a Wii Nunchuck (and an Arduino) using arduino

After wearing myself out playing Wii Boxing I got to thinking wouldn't it be great if I could use this to control my robot, (looking to my left hand). Looking around the internet I found a bevy of people doing similar things, (links to everyone...... Listed under: Robotics – Automation Projects

453. How to Connect and Read a Keypad with an Arduino

In this project, we will go over how to integrate a keyboard with an arduino board so that the arduino can read the keys being pressed by a user. Keypads are used in all types of devices, including cell phones, fax machines, microwaves, ovens, door...... Listed under: Development Board – Kits Projects

454. Super Simple Beginners Robot! using arduino

I created this Instructable for the absolute n00by robot wannabe. I have noticed a huge jump in the number of beginners getting into the hobby and the number of “how do I” questions seem to be mounting. Maybe this humble little Instructable will help one...... Listed under: Robotics – Automation Projects

455. How to Interface GPS with Arduino

Every single location in the entire globe can be specified in terms of geographical coordinates. The geographical coordinate is a system which specifies any given location on the earth surface as latitude and longitude. There are devices which can read the geographical coordinates of a...... Listed under: GPS Based Projects

456. Touch-less Switch

Arduino Project – Touch Me Not I modified the Arduino project from the Arduino Starter Kit (Touch Sensor Lamp). Now it lights up an LED when your hand is close on the aluminium foil (without even touching it). This can be used as a ‘Touch-less...... Listed under: Sensor – Transducer – Detector Projects

457. Create an Applescript/Arduino Alert flag using arduino
Have you ever felt like the mail sound on your Mac just wasn't enough? Simple sounds and alerts just don't cut it for you? You want something more apparent and rewarding? If so, this is the Instructable you've been looking for. In this Instructable, I'll...... Listed under: How To – DIY – Projects

458. **How to Build a Motion Sensor Light Circuit with an Arduino**

In this project, we will go over how to build a motion sensor light circuit with an arduino. A motion sensor light circuit is a circuit in which a light turns on when motion is detected. With a PIR motion sensor integrated with an arduino,...... Listed under: Sensor – Transducer – Detector Projects

459. **Time Sensing Bracelet using arduino**

The Time Sensing Bracelet is a fabric potentiometer. You select your desired time of day by making contact in the corresponding position on your wrist – where your watch would normally be. There is no point to it but fun. Update: Using some wire wrapped...... Listed under: Sensor – Transducer – Detector Projects

460. **YAHMS: Temperature Probes**

My wireless temperature probes work by using an Xbee module to transmit readings from a TMP36 down to the Arduino base station. The XBees aren't too cheap, coming in around £19 or $23 so I tried to be cheap and ordered mine from Sparkfun, I...... Listed under: Temperature Measurement Projects

461. **Simple mass storage for your microcontroller project using arduino**

Do you want gigabytes of storage for your microcontroller? Would you like a simple way to transfer files from your PC to your picaxe or arduino or other micro project? This little projects demonstrates the uDrive that can be set up as an extra drive...... Listed under: Memory – Storage Projects

462. **How to make a solar iPod/iPhone charger -aka MightyMintyBoost using arduino**

I wanted a charger for my iPodTouch and the MintyBoost was definitely my first choice. I wanted to take it a bit further and make it not only rechargeable but also solar powered. The other issue is that the iPhone and iPodTouch have large batteries...... Listed under: Solar energy projects

463. **Make an Ultrasonic Distance Calculator**

Arduino Project – The distance calculator I have been playing with Arduino (micro-controller) for about 2 years now and I am becoming more and more passionate about circuits. For those who are not aware of Arduino, check out my article “Arduino – A Guide for...... Listed under: Calculator Projects

464. **TV-B-Gone Kit using arduino**

Tired of all those LCD TVs everywhere? Want a break from advertisements while you're trying to eat? Want to zap screens from across the street? The TV-B-Gone kit is what you need! This ultra-high-power version of the popular TV-B-Gone is fun to make and even...... Listed under: Video – Camera – Imaging Projects
465. Arduino Police Flasher Kit

After reading about the famous Arduino programmable microcontroller using the “Getting Started with Arduino Kit (Jameco P/N 2121121) I was eager to try my hand at some real live electronic programming. The Arduino platform is a great place to start for a novice like me. After learning...... Listed under: LED Projects

466. Tweet-a-watt – How to make a twittering power meter... using arduino

Tweet-a-watt – How to make a twittering power meter... This project documents my adventures in learning how to wire up my home for wireless power monitoring. I live in a rented apartment so I don't have hacking-access to a meter or breaker panel. Since I'm...... Listed under: Metering – Instrument Projects

467. Arduino Circuit to Dim LED with Potentiometer

In Lesson 8 you learned to write analog voltages on the Arduiono, and in Lesson 10 you learned to read analog voltages from the arduino. In this lesson we will combine what you did in lessons 8, 9, and 10 to create an LED with...... Listed under: LED Projects

468. LED Sunrise Alarm Clock with Customizable Song Alarm using arduino

My Motivation This winter my girlfriend had a lot of trouble waking up in the morning and seemed to be suffering from SAD (Seasonal Affective Disorder). I even notice how much harder it is to wake up in the winter since the sun hasn't come...... Listed under: Clock – Timer Projects

469. Arduino Lab 2 – Morse Code Generator

Introduction An excerpt from OmniGlot.com about the origin of Morse Code: Morse Code was invented by Samuel F. B. Morse (1791-1872), a painter and founder of the National Academy of Design. He conceived the basic idea of an electromagnetic telegraph in 1832, and produced the...... Listed under: Development Board – Kits Projects

470. Arduino robot kit – Wiring Diagram

I have created this wiring diagram for the connections between the motor controller, motors, and sensor shield. I'll update it later to include other components. And here is an update that includes the servo motor and the range sensor. And here are the detailed pin...... Listed under: Robotics – Automation Projects

471. How To Communicate With An Alien Artifact or using arduino

Close Encounters of the Curiously Minty Kind. This Instructable will show you how to build an Altoids version of the ‘Close Encounters' mothership, and how to interact with it. This may be vital training for that day when the Bright White Beam comes to suck...... Listed under: Game – Entertainment Projects

472. Isolated mains power monitoring (Arduino)

All about power today.. For a while now, I've been looking around for a mains (220-240VAC) power monitoring circuit that I might be able to interface with an Arduino. There is of course the OpenEnergyMonitor solution, but they seem to use a transformer to isolate and measure...... Listed under: Metering – Instrument Projects
473. How to build an 8x8x8 LED cube and control it with an Arduino using arduino

There are a lot of LED cubes on Instructables, so why do another? Most are for small cubes consisting of 27 or 64 LEDs, rarely larger since they are limited to the number of outputs available on the microcontroller. This cube will be 512 LEDs,...... Listed under: LED Projects

474. Arduino automatic watering system

[caption id="attachment_19540" align="alignright" width="210"] Fig. 1: Author's prototype[/caption] During summers, most people are too lazy to water the potted plants on their rooftop gardens every day. Explained in this section is a simple and exciting plant watering system that you can build yourself in just...... Listed under: Home Automation Projects

475. Bar Graph

Introduction This project explores a couple of ways of simulating and using a bar graph with the Arduino. Bar graph components like the following one can be used, This type of bar graph is basically just 10 LEDs in a row with anodes on one...... Listed under: Other Projects

476. Solderless Breadboard Layout Sheets (plug and play electronics) using arduino

Here's a fun system designed to take care of some of the headaches involved in breadboarding a circuit. It is is a simple set of template files drawn to scale with real world electronic components. Using a vector drawing program you simply move the components...... Listed under: Development Board – Kits Projects

477. Arduino-Based Optical Tachometer

Over ten years ago, I put up a web page with detailed instructions on building a simple electric motor based on one from the Beakman's World TV show. I called it the "Beakman's Electric Motor" page and over the years it has had hundreds of thousands, if...... Listed under: Metering – Instrument Projects

478. USB NES controller with an arduino! using arduino

UPDATE 22-12-2014 Instructables user mattpbooth has updated the code and is hosting it on github: https://github.com/mattpbooth/ArduinoNESController... Thanks Matt! UPDATE 03-12-2011 Replaced a println with print (derp). UPDATE 01-12-2011 Remade all code from scratch. Remade 'ible code section; Now includes a 'Processing COM port cong for...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

479. How to Build a LM35 Temperature Sensor Circuit

In this project, we will demonstrate how to build temperature sensor circuit using a LM35 sensor. As a temperature sensor, the circuit will read the temperature of the surrounding environment and relay th temperature to us back in degrees celsius. The IC we will use...... Listed under: How To – DIY – Projects, Temperature Measurement Projects
480. **Tilt Sensor Tutorial using arduino**

What is a tilt sensor? Tilt sensors allow you to detect orientation or inclination. They are small, inexpensive, low-power and easy-to-use. If used properly, they will not wear out. Their simplicity makes them popular for toys, gadgets and appliances. Sometimes they are referred to as...... Listed under: Sensor – Transducer – Detector Projects

481. **RFID with Arduino**

If you ever wanted to integrate RFID functionality into your project, this small tutorial might help you accomplish that. I used the RDM630 module from seeedstudio in its UART version. It comes on a small board with presoldered connectors which fits perfectly on a breadboard. You only...... Listed under: RFID – NFC projects

482. **Ceiling Fan LED Display using arduino**

Seeing so many persistence of vision ideas on the web was too tempting not to try one. After considering several different motors to drive a display, a ceiling fan seemed to run at just the right speed, is out of the way, and very quiet...... Listed under: Home Automation Projects

483. **Home Automation using Arduino and MATLAB**

In present time home office appliance controlling is common thing. Today for controlling home/offices appliances, machineries in companies/industries uses different types of automation systems like DTMF controlled, GSM controlled and many others. So here this project is made for interfacing MATLAB (Graphic User Interfacing) and Home/office/industries...... Listed under: Home Automation Projects

484. **AVRSH: A Command Interpreter Shell for Arduino/AVR. using arduino**

Ever wanted to be “logged in” to your AVR microcontroller? Ever thought it would be cool to “cat” a register to see its contents? Have you always wanted a way to power up and power down individual peripheral sub-systems of your AVR or Arduino in...... Listed under: Arduino Programmer Projects

485. **How to Build a Vibration Motor Circuit**

In this project, we will show how to build a vibration motor circuit. A vibration motor is a motor which vibrates when given sufficient power. It is a motor that literally shakes. It is very good for vibrating objects. It can be used in a...... Listed under: How To – DIY – Projects, Motor Projects
486. **Acorn Chime using arduino**

By: Charlie DeTar, Christina Xu, Boris Kizelshteyn, Hannah Perner-Wilson

A digital wind chime with hanging acorns. Sound is produced by a remote speaker, and data about chime strikes is uploaded to Pachube.

**Step 1: Brainstorming**

for a device that would represent ourselves

Our goal was.....

Listed under: **Game – Entertainment Projects**

487. **Arduino Chandelier from Jars**

E-Edit: Thank you very very much for voting for me in Featured Author, Glue and Battery Powered Contests! Cheer up and wait for my project so special is coming... Edit: If you really like this project, you can vote for me on the top right corner, forFeatured......

Listed under: **LED Projects**

488. **Using Push Button Switch with Arduino Uno**

In this tutorial you will learn how to read the status of a digital pin of Arduino. I hope that you already go through our first tutorial, Getting Started with Arduino Uno – LED Blinking. In this example, a push button switch and an LED is connected to Arduino......

Listed under: **LED Projects**

489. **Use Arduino to Interface with a Remote Controlled Power Switch**

Update: check out the RFToy — an easy-to-use standalone gadget to control remote power sockets. Also, support for remote power sockets have been added to OpenSprinkler firmware 2.1.1. For a while I've been looking for a way to switch household power line (110V) devices. One of the simplest......

Listed under: **Interfacing(USB – RS232 – I2c – ISP) Projects**

490. **Two Wire Arduino Knight Rider**

This tutorial shows how to interface eight LEDs to an Arduino using only two Arduino pins. This is made possible by using a PCF8574 I/O expander IC. A “Knight Rider” display is shown on the LEDs. Prerequisites Complete tutorial 4 – Arduino Knight Rider. Be able......

Listed under: **LED Projects**

491. **Arduino Serial Thermometer**

The Arduino reads temperature from a MCP9700 temperature sensor IC and displays the temperature in the Arduino IDE serial monitor window. Also see the Arduino LCD thermometer tutorial (tutorial 14).

Prerequisites Complete Tutorial 9: Using the Arduino Serial Port before attempting this tutorial.

Components Besides an Arduino Uno board,......

Listed under: **Metering – Instrument Projects**

492. **Using the Arduino Serial Port**

The Arduino Uno can send data (such as a text message) to the PC over the USB cable. The Arduino IDE has a serial monitor window that can be opened and will receive and display the data sent from the Arduino board. Data can also......

Listed under: **Interfacing(USB – RS232 – I2c – ISP) Projects**

493. **Dual LED Flasher**

A two transistor circuit that flashes two LEDs on and off alternately. Prerequisites Complete tutorial two – Transistor Timer before attempting this tutorial.

Components In addition to an electronic breadboard, wire links, a 9V battery and a battery clip, you will need:
494. Arduino Melody

A very easy tutorial that uses only two components. The Arduino plays a short melody on a loudspeaker. The program to load to the Arduino is one of the programs that is built into the Arduino IDE. Prerequisites Complete tutorial 3 – Starting with Arduino..... Listed under: Sound – Audio Projects

495. Twitter Mood Light – The World's Mood in a Box using arduino

How's the world feeling right now? This box tells you. Powered by: an Arduino, a WiFly wireless module, an RGB LED, Twitter.com and a 9v battery. I'm a news junkie. I want to know everything that is going on in the world as soon as...... Listed under: Game – Entertainment Projects

496. Arduino Knight Rider

In this tutorial, eight LEDs are interfaced to the Arduino Uno board. This is not complicated – it is just like interfacing a single LED to the Arduino as done in tutorial 3, but eight times over. A program is then loaded to the Arduino...... Listed under: LED Projects

497. Arduino LCD

In this tutorial you will connect a LCD (Liquid Crystal Display) to the Arduino Uno and then run the Arduino LCD example programs that are built into the Arduino IDE. Prerequisites It is recommended for beginners to complete all the Arduino tutorials up to and...... Listed under: LCD Projects

498. Let's make an Arduino real time clock shield

Today we are going to make a real time clock Arduino shield. Doing so will give you a simple way of adding ... real time capability to your projects such as time, date, alarms and so on. We will use the inexpensive Maxim DS1307 real-time...... Listed under: Clock – Timer Projects

499. Arduino LCD Thermometer

In this tutorial, a temperature sensor (MCP9700 linear active thermistor IC) and LCD are connected to the Arduino. The Arduino reads the temperature from the MCP9700 on analog pin A0 and displays the temperature on the LCD. This video shows the circuit operating. When touched...... Listed under: LCD Projects

500. Drive with PID Control on an Arduino Mega 2560

This example shows how to simulate a simple closed-loop control algorithm in Simulink and how to run it on an Arduino Mega 2560 board. Contents Introduction Prerequisites Required Hardware Task 1 – Build the Vehicle Task 2 – Build the Motor Controller Task 3 –...... Listed under: Other Projects

501. Musical MIDI Shoes using arduino

Like many people, I often find myself unconsciously tapping my feet, whether it's along to a song or out of some nervous habit. As fun as that is though, I've always felt as if something has been missing. If only I could trigger the sounds...... Listed under: Sound – Audio
502. **MIDI Linear Actuator**

This project uses relays to control a Firgelli Automations linear actuator without feedback. The relays are controlled by the MIDI Volume (Control Change number CC7) command which is read by the microcontroller and converted into one of the only 3 states of operation: 1) The...... Listed under: Other Projects

503. **LPG sensor using arduino**

LPG sensor using arduino with alarm and cutoff. A simple LPG sensor using arduino is shown in this article. This circuit indicates the amount of LPG in the air. The circuit sounds an alarm and trips a relay when the concentration is above a predetermined...... Listed under: Sensor – Transducer – Detector Projects

504. **Make a 8×10 L.E.D Matrix using arduino**

UPDATE 1: I HAVE ADDED THE CODE FOR CONWAY'S GAME OF LIFE UPDATE 2: NOW YOU CAN SAVE SOME ARDUINO PINS WITH THE HELP OF 1 SHIFT REGISTER. In this instructable I will show you how to build a quite fancy 8 by 10 L.E.D matrix(with scrolling text and animations) using the Arduino and 4017 decade...... Listed under: LED Projects

505. **The Lightning Simulator/Breathalyzer/Graphic Equalizer – Arduino Powered using arduino**

UPDATE: A portable version of the Talking Breathalyzer is here http://talkingbreathalyzer.com The LED strips are mounted on an outdoor trellace which functions as a lightning simulator, outdoor breathalyzer, graphic equalizer synced to music, and a few other effects with sound. Materials: 8 12v RGB Waterproof Flexible...... Listed under: LED Projects

506. **Interfacing EM-18 RFID reader with Arduino Uno**

Arduino Uno is an opensource physical computing platform based on ATmega328 microcontroller and provides a development environment for writing software for the board. It can be used for a variety of projects. EM-18 RFID reader is one of the commonly used RFID reader to read...... Listed under: Other Projects

507. **Arduino + WiFi, Music Responsive LED Light Fixture using arduino**

This instructable gives instructions for constructing a Saiko5 WiFi enabled LED light fixture based on the Arduino hobbyist platform. It includes step-by-step instructions from board design to soldering to case integration, as well as instructions explaining how the software and firmware can be used to...... Listed under: LED Projects

508. **Trinket Audio Player using arduino**

Overview We usually think of the Adafruit Trinket as a tiny subset of a “real” Arduino; less RAM, less code space, less I/O. But this little chip has a couple tricks up its sleeve, things its larger brethren can't do. One of these is a...... Listed under: Sound – Audio Projects
509. **Beatfly**: Make an illuminating blimp and control it with your voice, Keyboard, MIDI Controller, Garageband file, iPhone, Flash, and more! [Mac OSX] using arduino

[Mac OSX Only] Because I use Quartz Composer, my program works only on Mac OSX. I am now extending and improving it toward cross-platform. If you have knowledge of computer programming, you can make your own system that connects to the blimp. The communication protocol...... Listed under: [LED Projects], [Sound – Audio Project Ideas]

510. **Arduino Solar Radio**

Solar charging, via the panel on the back. * 12 position switch to select channel number * Seek up / seek down controls and ‘store’ button * RDS display of call sign * Frequency display * Battery voltage display * Solar charging current display The...... Listed under: [Radio Projects]

511. **Intelligent Letter Box using Arduino and GSM**

In the days of technology postman still comes to our house for delivering the letters, couriers and parcels. Because some things like courier, parcels can’t sends via email and by using any other electronic media. So for getting notification of our letter delivery in our...... Listed under: [Other Projects]

512. **LED Umbrella with Arduino using arduino**

The LED Umbrella with Arduino combines an umbrella, an 8×10 LED matrix and an Arduino microcontroller to create a controllable, programmable LED experience in the privacy of your own umbrella. This project was inspired by the Electric Umbrella by sockmaster and a number of LED matrix instructables...... Listed under: [LED Projects]

513. **Project work3: Arduino code and the circuit diagram using arduino**

In order to realise the “music garden”, the most important part is the Arduino code and circuit diagram. First of all, I will present my Arduino code: (I will show you the way I think as a flow chart at first) Flow Chart: Details: this flow chart is a...... Listed under: [Sound – Audio Projects]

514. **Hobbyduino Mini V1.0 using arduino**

Introduction The Hobbyduino Mini is a clone of the Arduino main-board. It contains a ATMega328 processor programmed with the Arduino bootloader. The Hobbyduino does not contain the circuitry for USB communication. I opted to rely on the FTDI232R serial boards to handle the USB-to-Serial protocol. Here...... Listed under: [Development Board – Kits Projects]

515. **Build Your Own Arduino & Bootload an ATmega Microcontroller – part 1**

There are many reasons to build your own Arduino circuit on a protoboard or a custom-designed printed circuit board. At the heart of the Arduino platform is an AVR microcontroller, in usual way you need a special hardware programmer and suitable hex files to program...... Listed under: [Interfacing(USB – RS232 – I2c -ISP) Projects]

516. **High-speed Photography with Arduino and CHDK using arduino**

This project uses an Arduino microcontroller and a laser break-beam trigger to fire via USB remote a Canon camera modified with CHDK (Canon Hack Development Kit) firmware. Immediate influences are the high-speed flash photography triggered by sound or light
Looking for a simple circuit to control the light intensity of Light Emitting Diodes (LEDs) or similar lighting sources? Here is an Arduino based circuit with three independent pulse width modulated (PWM) channels to fulfil your requirements! Just follow the schematic diagram to complete the... Listed under: LED Projects

Servos are surprisingly easy to use. Even more so than simple DC motors and steppers when you have a microcontroller. In this instructable we'll use a 'duino to drive five servos which will control a doll's limbs and neck. I bought the servos at HobbyPartz.... Listed under: Game – Entertainment Projects

MIDI BASS PEDAL ARDUINO UNIT The MIDI Bass Pedal circuit is capable of encoding any number of momentary action, push to make, single pole single throw (SPST), switches from 1 up to 30 to produce the equivalent MIDI note-on/note-off data commands. The encoded switches are...... Listed under: Sound – Audio Projects

The cmd_response sketch is very general with respect to the ANALOG IN and DIGITAL I/O of the Arduino boards. We can use it to read a wide variety of sensors from remote computer systems. First, we demonstrate how the Arduino cmd_response sketch works, we construct...... Listed under: LED Projects

First and foremost, big thanks to Damien for her time and effort on soldering 265 LEDs on peggy2 circuit board, which made my programming part possible to continue. Instead of soldering LEDs directly onto the Peggy2 board, we have to use Ethernet cables as “extensions”...... Listed under: LED Projects

Do you have a pile of AA rechargeable batteries in your drawer? Some are old, some are new, but which sets would you bring with your camera on your next trip, and which ones are past their useful life? I like using rechargeable batteries, but...... Listed under: Battery Projects

After over spending nearly 20 hours extra on fixing peggy2 board I mentioned in the previous post, there is only a few hours left for me to work on CMUcam3-Arduino system and its facial-recognition driven motor system. The basic programming architecture is shown below. When in...... Listed under: Video – Camera – Imaging Projects

This is a camera controller project by Glacial Wanderer and the... Listed under: Video – Camera – Imaging Projects
Intervawhat? An intervalometer is a camera controller that signals the camera to take a picture after some set interval. This is really useful for creating timelapse videos. For a long time, I used my TI-89 calculator to create timelapse videos with my Canon digital Rebel XTi. It...... Listed under: Video – Camera – Imaging Projects

525. New Arduino WiFi Shield (Testing) using arduino

The WiFi Shield was delivered by Amazon. The Arduino UNO Rev 3 was found at RadioShack... First you need to load the last Arduino IDE (Ver 1.0.2) it has the necessary library to use the WiFi shield. Tried the examples “Scan for available networks” and ...... Listed under: Wifi – WLan Projects

526. Yet Another Daft Punk Coffee Table (5×5 LED Matrix) using arduino

Yes, I know this has been done before, but I wanted to build my own, using as few parts as possible. I built this as a table top or wall mount model, but it can be scaled up to make a coffee table. I built...... Listed under: LED Projects

527. Review – Maxim MAX7219 LED Display Driver IC using arduino

Today we are going to examine the Maxim MAX7219 LED display driver IC. The reason for doing so is to show you how something that used to be quite complex can be made very simple – and that is what all this technology is for,...... Listed under: LED Projects

528. Brushless DC (BLDC) motor with Arduino, Part 3 – The Stroboscope Project

It has been all dry theory in the Brushless DC (BLDC) motor with Arduino series up to this point. This is where it gets to be more fun. If you've just arrived, please check out the previous two installments: Driving a three-phase brushless DC motor...... Listed under: Motor Projects

529. The Wordclock Grew Up! using arduino

Well, it had to happen. I first published my WordClock project in September 2009. It was a Microchip PIC based clock, using a PIC16F877A microprocessor. In the last year and a half, I have been constantly improving it, and have adapted it to the Arduino;...... Listed under: Clock – Timer Projects

530. Light Meter Using I2C Level Converter, LCD, and TSL2561 using arduino

I recently needed to measure how different materials affect light transmission for a gardening project. I decided this was the perfect opportunity to try out the new logic level converter to run both a 5v LCD and a 3.3v light sensor on a single i2c...... Listed under: LCD Projects, Metering – Instrument Project Ideas

531. Make a simple platform and give mobility to your computer using arduino

A computer is a very handy thing to use in your robots. If you start listing all the features that can be used for robotic purposes you'll find that it is cheaper to buy a netbook than buying LCD, wifi and bluetooth modules, cameras, speech synthesizer...... Listed under: RTOS – OS Projects

532. Tutorial – Arduino and the MAX7219 LED Display Driver IC using arduino
Use the Maxim MAX7219 LED display driver with Arduino in Chapter 56 of our Arduino Tutorials. The first chapter is here, the complete series is detailed here. Update – 4/1/15 – This article is pending a re-write, please refrain from comments and questions until the new version is published. Introduction.

---

**533. Arduino Binary Die using arduino**

After buying a Nanode (an Arduino-compatible board with ethernet built-in) last weekend, we've been trying to work it out by making a couple of simple examples, the 'Binary Dice' is the first one with input and outputs. A note, this code example is based on.

**534. Boozeduino using arduino**

Now with more LED. Arduino mega powered breathalyser using the MQ-3 sensor. A relative gauge for judging how intoxicated you are. NOT TO BE USED AS MEANS OF BREATHALYZING NEVER DRINK AND DRIVE. This is more of a device to encourage one to drink.

**535. Analog Sensors using arduino**

Analog sensors produce an analog (continuous) voltage that typically varies from 0 to 5 volts. They have three wires – ground, power, and signal (typically red, black, and white, respectively). Examples shown below include: Potentiometers Proximity Accelerometers Ribbon Bend Pressure Light Temperature Sound Multi-touch Touch.

**536. Flash trigger using arduino**

This project is mainly based in this one from Glaciar Wanderer. I just liked his idea and worked it on my own. (I think this guy and me would be friends, as the projects he has in his photography category are things I've been wanting)

**537. Using the tymkrs "Turn Me" with an Arduino**

Here is a quick write up on how to use the tymkrs "Turn Me" rotary encoder. This supports the "push down" feature of the tymkrs kit. Fritzing Rotary Encoder Part: Rotary Encoder with Knob bth.fpz Fritzing Project: RotaryEncoderDemo.fzz Arduino (1.5) project: RotaryEncoderDemo.ino 1 2 3 4 5 6 7 8......

**538. Boost Converter Intro with Arduino**

Let's say that you're trying to drive a few Nixie clock tubes, or you want to make a strobe light. A variable high voltage DC power supply from 50-200+ volts may be required. Transformers are terrific, but difficult to find the right one and a......

**539. Arduino Circular Cylon!**

This is a quick arduino project that is great for beginners. Enjoy! There is a video on the last step! Step 1: What you Need To build this project you will need: 10 LEDs, any color will do. Some wire, I used a ribbon cable......
540. Car No. 06 Programmed Automatic Driving Car using arduino

Hi! Kaeru no Ojisan is back with Car No.06. Car No.06 is a Programmed Automatic Driving Car with following procedure; – Simulate the Car Trajectory based on the Target Passing Points. – Drive automatically as simulated using Reflective Photosensor and Gyro Sensor. – Adjust...... Listed under: Car Projects

541. 8 LED Chaser with 74HC595 8 Bit Shift Register using arduino

Have you wanted to make a sweet Cylon/Knight Rider (Larson) Scanner effect? But you don't want to use up all of your Arduino IO pins? Well, you can make a nice 8 LED Scanner with a shift register IC. In this tutorial we'll be using...... Listed under: LED Projects

542. 3D LED Cube using arduino

The 3D LED Cube is a really cool device that enables you to see in three dimensions, get some depth perception and has 512 LED's or 512 pixels. It is based on an arduino uno which is an Atmel AVR microcontroller on a development board...... Listed under: LED Projects

543. TiDiGino Contest using arduino

The project TiDiGino We developed a new GSM remote control called TiDiGino. The name recalls the initials (TDGxx) of our previous GSM remote control and is also based on the Arduino project. All the details of this circuit can be found below, but no the sketch, because this is your assignment. The contestYou have to write...... Listed under: Wireless Projects

544. Control Ikea Dioder LED Strip with Arduino + 16X PWM LED Fader Board using arduino

We're going to show how to wire up and control an Ikea Dioder LED strip with an arduino, using a 16X PWM LED Fader board as an intermediary. The 16X PWM board is basically a bunch of mosfets under PWM control (switches that turn on...... Listed under: LED Projects

545. Secret Knock Final using arduino

Secret Knock Description – My final project is a door lock that listens for your personalized knock. The lock uses an arduino board and a piezo speaker and will not unlock the door unless the specific pattern is used as a knock. Arduino Program ...... Listed under: Home Automation Projects, Security – Safety Project Ideas

546. Display Live Txts on Costume at Party w/ Scrolling LED Belt Buckle using arduino

This project shows how to send SMS text messages to a cheap scrolling LED display via an Android app and arduino with USB host shield. The project was originally inspired by a friend wanting to make a “sexting themed” costume, with a scrolling LED display...... Listed under: LED Projects

547. Voice Recognition System using arduino
Contents 1 Team Members 2 Mentor 3 Concept 4 Softwares Used 5 circuits 5.1 Pre Amp circuit 5.1.1 Circuit Diagram
5.1.2 Working 5.2 EEPROM circuit 5.3 Led Matrix display circuit 6 Algorithm for silence & noise removal 6.1 Pre-Emphasis 6.2 Silence and Noise Removal 6.2.1…… Listed under: Sound – Audio Projects

548. **A Makers Wedding – Photo booth using arduino**

This Instructable is about: building an automated photo booth. The total build cost was around $150 as I re-used a lot of the components and materials I already had in my garage – in addition to what I could salvage from scrap yards.

Why? ...... Listed under: Video – Camera – Imaging Projects

549. **Extending PWM output pins with a Texas Instruments TLC5940 LED driver using arduino**

Introduction Microcontrollers like the Arduino were designed to facilitate the use of electronics for designers and DIY enthusiasts. The interface provides a great starting points for a variety of elecronic circuit designs. However, as the microcontroller is standardized, it is also limited in its use...... Listed under: PWM Projects

550. **Human Body Infrared Smoke Temperature Alarm System with Arduino**

Web site: http://www.instructables.com/id/Human-Body-Infrared-Smoke-Temperature-Alarm-System/ Project Summary: The Human Body Infrared Smoke Temperature Alarm System works under the DC 5v voltage and uses the DH11 Temperature Module to detect the room temperature. When the module detects the temperature is higher than the maximum, the buzzer alarms and...... Listed under: Security – Safety Projects

551. **1RE45 Non contact digital thermometer using arduino**

Contents 1 Introduction 2 Components Used 3 Description 4 Idea 5 Plan Of Action 6 1st week: 7 2nd week: 8 3rd week: 9 4th week 10 5th week 11 Expenses(In Rupees) 12 Videos, Photos 13 Code 14 Team Members 15 Resources: Introduction Temperature is...... Listed under: Temperature Measurement Projects

552. **How to build an Arduino energy monitor – measuring mains voltage and current arduino**

Including voltage measurement via AC-AC voltage adapter and current measurement via a CT sensor. This guide details how to build a simple electricity energy monitor on that can be used to measure how much electrical energy you use in your home. It measures voltage with...... Listed under: How To – DIY – Projects, Temperature Measurement Project Ideas

553. **VOICE CONTROL CAR USING ARDUINO AND ANDROID**

Hello friends,Welcome to ElectroPLUS . This is a post to show how to make voice control car using arduino and android. COMPONENTS REQUIRED: 1.Arduino uno or Induino R3 board. Hello friends,Welcome to ElectroPLUS . This is a post to show how to make voice control...... Listed under: Car Projects, Sound – Audio Projects

554. **A new board for the 3Drag; there's more than Sanguinololu using arduino**

When we first released our 3D printer, we tried to use some parts that were already available and tested, in full respect of the open source philosophy. In particular, we decided to use the electronic card Sanguinololu. The “open” firmware we chose, the
555. **Temperature Detecting Heating Control System with Arduino Mega2560**

Project Summary: To help electronic DIY hobbyists, we will show you how to use Temperature Detecting Heating Control System with Arduino Mega2560. Full Project: The temperature detecting heating control system works with DC5V voltage. This system uses DS18B20 temperature detection chip as the...... Listed under: **Temperature Measurement Projects**

556. **Camera and flash trigger module using arduino**

Here we go again, here is a picture of the camera and flash trigger module I made for my arduino photographic projects: It includes three 4N26 optocouplers. One (first one from the left side) to trigger a flash, as I did in the arduino controlled...... Listed under: **Video – Camera – Imaging Projects**

557. **3x3x3 LED cube shield using arduino**

What should be in your kit: 1 – PCB 27 – LED's 2 – 6 Pins for Arduino 2 – 8 Pins for Arduino 3 – Resistors 1 – Foam Guide 1 – Small Wire 1 – Medium Wire 1 – Large Wire You will...... Listed under: **LED Projects**

558. **MQ-8 Hydrogen Gas Sensor Circuit Built with an Arduino**

In this project, we will go over how to build a hydrogen gas sensor circuit with an arduino. The hydrogen gas sensor we will use is the MQ-8 sensor. This is a sensor that is sensitive to effects of hydrogen gas. Hydrogen gas (H2), at...... Listed under: **Sensor – Transducer – Detector Projects**

559. **Simple Solar Power using arduino**

Simple Solar Power Light contains energy. When light hits a conductor (or semiconductor) some of the energy is translated into moving electrons, creating current. We can harness the current using solar cells (aka photovoltaic cells). When the sun shines on a solar cell, the current...... Listed under: **Battery Projects**

560. **Arduino-enabled Patron Interaction Counting using arduino**

Using the Arduino development board (http://arduino.cc) has become a very popular way to create hardware prototypes that bridge the divide between the physical world and the Internet. This article outlines how to use an Arduino, some off-the-shelf electronic parts, the Processing programming language, and Google...... Listed under: **Internet – Ethernet – LAN Projects**

561. **Using an RGB LED to Detect Colours using arduino**

I am going to show you how you can use an RGB LED and a Cds photocell as a colour sensor for a micro-controller. I will illustrate the method to retrieve a colour using Arduino, and I will show you a how you can verify the...... Listed under: **LED Projects**
562. Reviving a dead arduino
Well I managed to kill my arduino. It no longer accepted uploads with the classic out of sync error. After asking on the arduino forum I was told I would need a high voltage programmer to rectify, so I decided just to buy a new...... Listed under: Development Board – Kits Projects

563. Cosmic ray detection from vertical and horizontal directions using three Geiger counters using arduino
Research Group: Ryan Mountcastle, Minh Trang Nguyen, Nathan Ranno, and Ryan Ward Launch: Whitworth Fall 2012 This experiment was designed to examine cosmic ray activity in the Earth's atmosphere as altitude increases. The previous group's project utilized three Geiger counters stacked vertically to eliminate false...... Listed under: Other Projects

564. Using the Parallax RFID Reader with an Arduino
If you've ever wanted the ability to use some form of hardware-based authentication in your projects then this is the board to do it with. The Parallax RFID (Radio Frequency Identification) reader is super easy to configure. It only takes four wires! It uses serial...... Listed under: Projects, RFID – NFC projects

565. Build a network clock (NCLK) with Microduino-RTC
The resolvent of clock synchronization over internet. by PKJ, The web–based clock management system allows you to monitor clock status from wherever they are and centrally change settings. and this small device is built with PoE technology, thus IP clocks get their time, data and power...... Listed under: Clock – Timer Projects, Internet – Ethernet – LAN Projects

566. TFT Display with microSD breakout board using arduino
128X160 pixels in 18 bit color with a microSD breakout board courtesy of Adafruit Industries You can purchase the 18-bit color TFT LCD display with microSD card breakout kit (part# ST7735R) from Adafruit Industries This tutorial from Adafruit is for a 1.8” diagonal TFT display...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, LCD Projects

567. SPI Interfaces using Arduino
Update (6/7/2012) – I've had to disable comments on this post, because it is being targeted by spam bots for some reason. Please use the contact page if you have a question about this topic. [box type="note" color="#202020" bg="#bb00" font="verdana" fontsize="14" radius="20"...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

568. Awesome button, and then some, using arduino
Many of you have probably seen the Awesome button done by Matt Richardson of Make Magazine. If not here is his video which was very well done and was the inspiration of my project. I liked the idea of having a button to press for...... Listed under: LED Projects

569. Secret Knock Detecting Door Lock using Arduino
Protect your secret hideout from intruders with a lock that will only open when it hears the secret knock. This started out as a bit of a joke project, but turned out to be surprisingly accurate at judging knocks. If the precision is turned all..... Listed under: Home Automation Projects, Projects, Sensor – Transducer – Detector Projects

570. The Soil Temperature Sensor using arduino

You are building a soil temperature sensor. We need a waterproof thermometer that we can bury in the soil. The sensor is made up of a small circuit enclosed in a piece of heat shrink (to waterproof it). Supplies: (see the parts page) an LM335..... Listed under: Home Automation Projects, Temperature Measurement Projects

571. Arduino RFID Card Reading

Finally! It's been about 3 months since my last arduino tutorial - I've been keeping busy as usual. I've been working on this one for some time. I got the parts months ago, made an outline a few weeks ago, prototyped the circuits and wrote...... Listed under: Projects, RFID – NFC projects

The one wire Digital Temperature Sensor – DS18B20 from Maxim (formerly Dallas) is a great chip for measuring temperature in your projects. Luckily, there is a Dallas Temperature library for the arduino which makes using this sensor very easy. The most recent version of this..... Listed under: Interfacing(USB – RS232 – I2c -ISP) Project Ideas, Temperature Measurement Projects

573. Traffic Light Stoplight LED Scarf – Safety Scarf of Righteousness using arduino

Multipurpose like a traffic light, this one keeps you warm and blinks to make you more visible in the night. Stop traffic with this fun scarf worn around your neck. Repurpose a dollar-store bicycle safety flasher to embed in the scarf. Simulates the light changing..... Listed under: LED Projects

574. Soldering an SMT MOSFET Driver with a hotplate

Soldering SMD components isn't as hard as you might think. In fact it's easy. If you follow this instructables you'll soon see just what great results you can obtain at home using just a hotplate. It's not just being able to make small circuit boards...... Listed under: Development Board – Kits Projects, How To – DIY – Projects

575. 3D AIR mouse | Arduino + Processing

3D AIR mouse | Arduino + Processing I'm an Industrial design student, and last year as part of a course called “Technology as RAW materiel" I built this project as my final work. I work most of the time with SolidWorks, a CAD software for...... Listed under: Arduino Programmer Projects, Projects, Sensor – Transducer – Detector Projects

576. Twitter Poem Box

This is a project that was inspired by Marc de Vinck's Kitty Twitty Cat Toy http://makezine.com/22/kittytwitty/. It incorporates an RFID reader and the BlinkM, a programmable RGB LED. The lamp tweets random colored poems when it detects one of the three RFID cards which...... Listed under: Internet – Ethernet – LAN Projects

577. BennyP's Light Contraption using arduino
Introduction Disclaimer: I am not an expert in any of this. There is lots of information online regarding such designs. Although this setup worked for me, do not trust any of my calculations. Please work all this out for yourself and consult many other sources.

578. **ST7565 LCDs: Graphical LCDs**

What it is... Type: Graphical (128×64) monochrome LCD with LED backlight Interface: Serial / SPI This is a good time to read the datasheet Available from: Adafruit, of course! Introduction: This mini-tutorial will go through the process of setting up a ST7565 LCD. These LCDs...... Listed under: **Home Automation Project Ideas, PWM Projects**

579. **Standalone Arduino chip on breadboard**

If you're like me, after I got my Arduino and performed a final programming on my first chip, I wanted to pull it off my Arduino Duemilanove and put it on my own circuit. This would also free up my Arduino for future projects. The problem...... Listed under: **Development Board – Kits Projects, Projects**

580. **Making 1×10 LED Array with Random Patterns**

This will teach you how to make a very simple 1×10 array of LEDs on a breadboard controlled by an Arduino Uno to make the LEDs blink and flash in 10 different patterns. Link to notebook for project: https://docs.google.com/document/d/1YP4p115bDN0nM7mDn-sRjLnxGPJ6o0DkrFZnznVMvk/edit Link to YouTube video of LEDs...... Listed under: **LED Projects**

581. **Arduino lets you play Atari 2600 and ZX Spectrum using a NES controller**

This instructable shows you how to use NES controller in Atari 2600 or ZX Spectrum (with Kempston Interface) with the aid of an Arduino. Step 1: Background talk I have recently acquired a couple of Atari 2600s and a bunch of joysticks. Both consoles were working...... Listed under: **Game – Entertainment Projects, Projects**

582. **Yet Another Arduino 110v Power Controller**

This Instructable shows you how to build a four-gang outlet box in which each outlet is controlled via an Arduino (or any other TTL level signals). It differs from the other relay boxes in that it uses no circuit boards and has very few parts (one...... Listed under: **Projects, Solar energy projects**

583. **Pololu Dual MC33926 Motor Driver Shield for Arduino**

This shield makes it easy to control two brushed DC motors with your Arduino or Arduino-compatible board. Its dual MC33926 motor drivers operate from 5 to 28 V and can deliver a continuous 3 A per motor. These great drivers also offer current-sense feedback and accept ultrasonic...... Listed under: **Motor Projects**

584. **Displaying Twitter feed without a PC! using Arduino**

There are a lot of Twitter feed readers around the Web that use Arduino AND a PC to display twits on LCD displays or whatsoever. Then, I decide it was the time to design a solution for performing the same job WITHOUT A PC, and...... Listed under: **Internet – Ethernet – LAN Projects, LCD Projects**
585. **Geiger counter triggered LED decorations using arduino**

Bored of blinky lights that blink in response to time? Make them blink with space instead! This instructable shows a quick method for connecting LED tree decorations to a Geiger counter via arduino, so that the lights blink between different strings each time radiation is... Listed under: **LED Projects**

586. **Arduino ISP (In System Programming) and stand-alone circuits**

We use an Arduino to program other ATmega without bootloader. This technique allows you to use all flash memory for code and make boards using new ATmega, cheaper than those with bootloader. The qualities that have made the success of Arduino are undoubtedly the open-source...... Listed under: **Arduino Programmer Projects**

587. **Digispark RGB LED Fader**

Forward: This instructable was originally posted at http://www.instructables.com/id/How-to-make-LED-Fader-using-Digispark/ My students and I developed it into this exemplar, for which they received a very good mark. Viewing the following video may leave you with a sense of too much too fast. Please continue to read this...... Listed under: **LED Projects**

588. **pedalSHIELD Arduino Guitar Pedal**

Web site: http://www.electrosmash.com/pedalshield Project Summary: pedalSHIELD is a programmable Arduino Open Source & Open Hardware guitar pedal made for guitarists, hackers and programmers. Users can program and share their own effects in C/C++. Full Project: pedalSHIELD is a programmable Arduino guitar pedal. It is Open...... Listed under: **Sound – Audio Projects**

589. **World’s Smallest Stepper Motor with Arduino and EasyDriver**

This little wonder of electromechanical engineering came from inside a laser diode sled of an HP CT10L Bluray drive I’ve opened some time ago. The device on the picture consists of several parts, all easily fitting on a dime coin: a bipolar stepper motor with...... Listed under: **Motor Projects**

590. **Telemetry with solar cell using an Arduino**

*NOTE* THIS PROJECT IS DONE BY A GROUP OF STUDENTS FROM SINGAPORE POLYTECHNIC. Telemetry – Solar Cells Our project is using Arduino with the ZigBee to transmit and receive data from the solar cell. Data will be shown in the LCD and the software called...... Listed under: **Battery Projects, Metering – Instrument Projects, Projects, Solar energy projects**

591. **An I²C Bus powered Arduino IO Expander Board controlled via Bluetooth and Android**

Today we'll expand Arduino's digital resources thanks to an I2C bus equipped shield and we'll allow the management of the board via a bluetooth connection RN-42 through an Android systems. All Arduino boards feature a number of digital I/Os. For the simplest projects, such resources...... Listed under: **How To – DIY – Projects, Interfacing(USB – RS232 – I2c -ISP), Project Ideas**

592. **Linking an Arduino to a Radiometrix NTX2B Transmitter**
Part 1 – Test Circuit and Test Code Introduction Getting your Arduino to transmit via the radio initially may seem daunting but its actually pretty simple. Please freely substitute the word “Arduino” for any micro-controller you wish to use. The example below works for 5V...... Listed under: Wireless Projects

593. Solar USB Charger 2.0

Everyone has USB gadgets. It’s pretty much a fact of life. Another fact of life is that these USB gadgets also continually run out of power when you most need them. No need to fear, solar power is here! Ditch those crazy wall adaptors, throw...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Solar energy projects

594. 0 to 99 Light display

This circuit will take a light reading then display a number between zero and 99 please leave constructive comments

Step 1: Parts you will need

<table>
<thead>
<tr>
<th>Major Components in Project</th>
</tr>
</thead>
</table>
| make the 0-99...... Listed under: LED Projects

595. PS/2/You: Go-anywhere, LED digital message board using Arduino microcontroller

Combine three inexpensive LED matrix display panels, an Ardweeny microcontroller and a standard PS/2 computer keyboard into your own go-anywhere, instantly updatable 768-pixel digital message board. The code can hold up to six lines of text with a maximum of 100 characters each. Pressing a...... Listed under: LED Projects

596. Solar Tracker Relay circuit using Arduino

I’ve reached the point where I need to think how I’m going to control the motor & linear actuator for my solar tracker. Things to consider – Must be able to go forwards and backwards – so that makes 4 channels, 2 for each motor...... Listed under: How To – DIY – Projects

597. BARC Jeep – An XBOX Controlled Power Wheels

Make a power wheels jeep that is controlled by an XBOX controller. This particular build is using Power Wheels® Jeep® Hurricane with Monster Traction™ but should be usable across many different types of power wheels with small adjustments. I wanted to do this project so I could...... Listed under: Car Projects, Game – Entertainment Projects

598. Nick Smith – Magical Music Box using arduino

This is my Magical Music Box which converts music into a light show. When i was daydreaming what to make for my final project, i wanted something that would make a light show for any song simply by hearing it. Materials used: 1x arduino 8x...... Listed under: Game – Entertainment Projects

599. Interactive LED Lab Coat using Arduino

This is an instructable for the Interactive LED Lab Coats, showcased at Autodesk University. Check out the videos below! The first is a demo of the colors actuated by the buttons. The second is a demo of the breathalyzer! (this will be explained later) Tools ...... Listed under: Home Automation Projects, LED Projects, Projects
600. **Sleep Tracking using an Arduino**

Background and motivation This project was motivated by two things: my almost complete inability to get out of bed in the morning, and my fondness for recording data from routine activities and making graphs with that data. My main problem with waking up in the...... Listed under: Home Automation Projects, Metering – Instrument Projects, Projects

601. **Arduino Controlled RGB LED Dot Matrix Board**

This project is a relatively straightforward and simple DIY music board. The Dot Matrix Board will allow any aged person to create their own music and beats. All you need to have is an understanding of Arduino and circuitry. Step 1: Gather Parts Needed [box...... Listed under: LED Projects

602. **5x5 rgb lpd6803-led matrix arduino controlled**

what: a 5*5 rgb led matrix, made with arduino and lpd6803 based leds from adafruit. with an pir sensor, it goes on if it detects movements and a ir distance sensor, 1 animation shows the distance you have from the sensor :). why: because its...... Listed under: LED Projects, Projects

603. **An Open Source, hackable Digital Clock**

Andrew O’Malley, an amazingly creative maker, created this fantstastic Open Source Arduino-based clock that can display the time in many different ways: if not enough, one can also add his own personal animation. Compared to other clocks based on Arduino, this one has two distinctive...... Listed under: Clock – Timer Projects

604. **Tiny Wearable LED kit – 12 PWM LEDs from a reprogramable ATtiny85**

This instructable covers the assembly and use of a Tiny Wearable LED kit. The kit is useable immediately but is desigend to be hackable and can be reprogrammed to your liking using an ISP programmer or Arduino board and the Arduino IDE. There are not...... Listed under: LED Projects, Projects, PWM Projects

605. **Infinity Mirror – Tony Stark Arc-Reactor thing using arduino**

I'm creating a robot, but am finding that it's better if I break the build down into smaller projects. This is one of those projects, and it seems to have a look that could be used for other things as well. Step 1: Destroy a lady's...... Listed under: Battery Projects

606. **Ultraviolet nightlight, ingredients and setup**

This simple instructable will show you how to make a nightlight out of a translucent container, a bottle of tonic water, an Arduino, and ultraviolet LEDs. If you've ever played with a black light, you've noticed that some substances glow brightly under these lights. In...... Listed under: LED Projects

607. **LCD & Keypad Shield Quickstart Guide using arduino**
The 16×2 LCD And Keypad Shield is very simple to use because it's fully compatible with the Arduino “LiquidCrystal” library. You can initialise the LCD and display messages on it with just a few lines of code, but it also gives you the flexibility to...... Listed under: LCD Projects

608. Arduino Esplora Light Calibrator

This sketch shows you how to read and calibrate the Esplora's light sensor. Because light levels vary from one location to another, you need to calibrate the sensor for each location. To do this, you read the sensor for a few seconds, and save the...... Listed under: Development Board – Kits Project Ideas, LED Projects, Projects, Sensor – Transducer – Detector Projects

609. MultiMovEDIA

The title “MultiMovEDIA” does not mean much – if anything – at first sight. However, looking at more carefully, we can see it is a composition of two words: “Multimedia”, referring to the information content and the channels it uses (text, image, sound), and “Move”,...... Listed under: Sound – Audio Projects

Introduction: Give a brief description of what you are trying to solve. Include a high-level overview of what you made, why you made it, what parts you used, and what it does. In today's growing technology, it seems every little electronic is becoming touch or motion sensored...... Listed under: Car Projects

611. Python Meets the Arduino

Arduino is an open-source electronics prototyping platform based on flexible, easy-to-use hardware and software. Python is our favorite programming language that allows you to integrate systems more effectively. Learn how to use Python to ... Listed under: Internet – Ethernet – LAN Projects, Projects

612. Alarm Clock with Tetris to Prove You're Awake using Arduino

This is an Arduino powered alarm clock that after hitting snooze twice the alarm will not cancel until the user has cleared 4 lines in the game Tetris. You physically turn the clock sideways, so the screen is vertical, to play Tetris. It's never fun...... Listed under: Clock – Timer Projects, Home Automation Projects, Projects

613. Arduino Mobile Processing

How the mobile sketch works: The brain of the system is really on the arduino or the web page the phone requests. ... The phone just passes any data it sees back and forth. ... For the phone app to run, it needs...... Listed under: Phone Projects

614. Localizer with SIM908 module using arduino

The device is based on a GSM/GPRS module with included GPS. Its main function is to detect and communicate its own geographical position using, on the choice, the cellular phone reference system or the GPS. Its small dimensions are due to the use, for the...... Listed under: GPS Based Projects, Phone Projects

615. Lego Spybotics with Arduino
A friend gave me his old Lego Spybotics robot, however, the programming environment that goes along with it is a bit too orientated to the younger user. So why not control it using an Arduino? Step 1: Open up! In order to get this robot...... Listed under: Home Automation Projects, Robotics – Automation Projects

616. Arduino animatronics- make your awesome costumes more awesome

Here's how to add lights, sound and action to your favorite Halloween project using the open source Arduino microcontroller. Arduino is easy to learn to use and it opens up a whole new world for costume builders and creature creators. If you want to learn...... Listed under: Game – Entertainment Projects, Projects

617. Custom Large Font For 16×2 LCDs using arduino

A couple of years ago i was learning to use the Ardiuno and started playing around with an Hitachi HD44780 based 16x2 LCD screen. I soon learned that the screen has 8 customizable character slots. I had found a project where someone used those slots...... Listed under: LCD Projects

618. CARduino – Arduino-Powered, LabVIEW-Controlled Vehicle

The CARduino is a remote-operated vehicle which is controlled by a controller attached to a computer running LabVIEW. The vehicle is powered by the Arduino, and can be expanded upon through the addition of sensors or other devices. Using LabVIEW, one can easily modify the...... Listed under: Car Projects

619. Read analog data directly in Processing using arduino

This instructable presents a fast an easy way to use data received from an analog sensor in Processing. You will learn to utilize the Arduino and prototype electronic boards to read meaningful data from the environment. The sensors can be affected by the light, the...... Listed under: Arduino Programmer Projects

620. The Arduino Noise Machine

Okay, okay, I know you all were wondering what I am up to now. I love synths and so, I built this. There are three things that can catch my attention: Synthesizers, Amplifiers and free. The other day (Actually it was just Thursday) I was...... Listed under: Projects, Sound – Audio Projects

621. The Soil Moisture Sensor using arduino

You are building a cheap soil moisture sensor so the brain can read the amount of moisture in the soil. The version we are building is very low tech, but it is also very cheap and easy to build. It consists of a block of...... Listed under: Home Automation Projects, Temperature Measurement Project Ideas

622. Arduino theremin like musical instrument

When I got my Arduino protoshield from sparkfun, I wanted to make something cool with it. And since I had seen a few Theremin projects before, and already thought about making some, I finally made one, using the Parallax PING sonar sensor. Here are some...... Listed under: Projects, Sensor – Transducer – Detector Projects

623. Mouse Control With Pushbuttons using arduino
Overview In this lab, you'll build an alternative computer mouse using an Arduino Leonardo using pushbuttons to move the mouse left, right, up and down. You'll see the difference between reading a digital input continually and reading for a change of state.

624. **G Meter using arduino**

I have a late 80's VW and the gauge cluster has 5 dummy LED locations underneath the other warning lights. Well I was tired of the m not doing anything, so I decided to do something about it. I came up with the idea to...... Listed under: **Metering – Instrument Projects**

625. **Xbox 360 RF module + Arduino**

I was going to make a huge write-up on this, but I can't be bothered right now. I'll probably do something about it later. Until then, have an Arduino sketch. If you don't know what you're doing with it then chances are you don't have...... Listed under: **Radio Project Ideas, Wireless Projects**

626. **Robotic Talking Turret using Arduino**

Here I will show you an overview on how to make a robotic talking turret, loosely based off of the turrets from the popular game, Portal. This instructable should help anyone wanting to do an animatronics project. For more detailed pictures, go to: http://razorconcepts.net/turret.html This...... Listed under: **Projects, Robotics – Automation Projects**

627. **New Textiles 2012 using arduino**

Twist Switch by ttseng Through the action of twisting, swatches of conductive fabric are folded in upon each other, completing a circuit that then turns on LEDs. On each face of stretched spandex are swatches of conductive fabric. Before choosing which swatches to designate as...... Listed under: **LED Projects**

628. **Demystifying 4 pin RGB LEDS (Radio Shack 276-0028) using arduino**

RGB LEDs are fairly useful in projects allowing for a wide range of color from a single unit. However they can be a pain in the neck to work with and they too often come with little or no documentation. I searched for some time...... Listed under: **LED Projects**

629. **Connect the arduino and make the speaker play**

To make your Arduino to play a melody you need these accessories. One 5 ohm speaker One Arduino uno board One Push button One 10 kohm resistor 8 leds And a lot of core wires Step 1: Connect the arduino and make the speaker play This...... Listed under: **Sound – Audio Projects**

630. **Team 1 Final Project Report & Video: Arduino Video Game System using arduino**

Introduction We built a video game system that can play either Snakes or Pong. We saw a project called “Arduino Pong” and wanted to recreate it with our own twist. Description Parts Needed: Arduino Uno Video Game Shield 2 LEDs 2 non-latching push buttons 2...... Listed under: **Game – Entertainment Projects**
I am a big fan of programming but I like to keep it down to 555 timer but when it comes to complex functions like flashing a LED in a certain pattern programming is necessary. One day while surfing through the Internet, I came across something known as Morse code. I decided...... Listed under: Arduino Programmer Projects

In this instructurable I will show you how to make a simple robotic arm controlled by 4 servos, 2 analog joysticks, and an Arduino UNO. It is very similar to my “2 Servos + Thumbstick” instructurable. This tutorial is in particular to help out another...... Listed under: Robotics – Automation Projects

One of the goals of Movable Party is to provide an interactive experience for audiences/participants. Since power will be generated from a hub motor attached to the rear wheel of each bike (see this post), the speed of the rear wheel directly translates to the...... Listed under: CNC Machines Project Ideas, Temperature Measurement Projects

Simple digital cameras can produce remarkably good quality photos and are now cheap enough that it doesn't hurt the wallet too much to buy one with the intention of modifying it for use in a project. You may even already have an old digital camera...... Listed under: Video – Camera – Imaging Projects

In order to “visually” highlight the behavior of Arduino programs you must connect a device to the I/O pins, which gives you tangible signals. Normally, if you want to check if a program changes a level of an output pin, answering a command or executing...... Listed under: Development Board – Kits Projects, How To – DIY – Projects

This summer, my hackerspace LVL1 (in Louisville, Ky) got an awesome laser cutter http://fslaser.com/40w-deluxe-hobby-laser-engraver-and-cutter. LVL1 is an awesome community of creative folks that like to build stuff. You can always check out what we are up to at http://www.lv1.org. If you like instructables and making...... Listed under: Clock – Timer Projects, Projects

There are many electronic devices that use the SPI bus, or Serial Peripheral Interface bus, for communications (e.g. various sensors, LCD displays, digital potentiometers, D/A and A/D converters, wireless transmitters and receivers, audio volume controls). The devices receive data serially from a microcontroller using a...... Listed under: Battery Projects
638. Solar Powered LED/Ultracapacitor Arduino Regulated Light

This instructable primarily shows how to control the charging voltage from a solar panel to an energy storage device (capacitors in this case). I showed how to construct the light previously http://www.instructables.com/id/Human-Powered-Light-from-my-book-Doable-Renewab/ Step 1: This solar panel can produce up to 18 volts, but my...... Listed under: LED Projects, Projects

639. Arduino – based camera trigger unit

I developed the camera trigger unit in order to synchronize various events and actions during free-flight experiments with hawkmoths in the wind tunnel described in a previous post. More specifically, the goal was to trigger multiple high-speed cameras and have LEDs that indicate the exact...... Listed under: Home Automation Project Ideas, Video – Camera – Imaging Projects

640. Bouncing Multicolored LED line

This is an arduino controlled project and uses leds, jumper wires, and a breadboard. This is one of my first attempts on programming arduino and I am pleased with the outcome. I'm ten years old and I just started programming 2 weeks ago. Step 1:...... Listed under: LED Projects

641. Airmonica – a free-air musical instrument

improvise + harmonize + customize The airmonica is a easy-to-learn tweakable musical instrument that you can use to perform harmonic musical ditties by accompanying a tri-tone arpeggiator. There are endless opportunities to expand the airmonica in any way that will make it your own...... Listed under: Sound – Audio Projects

642. Controllers and Sensors using arduino

Intro The Arduino microcontroller board is able to supply a current of 40mA from its output connections. These digital outputs are fixed at 5V “ON” or 0V “OFF”. This is adequate for working with LEDs but devices such as motors, solenoids, high brightness LEDs etc...... Listed under: Motor Projects

643. Programming Arduino in C++11 — ROM dumping

In this tool-assisted education video I show how to program an Arduino Atmega2560 board in C++11 to dump a ROM chip, such as a 386sx BIOS or a Famicom cartridge ROM. I also make a ZMODEM sender and a LED blinker in this video. Sorry...... Listed under: Arduino Programmer Projects, Projects

644. Arduino Automatic Watering System For Plants Sprinkler

Last month, Elecrow have left from the original oce and moved to a new oce. We will miss our original office where we worked so hard for more than two years, we will miss everything here, the desks, the windows, and those potted plants, that...... Listed under: Home Automation Projects

645. The iButton garage-door opener using an Arduino
I've made an iButton garage door opener and logger. On a Dutch (kind of) eBay (www.marktplaats.nl) I found some iButtons and readers very cheap. I had no idea what to do with them, but I bought them anyway. My garage opens with a push on a…… Listed under: Home Automation Projects, LCD Projects, Projects

646. **RFM12B – Part 1 – Hardware Overview**

To see how RFM12B wireless compares to other similar wireless options (e.g Xbee, XRF etc..) check out this well compiled comparison overview by Stuart Poulton: http://blog.homelabs.org.uk/wireless-connectivity/. Overview Made by Hope RF, re-branded by RFsolutions in the UK. Sometimes called ‘Alpha RF’ Low cost RF transceiver (from Rapid, Farnell,…… Listed under: Radio Project Ideas, Wireless Projects

647. **Arduino Throttle Body Synchronization Shield**

A common Motorcycle maintenance task is to synchronize the throttle bodies on the engine to smooth out any rough idle. This is done by monitoring the vacuum on each throttle body and using the idle screw to make the adjustment. While this sounds rather advanced,…… Listed under: Car Projects, Projects

648. **Ardusumo: an Open Source Platform for Fighting Robots using Arduino**

The idea Ardusumo is a universal platform to build robots on wheels that can move around avoiding obstacles using infrared sensors and follow routes marked with dark lines on a white background. We have created Ardusumo to bring young students to the world of robotics:…… Listed under: Projects, Robotics – Automation Projects

649. **BUILD YOUR OWN LASER HARP using Arduino**

The laser harp is a musical instrument made of light. A fan of beams shoots up from the floor into the night sky. The performer can create music by placing their hands in the beams. Not only does “breaking” the beam produce notes, but sliding…… Listed under: Game – Entertainment Projects

650. **Touch Control Panel using Arduino**

Small 4-wire resistive touchscreens are now amazingly cheap: they are produced in such enormous quantities for mobile phones, PDAs, and particularly handheld games such as the Nintendo DS that they can be bought brand new for under US$10. Larger touchscreens are also rapidly falling in…… Listed under: Sensor – Transducer – Detector Projects

651. **Arduino + 2 Servos + Thumbstick (joystick) using arduino**

In my other 2 Arduino tutorials I have help new users to play tones and making 2 servos move with a mouse. This time I will help you move the same 2 servos with a thumbstick. And again I have surf the internet to see If there…… Listed under: Motor Projects

652. **Stepper Motor drive from Arduino**

Stepper Motor drive from Arduino In this tutorial we will show you how to connect a bipolar stepper motor to an Arduino Uno board. The stepper motor we are using is the Sparkfun Stepper Motor but you can use any other 4-wire bipolar stepper motor…… Listed under: Motor Projects
653. **UVic Quadcopter using Arduino**

Hardware Controller

The Arduino platform is selected for this project, mainly due to its open software and hardware nature which has resulted in availability of extensive technical information. As a result there are many tutorials and example project available for this platform. A list of...... Listed under: [Car Projects](#), [Robotics – Automation Project Ideas](#)

654. **How to: Use Arduino to Generate Glitchy Audio VGA Visuals**

This post is a guide for people that are interested in my previous posts about dual monitor VGA hacking (see 1, 2 and 3). You will need: • A laptop or a computer with a VGA output • A breadboard (optional) and some wires or...... Listed under: [Sound – Audio Projects](#), [Video – Camera – Imaging Projects](#)

655. **Hacked Pan and Tilt Camera Mount**

So my sister managed to break a pan and tilt camera mount and naturally thought daddy can fix this. After sitting on my dads workshop bench for a while he had a go at it and couldn't work out how to fix it so it...... Listed under: [Video – Camera – Imaging Projects](#)

656. **Adafruit Arduino Motor Shield Build**

Overview

The Arduino Motor Shield is based on the L298 (datasheet), which is a dual full-bridge driver designed to drive inductive loads such as relays, solenoids, DC and stepping motors. It lets you drive two DC motors with your Arduino board, controlling the speed and...... Listed under: [Motor Projects](#), [Projects](#)

657. **How to make fist pumping with LED animation using Arduino**

It's to make a fist pumping LED controller. What is it? Have you noticed yourself fist pumping to the music at a party or a club? That's exactly for that. You would wear a band with a accelerometer/gyro mounted. As you move your hand around...... Listed under: [LED Projects](#), [Projects](#)

658. **Developed on Hackaday: First Version of the Hardware**

The Hackaday writers and readers are currently working hand-in-hand on an offline password keeper, the mooltipass (click to see the project description). Next in our Developed on Hackaday series, we present the first version of our schematics. There's already been a lot of discussions going on in...... Listed under: [Security – Safety Projects](#)

659. **DIY Teagueduino**

What is Teagueduino? Teagueduino is an open source electronic board and interface that allows you to realize creative ideas without soldering or knowing how to code, while teaching you the ropes of programming and embedded development (like arduino). Teagueduino is designed to help you discover...... Listed under: [How To – DIY Projects](#), [LED Projects](#)

660. **Automatic blind hooked up to existing projector screen using Arduino**
Hello my name is Chipsy, I'm French, reading instructables since at least 2 years, it is the first entry i make on this website. Why i made this project : I have a small homecinema system in my living room, with a projector and a...... Listed under: Home Automation Projects, Projects

661. MenZ-DECK

About a year ago, we drunk beer in The-MenZ Lab. When Zagan said “I want PCDJ controller, So next project is make controller!”. The project began at this time. ***MenZ-DECK featured by Maker Faire UK Blog.***

662. Arduino Watch Build Instructions

Update: New version out that works with Arduino 1.0 and higher! The Arduino Watch provides augmented sensing of temperature and range, 16-bit color drawing program, Breakout game, and also tells the time in your choice of digital, binary, or analog. Additional sensors, devices, and programs..... Listed under: Clock – Timer Projects, Projects

663. GSM Remote Control – GSM Module

This GSM Mobile is used for our Remote Control (for example Gate Control, Temperature Control...). We use the word ‘module’ because, unlike what we did in our remote control projects, this time around the mobile phone is not mounted on a printed board, but rather on...... Listed under: Phone Projects

664. Interface a rotary phone dial to an Arduino

An old rotary phone can be used for a number of purposes in your Arduino projects – use it as a novel input device, or use the Arduino to interface a rotary phone to your computer. This is a very basic guide describing how to...... Listed under: Interfacing (USB – RS232 – I2c – ISP) Projects, Phone Projects, Projects

665. Arduino Controlled Can Crusher With LCD Readout

I have always wanted to do an instructable, but I never had a somewhat original idea that hasn't been done a million times, or something that had no means of building. I have some friends who recycle aluminum for money and after seeing the large bags of an unknown...... Listed under: Home Automation Projects, LCD Projects, Projects

666. Arduino ATmega328 – Hardcore

Ok, you've completed your prototype using an Arduino Uno board, perhaps using a shield or a breadboard for any additional components, but now you want to finalise your design and construct it using your own pcb. Well, that is fairly straightforward, as we have made...... Listed under: Arduino Programmer Projects

667. Computers are Dumb

Objective: Overcome your fear of computers! If you can count to two, then you can master the basics of computers. If you think computers are smarter than you, you are wrong and I will prove it. For normal people, just follow the LOG: comments. Computers...... Listed under: RTOS – OS Projects
Magnetoception is the ability of some animals to detect magnetic fields as a means of orienting themselves. Although humans do not seem to possess the same biological mechanisms that allow other animals to sense magnetic fields, there are still many ways that we can improve our..... Listed under: Game – Entertainment Projects, Home Automation Projects, Projects

Interfacing a RC radio to a microcontroller is a bit of a pain, especially if you want a lot of channels, because you have to time each channel's output individually. An AVR only has one 16 bit timer with two compare channels, so either you...... Listed under: Radio Projects

Time for something a little more advanced. Direct Port Manipulation. Normally when using Arduino software, the actual logic behind changing the values in pins is abstracted away with digitalRead and digitalWrite. Now, for most people that's just fine. But it has some limitations. For one,...... Listed under: LED Projects, Projects

This head is a reading lamp which can be adjusted for direction of lighting, and dimmed as required. This Instructable combines Arduino programming, some simple electronics, carving with hand and power tools, mechanical control and a bit of woodwork. Apart from the Arduino and a...... Listed under: Home Automation Projects

In this instructable the main focus lies on the software which I've created – not so much on the hardware side. You needn't to use a high-power led for this, you can use every RGB-LED you like. The “High Power RGB LED Moodlamp”...... Listed under: LED Projects

This is a Modification of an electric wheelchair. I called it “Buggy” for two reasons. #1 My kids can still ride it around because I left the seat intact. #2 I haven't programmed anything for a long time. I plan to create “jobs” for it...... Listed under: Projects, Robotics – Automation Projects

A homemade thermostat attachment for a crock pot (or other electric heating device). It can be used to precisely control the temperature of the crock pot for things like yogurt fermentation. Why Making yogurt is fun. It is also way cheaper than buying it. You...... Listed under: Home Automation Projects

BLU-BOARD, control your home with blue tooth!
Big thanks to the fine people at Hack-A-Day for sharing this with the world! If you'd like to donate to the project: https://www.suprmav.com/projects/167/blu-board This project has been in the works for along time, three months if I reckon correctly, but anyways, this device will allow you...... Listed under: Development Board – Kits Projects, Home Automation Projects

676. CatBot: Automated Cat Laser using an Arduino

The CatBot is an autonomous laser toy for your cat. You may say “But Joe, isn't the laser pointer the best toy for the lazy cat owner?” I'd have to say no, the CatBot takes one step further. Using two servos, an Arduino and a...... Listed under: Projects, Robotics – Automation Projects

677. Nerd++: Controlling Dioder RGB LED Strips with Arduino, Pt. 1 – Getting Started

A few weeks ago, it came to my attention that IKEA do a set of colour-changeable LED strips. I've been looking for a decent way of providing some lighting behind my computer to reduce eye-strain for a long time, and these seemed perfect: I was...... Listed under: LED Projects

678. Arduino compatible Luna Mod Looper

The Luna Mod Looper, basically lets you record a sequence using a potentiometer to control the pitch of the note, and then play it back and add affects. Ever since I saw videos of the Luna Mod being played, I wanted to build my own...... Listed under: Projects, Robotics – Automation Projects

679. Glowing Color-Changing Guitar

In the kingdom of rock and roll it is important to set oneself apart. With millions of people in this world who can play the guitar, simply playing well is just not going to cut it. You need something extra to rise up as a...... Listed under: Sound – Audio Projects

680. LED matrix using shift registers using arduino

This instructable is meant to be a more complete explanation than others available online. Notably, this will provide more hardware explanation than is available in the LED Marquee instructable by led555. Goals This instructable presents the concepts involved with shift registers and high side drivers...... Listed under: LED Projects

681. Athena: The Global Car Tracking System(3D Images)

Bring out your 3D glasses and enjoy viewing in a novel way! I have added a new dimension to my instructable. If you do not have 3D glasses, then you can make one yourself. The following link explains how to make 3D glasses (link). Please...... Listed under: Car Projects, Sensor – Transducer – Detector Projects

682. Piano Stairs with Arduino and Raspberry Pi

Who doesn't love music? These Piano Stairs are an interactive, relatively portable, musical installation that can be applied to basically any stairwell. I built them for HackPrinceton and won 2nd place in the hardware track. I've had requests to share my code and diagrams, so...... Listed under: Sound – Audio Projects

683. Addressable Milk Bottles (LED Lighting + Arduino) using arduino
Make PPE milk bottles into good looking LED lights, and use an Arduino to control them. This recycles a number of things, mainly the milk bottles, and uses a very low amount of power: the LEDs apparently dissipate less than 3 watts but are bright...... Listed under: LED Projects

684. Make your own cellphone from scratch

The DIY Cellphone is a working (albeit basic) cellphone that you can make yourself. It can make and receive phone calls and text messages, store names and phone numbers, display the time, and serve as an alarm clock. It connects to GSM networks (like AT&T and T-Mobile)...... Listed under: How To – DIY – Projects, Phone Projects

685. LED Cube Spectrum Analyzer

In this project we'll create a small add-on PCB containing the a MSGEQ7 spectrum analyzer circuit and show how it can drive the RGB LED cube kit from Freertronics. This allows the cube to display the seven bands over four horizontal planes. There is a small amount...... Listed under: LED Projects

686. High Speed Outdoor Photography

High speed photography is generally carried out in a dark room with dedicated equipment (controlled remote flash for example)... The instructable proposed here enables to make high speed photography outside (and enjoy the sun!), in less than 2 hours with some generic DIY basic tools. The principle is the following...... Listed under: Video – Camera – Imaging Projects

687. DIY Sensors Workshop using arduino

The Arduino offers the advantage that a lot of people are using it so it is usually quite easy to get help or information via the internet. The main website for the Arduino is: http://www.arduino.cc/. The Arduino can also be programmed to behave in many...... Listed under: Sensor – Transducer – Detector Projects

688. Troubleshoot your car battery with ATtiny

Last winter I experienced some problems with my car battery. I knew that it was about time to replace it so off I went to buy a new one. This fact reminded me of an old article about a car battery/charging system diagnostics kit I...... Listed under: Battery Projects, Car Projects

689. STEAMPUNK STEAM GAUGE, POWERED BY ARDUINO

This was created to be some eye-candy for my kitchen. I wanted something unique for a special blank space on my wall, and adding movement, blinky lights and interesting mechanical “guts” made it even better. Ultimately, this project ended up requiring the following range of...... Listed under: Metering – Instrument Projects, Sensor – Transducer – Detector Projects

690. Arduino Laser Engraver

I started this project because I wanted to make something that had mechanical, electrical and software components. After looking around on Instructables, I figured that an Arduino based laser engraver would be an interesting machine to make, and that the machine itself could make interesting...... Listed under: Other Projects
691. Google Docs and the Arduino Yún

Introduction This is the second in a series of tutorials examining various uses of the Arduino Yún. In this article we'll examine how your Arduino Yún can send data that it captures from the analogue and digital inputs and a real-time clock IC to an online Google...... Listed under: Internet – Ethernet – LAN Projects

692. Multitouch Music Controller

This project is an Arduino-powered infrared touchscreen / coffee-table interface that I've been using to control various music and graphics applications on my computer. This is an old project that I've recently had time to go back and document/fix up; this project is a little...... Listed under: LCD Projects, Sound – Audio Projects

693. Controlling Cubase with Arduino based MIDI

A friend of mine wanted to control Cubase, his audio recording software, with a push button so that he could stop and start recordings remotely without having to go over to the computer and type on the keyboard. You may be able to do this...... Listed under: Projects, Sound – Audio Projects

694. Plugduino – Arduino based 120 Volt outlet controller

give your Arduino a 120 volt kick in the pants! The Arduino is a great tool for anyone interested in learning microcontroller programming, but after blinking some LEDs, what's next? This project enables your Arduino to control real-world 120 Volt electrical appliances you have in...... Listed under: LED Projects

695. Arduino Masterclass Part 2: Build an LED weather station using arduino

Project-specific parts You'll need the standard parts (Arduino board breadboard wires pliers and so on) along with these extras: DHT11 temperature/humidity sensor 7 x 330-ohm/0.5W metal film resistors 3 x 4.7k-ohm/0.5W metal film resistors 2 x BC337 NPN transistors 2 x LTSS43R or FND500 common...... Listed under: LED Projects

696. Proximity Sensing Origami Flower using Arduino

Origami is the traditional Japanese art of paper folding. In this project, with a little help from an Arduino, you can bring your origami into the 21st century and make it an interactive art! The result shown here uses Bare Conductive paint to give an...... Listed under: Projects, Sensor – Transducer – Detector Projects

697. Worms in Space Board Game

Story: NASA has taken worms to the ISS on their own special capsule. There was an accident aboard the station and the worm astronauts have to navigate to the escape capsule to return to Earth. The airlock to the escape capsule has been damaged but...... Listed under: Game – Entertainment Projects

698. FireHero: Turn Guitar Hero into an extreme sport by adding flamethrowers! using Arduino microcontroller

So, long ago I had read about propane fire poofers. They're pretty cool... I mean, who doesn't love fire?! But, no matter how awesome, they could get pretty boring after a while of seeing the same large fireball. I never built one because I wanted...... Listed under: Game – Entertainment Projects
In this article, we will go over how to connect an HD44780 LCD to an Arduino in order to display any text that we want to show on the LCD. To do this, first, we must make the appropriate physical connections from the Arduino board.

Listed under: LCD Projects

Bryan Zimmer emailed us this fantastic retro-themed DIY hack, a most timely submission as we just revisited the noir art deco-science fiction classic Dark City and we think this would have perfectly fit in the world (or in Adama's quarters on BSG). Bryan gives step-by-step...... Listed under: Home Automation Projects, How To – DIY – Projects, Phone Projects

What I'm going to show you is how to make an iTunes control device using an Arduino and a touch screen. The iTunes Control works by reading area's of the touch screen and send a letter to the computer via the serial port, which is...... Listed under: Phone Projects

Welcome to the second article in the tutorial series in which I'm building a remote controlled Arduino based vehicle robot. Here is the list of articles I have published: Part I: Hardware Components Part II: Programming the Arduino (this article) Part III: Assembling the Robot...... Listed under: Robotics – Automation Projects

Custom made Multiple color display. Have you ever wanted a display that is a little larger than one you can buy? Have you ever wanted to make a display the way you wanted it? Me too! This is how I made a custom multiple color...... Listed under: LED Projects

I've settled on the lighting industry standard of DMX as my overall control protocol as I explore the world of blinky lights. This universal control method is electrically robust, radio transmissible, and flexible enough for my needs (not to mention the needs of major concert...... Listed under: Development Board – Kits Projects, Interfacing(USB – RS232 – I2c –ISP) Projects

In this quick Arduino tutorial I will explain how you can control a relay using the Arduino Board, one 1K and one 10K resistors, one BC547 transistor, one 6V or 12V relay, one 1N4007 diode and a 12V fan. When the button is pressed the...... Listed under: Sensor – Transducer – Detector Projects

Easily control your iPod with Arduino using serial commands. This instructable includes the schematic, the code and some extra info; everything you need to make this work. USB, battery or wall power supply powered. Step 1: What you need Parts: 5x 1K ohm resistors
707. Make an Arduino timer

Hi, so me and my pal are setting up so we can make PCB’s. We are currently making a UV exposure box (possibly another instructable) and for this box, we needed a timer, so this is what we have done so far, and what we...... Listed under: Clock – Timer Projects, Projects

708. Easy 4×6 LED Matrix, Arduino!

In this instable, I will show you how to create your very own 4×6 LED matrix as well as show you how to write code for it! There is an animation creator program in step 4! Here is one ANIMATION to get you excited about the project! ***Wave...... Listed under: LED Projects, Projects

709. Pulse Width Modulation - PWM using Arduino

Pulse Width Modulation or PWM is a method of Digital to Analog Conversion. It helps in delivering analog average voltage using digital pulses of variable pulse width. By controlling the on time and off time, we can generate an analog average voltage using the digital...... Listed under: PWM Projects

710. Robot arm from a desk lamp (IKEA Tertial hack)

This project answers to a need I had: a third hand that holds a camera while I perform a test and takes photos/videos (useful when you're stuck at the lab late at night, and suddenly need a photographer). The downside to a robotic arm was...... Listed under: Robotics – Automation Projects

711. Breadboard Arduino

Received a couple of nice big bread boards for Christmas and decided that one of them needed an arduino to use with it. After some thought I decided that the best option was to build the required parts of an Arduino circuit direct on the...... Listed under: Development Board – Kits Projects

712. The MAX7219 and MAX7221 Led drivers

These two integrated circuits from Maxim are for driving either 64 individual Led's, or up to 8 digits of 7-segment displays. The drivers implement a SPI compatible slave interface that can be controlled from the Arduino using only 3 of the digital output pins. An...... Listed under: LED Projects

713. Arduino Time & Temp Display Shield

Another project I'm working on required a good timer, but the more I read about Arduino, I realized that I couldn't make an accurate timer using an Arduino that was already devoted to other tasks. The Arduino will always lose time if you perform other...... Listed under: Temperature Measurement Projects
714. **Measuring Battery Capacity With an Arduino**

I needed a couple of AA batteries and found the display at the supermarket where they were all arrayed. Normally when I'm shopping in the supermarket, I tend to look at the price/kg or price/l when comparing similar products. In the case of the batteries,..... Listed under: **Battery Projects, Projects**

715. **Sunflower Automaton using arduino**

This was a 6 week project created for the Spring 2012 Things That Think course at the University of Colorado at Boulder. Our project is an autonomous Sunflower. As in nature, the highest priority for our flower is sunlight, necessary for photosynthesis. Our Arduino controlled..... Listed under: **Video – Camera – Imaging Projects**

716. **Charlieplexing LEDs with an Arduino**

Charlieplexing is an ingenius method for controlling many LEDs without using many microcontroller pins. You can turn on or off one LED at a time. To light more than one LED at a time, you can scan the LEDs by turning a sequence of them..... Listed under: **LED Projects, Projects**

717. **Minimal Arduino with ATmega8**

Like me, you may have a few old Arduino boards or ATmega8 chips (in the boards) laying around from when you were first playing with Arduino. Those chips can still be really useful as the heart of a tiny "Minimal Arduino" setup. A normal Arduino..... Listed under: **Other Projects**

718. **Nocturnal Emissions: My Arduino Powered Internet Enabled Dream Generator**

We all need to dream more so I've created this Arduino Powered “dream generator" to help plant the seeds for some big thinking craziness. When you approach the generator a Maxbotix ultrasonic sensor triggers lights and music that draw you in so you can stare..... Listed under: **Internet – Ethernet – LAN Projects**

719. **Light Seeking R.C Car Hack (with Arduino) using arduino**

Creating a robotics platform from scratch takes allot of work and a few dollars. Buying a ready built one is easy but costs allot of money (at least for me). So instead I decided to piggy back off of the companies who make remote control..... Listed under: **Car Projects**

720. **Appliance Remote Control using Arduino**

One of the basic tasks in many home automation systems is controlling power to appliances. They could be lights, or a heater, or an exhaust fan, or just about anything else that runs on mains power. The problem of course is that it's dangerous to...... Listed under: **Home Automation Projects, Robotics – Automation Projects**

721. **Arduino Wireless Programming with XBee Series 1 or 2**
Hi. This Instructable will guide you through the process of wirelessly programming your Arduino using two XBees. I just finished designing a wireless EEG system with the XBee modules, so I've become quite fluent in their programming and have just now been able to accomplish this. It still amazes......

Listed under: Arduino Programmer Projects, Projects

722. My Arduino Binary Clock

Hi from Italy Although many watches are created binary, my project was inspired mainly to this: http://http://www.instructables.com/id/LED-Binary-Clock-1/, very smart and funny. I tried to improve the design and to add something personal. I think it's a good result at the end. The project is......

Listed under: Clock – Timer Projects, Projects

723. Cheap Arduino Controlled Yogurt Maker

These days I was reading an interesting post on how to make yogurt “by the gallon” (http://www.instructables.com/id/Yogurt-By-The-Gallon/). One thing needed was to maintain a rather constant temperature of 43°C (110°F), so the bacteria can grow properly. Though you can buy commercial yogurt makers, they aren't......

Listed under: Home Automation Projects, Projects

724. Low Cost LED Grid

There are a number of great Instructables on LED grids out there. This is a low cost version – not quite as polished, but easy to make. This project uses a couple of sheets of foam core, a fluorescent fixture cover from the local home......

Listed under: LED Projects

725. Make an Attiny13 based IR proximity sensor

This is an extremely cheap IR proximity sensor you can make with a few cheap parts and an AVR programmer. I use an Arduino as my programmer in this Instructable. This sensor only has a range of about 3 inches. You can easily add more......

726. Google Weather on graphical display with Arduino

In this project, I am using an Arduino board to show forecast of the weather from Google Weather service on a VGA screen. The display is obviously graphical one, with icons and some colorful text. It is one of those gadgets I wanted to have......

Listed under: Internet – Ethernet – LAN Projects, LCD Projects, Projects

727. Bluetooth plus Infrared Controlled Robotic Arm

Hi. I'm Darren a 17 year old hobbyist, and this is the first Instructable I'm posting here, so I apologize if it kinda sucks! I hope it's good enough... So how did the idea of a robotic arm come to me? Well, the first thing......

Listed under: Internet – Ethernet – LAN Projects, Robotics – Automation Projects

728. Intro to Arduino

An Arduino is an open-source microcontroller development board. In plain English, you can use the Arduino to read sensors and control things like motors and lights. This allows you to upload programs to this board which can then interact with things in the real
729. **Transforming Chandelier**

In this tutorial I will go over how to make a transforming chandelier. This project will be heavily CAD oriented (Solidworks and Illustrator), made by laser cutting/engraving acrylic sheets, and a little bit of Arduino coding and soldering. Step 1: Choosing materials. All the pieces...... Listed under: **Development Board – Kits Projects**

730. **Sentriduino! Its the all new Sentry turret**

Hey guys, Today I would like to show you how to make a simple sentry turret out of household Items! You would only need to get an Arduino UNO or Mega, a Ping))) Ultrasonic Range finder, two servos, and an electronic water squinter! The rest of...... Listed under: **Other Projects**

731. **RGB / RFID Lamp**

We have taken this project down, due to vendor’s request. Please wait till we get approval again...... Listed under: **Home Automation Projects**, **RFID – NFC projects**

732. **How to make a Ghost Knocker**

Step 1: Check the materials you need. Below is the list of stuff you need to make it: 1. Arduino I used an Arduino Pro Mini 3.3V. You also need USB-Serial tether to program it. 2. A battery box I used a AA x 4...... Listed under: **Game – Entertainment Projects**

733. **Temperature-Sensitive Infinity Mirror**

As per an assignment in my digital multi-media class, I’ve combined two Arduino-related tutorials into a functional object! The result is a pair of infinity mirrors that flash red and blue depending on minute fluctuations in ambient temperature. This is my first experience with Arduino,...... Listed under: **Temperature Measurement Projects**

734. **Wireless nunchuk controlled animatronic doll**

This instructable will attempt to show you how to make an animatronic doll controlled by a wireless nunchuk. This doll can only move its head though. I'm sure there are plenty of people out there who can take this and expand on it and make...... Listed under: **Game – Entertainment Projects**

735. **The Word Clock Arduino version**

************************************************************************** Major updates – A much better enclosure for this clock has been designed – check out http://www.instructables.com/id/The-Wordclock-Grew-Up/ ************************************************************************** Last month I wanted to
build a special gift for my beautiful wife, Megan. She has a teaching background in English, so what better present to...... Listed under: Clock – Timer Projects, Projects

736. **Arduino BlinkyBall Project**

I frequent a blog called hackaday.com which featured a project by “Nikolai”, it was a 10cm LED ball that used shift registers. It seems like a really fun project to attempt but the cost of having the boards made & not having any experience sending...... Listed under: LED Projects

737. **Educational colorimeter kit**

This instructable is a step-by-step assembly guide for the educational colorimeter kit we launched in April 2012 on Kickstarter. Assembly takes from 20-40 minutes. Once assembled the colorimeter can be used in a wide variety of science experiments to measure the absorbance and concentration of...... Listed under: Metering – Instrument Projects

738. **Blinky Lights using Arduino and LumiGeek**

I used the Arduino UNO combined with three LumiGeek shields to run lighting. LumiGeek has dedicated shields to support 1 Watt RGB LEDs that require constant current, Addressable RGB LED Strip, and Non-Addressable RGB LED Strip. Step 1: 1 Watt RGB LEDs (2x) I wired...... Listed under: LED Projects

739. **Servo 360 rotation mod (Parallax)**

In this instructurable I will expalain and show you how to make a Parallax servo rotate 360º. And againl have search the internet to see tutorials clear enough to make this posible with no luck. Don't get me wrong they are some how good but not...... Listed under: Motor Projects

740. **Wu-Tang Can: Interactive Tipping**

Cash rules everything around me. C.R.E.A.M. Get the money. Arduinos are showing up everywhere. Even in space. But what about the lowly tip jar? No. Are Arduino projects giving the Wu-Tang Clan the proper respect they deserve? Not even close! Rectification. That's what this is...... Listed under: Other Projects

741. **Hookup an LCD to an Arduino in 6 seconds with 3, not 6 pins**

Adding an LCD display to Arduino projects can add real value but the cost of doing so can be significant. Not a financial cost – you can pick up 16 (characters) x 2 (rows) LCD for as little as £3.50. The cost is the pin...... Listed under: LCD Projects, Projects

742. **Arduino Based Four Legged Robot**

The name of our robot is FIER and here is a video of it saying hello to the world. In this instructable, I will try to show you the basic steps to making your own walking robot for the most bang for your buck. You...... Listed under: Robotics – Automation Projects

743. **Analog audio panel for PC using Arduino**
Have you ever struggled with audio settings in control panel in middle of a VoIP call? Or, wondered if the other guy can hear you properly? I have. My work requires great deal of remote conference calls using PC. The first thing I wonder always...... Listed under: Projects, Sound – Audio Projects

744. **4X4X4 LED Cube w/ Arduino Un**

As someone who is very new to digital electronics this LED cube was fun to make, challenging and a great lesson in soldering. If you have some patience (64 LED's to solder!) and steady hands, this project will be well worth it in the end!...... Listed under: LED Projects

745. **Vacation Pet Feeder from Recycled Materials**

If you are a pet owner, going on vacation can be stressful. Usually, you need a friend or neighbor to come over every day and feed your pets. However, by enslaving robots you can keep your pet happy and enjoy a stress-free holiday. To save...... Listed under: Home Automation Projects

746. **HexiLogger, an Arduino based data logger**

The purpose of this project was to create a simple, portable device that would periodically read sensors and then store the sensor data so it could be retrieved later. The result is the HexiLogger, “hexi” because it can support up to six different sensor inputs...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects, Projects

747. **Open Source Server Room Monitor using Arduino**

This server room environmental monitoring system is a low cost high performance device with the same onboard features as commercial devices costing hundreds of dollars more. In addition to a low cost platform we will provide low cost sensors for many important devices to insure...... Listed under: Internet – Ethernet – LAN Projects, Metering – Instrument Projects, Projects, Sensor – Transducer – Detector Projects

748. **iTime clock in a Mac Mini box using Arduino**

After the untimely death of my Mac Mini (the last thing Apple I never buy), I recycled her limping in a clock display LEDs. Technically, there is not rocket science: an Arduino reads the time from an external clock and displays a matrix of 8x6...... Listed under: Clock – Timer Projects, Projects

749. **The UCube: Design & Print 3D Objects by flipping switches**

This instructable goes through how to design and print a variety of 3D models using a system called the ‘UCube’. Note: I would love to eventually publish detailed instructions on how to make your own UCube, but since the design is still changing and improving,...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

750. **Open Source Hearing Impaired Alarm Clock using Arduino**

Activities of daily living (ADL) are self-care activities that are usually taken for granted, since as the name implies they are performed on a daily basis. If you have ever ended up in a cast, or on crutches you can empathize how menial daily activities can suddenly be very difficult to...... Listed under: Clock – Timer Projects, Projects
751. **DIY Mod an Omnibot 80\'s Robot with Voice, Camera, Servos, Bluetooth**

*Check back for more updates on this build.*

So, have you heard of the Omnibot? Well! Any kid from the 80\'s will remember how amazing this robot was. For you young kids, this robot was released in the early 80\'s by Tomy. The robot...... Listed under: Internet – Ethernet – LAN Projects, Motor Projects, Robotics – Automation Projects, Video – Camera – Imaging Projects

752. **LED Calculator with Rotary Quadrature Encoder for Target System Voltage Selection using Arduino**

I\'m still working on the LED calculator (original idea and most recent work) — I\'ve finally got\'round to adding a rotary encoder to set the target system voltage. Now you can turn the potentiometer to set the LED brightness, turn the rotary encoder to set what...... Listed under: Calculator Projects, LED Projects, Projects

753. **Arduino Lens Controller – Synchronized Zoom/Focus with Wii Classic Controller**

My Lumix GH2 Micro Four Thirds camera not only shoots fantastic high definition videos, but with inexpensive adapters I can use it with older manual lenses that are cheap and often very high quality. I shoot a lot of performance videos for my daughter\'s dance studio, and I...... Listed under: Video – Camera – Imaging Projects

754. **Sensing Squeeze using Arduino**

I\'m researching squeeze sensing as a mode of tactile interface. Here I will cover the process of developing a squeezeable sensor and the firmware/software concerns associated with interpreting the data from the sensor. This fulfills the "sensor project" for my class called Computational Principles in...... Listed under: Projects, Sensor – Transducer – Detector Projects

755. **S.A.M. Spring Aided Machining (CNC with adhesive remover)**

S.A.M. Spring Aided Machining (CNC with solvent) is a school project designed by three architecture students at CCA, San Francisco: Matt Boeddiker, Abelino Robles, and Tim Henshaw-Plath. (www.cca.edu) The machine is capable of rapidly prototyping and creating subtractive formwork that can be used to cast...... Listed under: CNC Machines Projects

756. **A Beginner\'s guide to making an Arduino Shield PCB**

(This tutorial has gotten really popular recently, and I\'m very pleased that so many people are interested. I learned all of this stuff while working on my first PCB. If you\'re interested, I\'ve started to sell the most recent version of my Arduino ProtoShield. If......

Listed under: Development Board – Kits Projects

757. **Arduino Color Sensor**

Here we will be learning how to make a color sensor. my model consists of three cardboard compartments containing an LED – one red, one blue, and one green – and an OP550B phototransistor. The LED\'s shine simultaneously on a solid colored card. The phototransistors...... Listed under: Sensor – Transducer – Detector Projects

758. **Cat Repelling PIR motion sensor (covert) speaker box alarm using Arduino**
This is a PIR motion sensor device that works with the Arduino Uno. In order to make it covert enough to be placed in multiple settings and portable enough to fit most places, I decided to make the case for it appear as a speaker. The inspiration for...... Listed under: Projects, Security – Safety Projects, Sensor – Transducer – Detector Projects, Sound – Audio Projects

759. Arduino MIDI Volume Pedal

I'm playing keyboards this fall in another rock concert to benefit the high school robotics team, and for some of the tunes I need to be able to fade an organ in and out over a period of a measure or two. My keyboards are...... Listed under: Projects, Sound – Audio Projects

760. Arduino Stepper Motor Control

Hello all! This is a quick guide on how to use an Arduino© to control whether a cooling fan and a heater is turned on depending on the detected temperature from a TC74 Arduino sensor. This is for a final project for an Electronics class...... Listed under: Sensor – Transducer – Detector Projects

761. Arduino Thermostat with TC74 sensor

Hello all! This is a quick guide on how to use an Arduino© to control whether a cooling fan and a heater is turned on depending on the detected temperature from a TC74 Arduino sensor. This is for a final project for an Electronics class...... Listed under: Sensor – Transducer – Detector Projects

762. Geiger Counter with Touch Interface!

There are quite a few geiger counter instructables. The difference with this one is that I wanted to give it a modern interface, similar to smart phone touch screens, that anyone would feel comfortable using. The reason for this is that I want to use it as...... Listed under: Calculator Projects, Sensor – Transducer – Detector Projects

763. Digital Clock with Arduino and DS1307

In this article you will learn how to make a digital clock using Arduino and the DS1307 RTC IC. What is DS1307 IC actually? Well, it is a Real Time Clock (RTC) IC that is simple to use, low cost and easy available. The IC...... Listed under: Clock – Timer Projects

764. Arduino Drawbot

In some of my previous Arduino instructurables I have show to the Arduino beginers on how to control servos in different ways. And in my last instructurable I have show the modification of a Parallax servo for a 360º rotation. So in this one I will show Arduino...... Listed under: Robotics – Automation Projects

765. Arduino Led Dice

This instructable will show you how to create a dice using Arduino and few components. It's an easy and fun project, suitable for beginners and those who want to start with Arduino; it also requires a minimal amount of components. This explains how to create...... Listed under: LED Projects, Projects

766. Arduino-Square with Color LCD
B-Squares is a modular electronics platform that enables users to build, customize, and continuously update their own electronics applications. In this B-Squares App we will cover how to assemble a simple Color-LCD Application using the Arduino-Square. Hardware: 1. Arduino-Square. 2. Battery-Square 3. Color LCD Shield...... Listed under: LCD Projects, Projects

767. Simon the Octopus

Everyone loves the Simon game! So we decided to take it to another level. This project was done for our Things That Think class where we had to make a PlushBot (a plush toy that thinks! “with computation”) thus, kids were our target. We...... Listed under: Game – Entertainment Projects

768. The Traveling Geocache using Arduino

This project and future projects can be found at my website http://revoltlab.com/ where you can also find my blog. UPDATE LOG: NOW SUPER SIMPLE TO REPROGRAM! Easy FTDI USB interface hardware explained in step 10 Easy FTDI USB interface programming explained in step 13 NEW...... Listed under: GPS Based Projects, LCD Projects, Projects

769. Arduino Button Activated Treat Dispenser

For my Digital Multimedia class final, I created a treat dispenser that is activated by pulling a chain, which starts a servo motor that spins a wheel to dispense treats to my to African Grey parrots. Step 1: Gather Materials [box color="#985D00" bg="#FFF8CB" font="verdana" fontsize="14...... Listed under: Motor Projects, Other Projects

770. DIY Arduino Stepper Motor Driver Board

This page will show you how to put together a simple stepper motor driver board that can be controlled with an Arduino. I built mine to use with my heliostat projects, but it could be used for other things too. Update: I no longer use...... Listed under: How To – DIY – Projects, Motor Projects

771. Giant LED bar graph

For a recent project I needed to build a large and obvious bar graph display. This was to show the power generated from a bicycle generator. I came up with this design and was pretty pleased with the final results as it is relatively low...... Listed under: LED Projects

772. Drive with PID Control

This example shows how to simulate a simple closed-loop control algorithm in Simulink® and how to run it on an Arduino® board. Supported Hardware: Arduino Leonardo Arduino Mega 2560 Arduino Mega ADK Arduino Pro Arduino Uno Available versions of this example: Arduino Mega 2560 board:...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

773. BLINKING AN LED USING AN ARDUINO UNO (EXPLAINED)

So you're here because you want to start learning some of the Arduino Basics... So let's start with THE most basics... no this “tutorial” is actually a little more basic than what you have in mind. It only requires that you: Have ANY Arduino Board...... Listed under: LED
774. **Easy Arduino Audio Annoyatron**

This simple device plays a small tune at a random interval, between 5 and 30 seconds when the lights in a room go off. It can be cleverly disguised inside a tissue box, or inside or under any number of household objects. This is a very simple project.

Listed under: [Projects](#), [Sound – Audio Projects](#)

775. **Blinky the one-eyed clock using Arduino**

In this tutorial you learn how to make a blinking clock with a difference! Updated 18/03/2013. Followes of my website would realise that I tend to make too many clocks in those tutorials. Well, I like making clocks... so here is another one. However this time.....

Listed under: [Clock – Timer Projects](#), [Projects](#)

776. **How to make your own Arduino board**

If you are like me which I am guessing you are, then ever since you got into doing stuff with arduino you have wanted to make your own arduino board. You may be surprised to find out that making the prototyping board is actually very.....

781. **Webster: A Geometric Pattern Weaving Machine**
We are three students from California College of the Arts in San Francisco in the Architecture program. This studio is called Creative Architecture Machines and is taught by Jason Johnson and Michael Shiloh. Webster is a geometric pattern weaving machine that takes inspiration from Islamic..... Listed under: Calculator Projects, PWM Projects

782. Colorful Countdown Clock for tight timeline management using Arduino

This is a funny looking clock that has that displays time on relatively large 32×16 Bi-Color LED Matrix. It includes also a countdown counter that I find very useful in many situations. Features: Date And time display Temperature display Countdown timer Buzzer notification Randomly changing...... Listed under: Clock – Timer Projects, Projects

783. Arduino Nano based Microbot

This instructable was created to be entered in the Robot Challenge. If I win, the parts will of course, go into robots like this one. Notes on how to include some of the very components in the prize packages are given in the last step. I...... Listed under: Robotics – Automation Projects

784. Simple Arduino light meter

This Arduino project is a simple light meter using a photo-transistor. An LDR would be more appropriate but the photo-transistor is what I has spare at the time. On the other hand the photo-transistor is sensitive to infrared, so its handy for testing remote controls....... Listed under: Metering – Instrument Projects

785. Arduino Based Automated Lighting Control

This is my second instructable. i want to share some of the basic things i made using the arduino i am so busy lately. then i got the chance to have this spare time... inspired by my former student and a fellow co league to...... Listed under: Arduino Android, Internet – Ethernet – LAN Projects, LED Projects, Projects

786. Remote Control Door – Internet Your Thing

We can instantly open a door or control anything we can connect. It works from any iPhone, Android, or PC. After connecting something we want to control, download the free app to a PC, open a port, and control it remotely from anywhere. It's open...... Listed under: Internet – Ethernet – LAN Projects

787. Minimal Arduino with ATmega8

Like me, you may have a few old Arduino boards or ATmega8 chips (in the boards) laying around from when you were first playing with Arduino. Those chips can still be really useful as the heart of a tiny “Minimal Arduino” setup. A normal Arduino...... Listed under: Interfacing(USB – RS232 – I2c -ISP) Projects

788. Control Arduino Wirelessly with MATLAB

Been seeing few DIYs on how to establish a communication between MATLAB application and Arduino that is hardwired to PC. However, I haven't encountered anything that control Arduino via MATLAB wirelessly using the ENC28j60 compatible Ethernet shield. In this ible', I'm going to show the...... Listed under: How To – DIY – Projects, Internet – Ethernet – LAN Projects
789. **Turn your Arduino into a 4 voice wavetable synth**

Multiple synthesizer projects have been done for the Arduino, but few have been able to utilize the full power of the Arduino processor. DZL from GeekPhysical wrote a 4 voice wavetable synthesizer that is one of the more advanced software based synths for the Arduino. Listed under: [Sound – Audio Projects](#)

790. **Perfboard Hackduino (Arduino-compatible circuit)**

Never again will you have to dismantle a finished project just to reuse an Arduino board! This tutorial will go through the steps involved in fabricating your own Arduino-compatible circuit using just ~$8 of parts (this includes the ATMega chip!). This is perfect for installing.... Listed under: [Development Board – Kits Projects](#)

791. **Arduino Backlit LCD shield**

In this tutorial learn how to make your own backlit-LCD Arduino shield. Updated 18/03/2013 Let's see how simple it is to make your own Arduino LCD shield. Sure - you can just buy one, but where's the fun in that? Getting Started Our LCD is...... Listed under: [LCD Projects, Projects](#)

792. **Knight Rider Rides Again using an Arduino**

This a Knight Rider Style LED Chaser Done with a Arduino Duemilanove with an ATmega328 chip. Step 1: Things you'll need: 6 LEDs (any color) 1 Breadboard 1 100 Ohm Resistor 12 Breadboard Jumpers 1 Arduino Duemilanove “or” Decimila 1 USB cable with A-type connector...... Listed under: [LED Projects, Projects](#)

793. **Simple Buck LED Driver with PWM Input**

High-power LEDs over 1W are now quite inexpensive. I'm sure many of you are incorporating LEDs as light sources in your projects. However I realize that the finding and configuring the power supply is still not as simple as it can be; commercially available LED...... Listed under: [LED Projects, PWM Projects](#)

794. **Breadboard and LEDs (lesson 3)**

Introduction You've started modifying sketches, and played a bit with the onboard LED (or if you have an NG, an LED you added). The next step is to start adding onto the hardware component of the Arduino. We will do this by adding a solderless breadboard...... Listed under: [LED Projects](#)

795. **The Talking Breathalyzer using an Arduino**

*** Additional info at [http://droidalyzer.com/talkingbreathalyzer/index.html](http://droidalyzer.com/talkingbreathalyzer/index.html) *** A customizable Breathalyzer that talks and tells you how much you've had to drink. It's also open source and can easily be modified with your own text on the LCD screen and audio MP3 files. When tethered to a PC with...... Listed under: [Medical – Health based Projects, Projects](#)

796. **FaceBooth – One button to facebook photobooth**

I wanted to make a photobooth for a Christmas party. I wanted it to be simple to operate and only be one click easy so that even a guest who was chemically uncoordinated could even operate it.I wanted a solution that would take a photo...... Listed under: [Internet – Ethernet – LAN Projects, Video – Camera – Imaging Projects](#)
797. **Arduino-controlled, Aluminum Archangel Costume Wings**

I have always loved the Marvel character Archangel. When my brother, (Shameless plug alert) budding comic book artist David Fernandez, showed me pics of a cosplay convention he went to I thought “wouldn’t it be awesome if someone made life-size archangel wings?”. The idea sank into the...... Listed under: **Game – Entertainment Projects**

798. **Arduino Breathalyzer**

What is a breathalyzer you may ask? It is a device for estimating blood alcohol content (BAC) from a breath sample. In simple terms it is a device to test whether a person is drunk or not. As the title suggests it runs on the arduino. Our breathalyzer...... Listed under: **Medical – Health based Projects**

799. **Add a real-time clock to the Freetronics TwentyTen using Arduino**

Let's add a DS1307 real-time clock to our Freetronics Arduino-compatible board. Updated 18/03/2013 Now and again I find myself making another kind of clock or timing device using the Arduino system, and each one has been making use of the Maxim DS1307 real-time clock IC. However...... Listed under: **Clock – Timer Projects**

800. **Arduino Masterclass Part 1: Make your own hardware**

The world is going nuts over the Raspberry Pi single-board computer (SBC) for being a whole system under $50. In reality though the Pi isn't actually the cheapest computing device available. If you want really cheap how does $13.50 sound for a mini computer that...... Listed under: **Development Board – Kits Projects**
